NIKARAGUA FLIGHTS:
ERAU PILOTS RELIEF FLIGHT

BY MIKE TALLMAN

Mr. Walter Green and Mr. Charles Horakman, both of whom were ERAU flight instructors, and Mr. Charles Spelhain, an ERAU student, made up the crew of a DC-3 which left Daytona Beach Jan. 13 with $3,000 and 6,000 pounds of food and clothing to aid the victims of the earthquake in Managua, Nicaragua.

The money and supplies were collected by the students of Seabreeze High School. The Air craft was donated for use by Marian Scott of Savannah, Georgia.

The flight to Nicaragua was plagued by maintenance problems. While refueling in Key West, fuel leaks were discovered in both engines. After repairs had been made the flight was continued, only to have the navigation equipment fail, making it necessary to return to Miami for repairs.

The flight continued from Miami at 8 a.m. Saturday, and reached Managua at 6:45 p.m. The return trip was much less eventful. After spending a restful night in Managua, the plane and crew arrived in Daytona Beach at 9:05 p.m. Monday, Jan. 15.

Mr. Green said that he had been approached by a member of the E-R SGA about making additional flights with supplies collected by ERAU students.

The new policy states that any student found cheating or plagiarizing shall receive a failing grade and his or her name shall be forwarded through the Division Chairman to the Dean of Students.

When a student misses an exam, for any reason except illness, he shall be offered only one chance at a make-up exam if he desires. Plagiarism, defined as the theft of words or ideas and the stealing and passing off the work of someone else as one's own without crediting the source. According to Roger P. Campbell, Humanities and Social Science Division Chairman, plagiarism is an act of deviation from a student's normal literary style or the expression of facts or statistics which obviously differ from those of a student's level of investigation.

The committee has requested that fraternity and sorority members who wish to assist in this project contact the SGA office. Any additional supplies to fill a plane are collected, they will be flown to Nicaragua aboard a DC-3 donated by Maritan L.V. Air Spy, Inc. of Savannah, Ga.

MORE RELIEF BY SGA

BY MIKE TALLMAN

The Embry-Riddle Student Government Association has formed an aid committee, headed by Mike Leonard, to collect and transport relief supplies to Nicaragua to aid earthquake victims there.

Collections have already been made, and items most needed are staple foods such as rice, corn meal, dried beans, clothing, and, of course, money.

For those who wish to contribute money, according to Leonard, checks should be sent to the SGA office, P.O. Box 2411 Daytona Beach, Fla. 32119.

Good clothing, blankets, etc. can be taken to the following collection points:

Daytona Beach area
Daytona Beach Aviation
DAB Regional Airport
Ormond Beach
St. James Episcopal Church, 309 Downing Ave.
St. Paul's Episcopal Church, 309 Downing Ave.

If contributors have no means of getting donations to the collection points, the SGA will pick them up. Call them at 252-5561 Ext. 26 and leave your name and address.

The committee has requested that fraternity and sorority houses send money, according to Leonard, checks should be sent to the SGA office, P.O. Box 2411 Daytona Beach, Fla. 32119.

The committee has requested that fraternity and sorority members who wish to assist in this project contact the SGA office. Any additional supplies to fill a plane are collected, they will be flown to Nicaragua aboard a DC-3 donated by Maritan L.V. Air Spy, Inc. of Savannah, Ga.

LIBRARY HAS NEW LOCATION

BY PETER MENLO

Twenty four people, including 16 students, helped move the library across campus and reassemble 15,000 books during the Christmas Break. Among them was Mr. Anne, ERAU Director of Library Services.

The job was completed without having to hire help from the university. Mr. Russell Leavitt, Director of the Physical Plant at E-R supervised much of the work. Mr. Leavitt especially wanted to express the appreciation for the help and cooperation of everyone connected with the move.

Leavitt said the biggest problem, according to Mr. Sauls, was in utilizing only the old shelves. First the books had to be removed, then installed in the new location, and finally, the books replaced on the shelves. Although the library appears larger, Mr. Sauls believes the move was due to the roomier appearance. The reading room, in fact, seats only 50 people now, but it could seat 130 before the move. This, Mr. Sauls stated, is because the largest section of the old reading room would not fit. The new multi-leveled floor design would fit in room A-110.

The library has been buying additional books at the rate of 2,500 per year. According to Mr. Sauls, just enough room exists now for an additional 5,000-6,000 books and the library will continue to grow its present spaces in just two years.

Present planning provides 12,000 square feet. The proposed new student center and the library will be keeping within President Hunt's policy of decentralization and will not cause parts of the library to move. This is to assure the future of the library for student activity centers.

Mr. Sauls believes that the utilization of the library is the same as before the move. The crowded atmosphere during the Christmas Break was due to the smaller seating capacity and to the new convenience of a study hall.

The recent rise of dishonest and indiscipline incidents of students writing “bad” checks, has led Dean Speelman, ERAU Dean of Men, and the Administration to initiate action to document, in the Campus Regulations, school policies on “bad” checks.

Before the regulations were enacted, the following comments were made: Historically, this university has had the past encountered only minor problems with students due to the commission of dishonest acts, either on or off campus.

Prior to Sept. 1972, it would have been unusual for more than one serious problem to arise per trimester, whether from cheating on examinations, term papers, habitual writing checks without sufficient funds, or from some form of outside source.

"Moreover, such was not the case during the Fall '73 Trimester." When a student, with the theft of a necklace, or thefts of this nature from another, and gradually increasing the number and scope of careless, "shady," or illegal acts, we found ourselves dealing much more with dishonest students than ever before. We have experienced an average of 10 students who, during the Fall semester, were found guilty of such acts.

While this number is not alarming, it is disturbing, and we have had to reevaluate some of our campus regulations, the 3rd Incident: On or Off Campus: Mandatorily approved for each trimester, or equivalent period.

The proposed Student Senate on or Off Campus: Mandatorily approved for each trimester, or equivalent period.

The proposed Student Senate on or Off Campus: Mandatorily approved for each trimester, or equivalent period.
President's Corner

"Happy New Year All Students," I would like to welcome all returning students back, and hope that you will have an enjoyable year. While you were gone, the admissions office set a record and enrolled many more students than expected.

There are several things under consideration by the various committees on this campus at this time. One of the more interesting ones is that President Pasternak requested a study to be initiated into flight training, in which we could authorize AP students, especially those enrolled in AP, to receive credit in flight training. A pre-registration committee has also been formed which will be convening shortly to discuss different means of pre-registration.

Another area under study are the graduation policies of the University.

You have probably heard on the radio and from other news sources comments about the proposed airline flight to Naples being an exciting adventure. To compliment the students of Seabreeze High School, especially Rick Karl, for his fine job. Since he announced that they were going to sponsor only one flight, we in the SGA, decided to keep the bar rolling. A committee was formed, which is headed by the Vice President of the SGA, Mike Leonard to collect funds and/or goods to be sent on future flights sponsored by the SGA. Many fan the response has been excellent.

All students should take note of Tejinder's Noviana. He has taken upon himself to locate all films which were available and to get technical in nature and has volunteered his time to interested students. The showings are at 8:00 p.m. every Thursday night in the large classroom in Building A.

Last trimester we had approximately ten Sena- tors graduated some of whom held major committee chairmanships. The following new committee chairmen have been appointed: Mr. Jan Nelson, Finance Committee; Mr. Rick DiPietro, Social Functions, and Mr. Bob Weisfeld, NEW. Also, Mr. and Mrs. Moore was just recently voted in by the Senate as the second student member of the University Board of Trustees.

I would like to take this opportunity to congratulate Drew Kasell and Gary Rice for their successes in the recent elections.

I would like to point out on security especially for new students on campus who may or may not be familiar with the policies that were outlined in your Student Briefing.

Unfortunately, last trimester we lost one of our students to a traffic mishap although he was in the capital of the state of right. Be careful and stay safe.

"The SGA President's Interview of the Week" The tuition at EAU is one of the most difficult problems in the state of Florida, but that in your pipe and smoke it.

A Proposal For Books Buying and Selling

Now that the book buying is over for the trimester, I find there is a need for students who have used textbooks to go buy, sell or trade used textbooks and materials without paying third-party fees. The hassle of turning in your books without receiving payment when you need it is the most, immediately.

After having waited in line at the Texaco book store, I was informed they were out of the text I needed. Having overheard the conversation, a student behind me, carrying the book I wanted to sell, said he had the book I needed, and possibly more. At that point, we proceeded to do business, and ended up with two textbooks and saved ten dollars compared with new book prices and saved ten dollars compared with new book prices and saved ten dollars compared with new book prices and saved ten dollars compared with new book prices and saved ten dollars compared with new book prices.

Math and Science department offers courses of excellent quality from instructors well qualified in their fields.

The Administration of EAU will continue to allow those courses that are most in demand. This fact has a large effect on the way the students are treated. The most frequent complaint that students have about the administration is that the students are not paid to stand in line and hate to pay for the privilege to stand in line. For management, students the administration is a classic example of a bureaucratic monopoly puppet show. With "WRITE IT DON'T SAY IT' on each puppet, the puppet head who dance to the tune of "EI Presidente," the head puppeteer.

The Aviation Division of Flight Technology offers flight courses and airframe and powerplant courses from instructors who provide an atmosphere that is always right. The Flight department's curriculum is designed for the student who has taken all of his flight training at EAU. However, the majority of flight students attending other schools, and are in the course of life time hassen. The instructors have too many students to devote adequate attention to each student's progress. The flight courses are allowed to students to hold out for an extended period of time. The student becomes frustrated and lacking motivation. There are an excessive amount of instructor changes due to these facts. The flight line runs a competition of military operation and fixed base operation which leads to the belief that instructors are having their problems also.

My recommendations to the administration are that they try to overcome these problems. First, they need to be involved. The student body is small and ranges over a large gamut of different fields of interest. The students should work with the SGA. Inform their elected directors of their problems and use the SGA as a tool for change.

My recommendations to the faculty and the staff are that they start treating the students as an asset, instead of cadre or trainees. That they diligently work to improve the quality of the University, instead of buying PBRs in the Daytona Beach area.

My recommendations to the faculty and the staff are that they start treating the students as an asset, instead of cadre or trainees. That they diligently work to improve the quality of the University, instead of buying PBRs in the Daytona Beach area.

Letter to The Avion

To the Students, Staff and Faculty of EAU.

This is a critical evaluation of the Academic Administration and Division of Flight Technology, founded on my experiences as an Air Science and Aviation Management student.

The Academic Division offers excellent college courses, however, there is certain department that have courses that cannot be equaled by any other university.

The Air Science department offers undergraduate water aircraft building in History of Naval Aviation, numerous hard experiences, Airframe and Powerplant department, liking to inform the second hand knowledge which leads me to believe that instructors are having their problems also.

The Math and Science department offers courses of excellent quality from instructors well qualified in their fields.

The Administration of EAU will continue to allow those courses that are most in demand. This fact has a large effect on the way the students are treated. Elections

Hello Students, your favorite Political Science courses have a new enemy of the common people. This January 31st, the Student Government will hold their biannual election. To which the eventual winner can be accurately forecasted by counting how many votes are cast. Those elected shall be the winners of the "Paper War".

What is the "Paper War"? Look about you this next couple of weeks. Honestly, under all those layers of paper, the doors are made of glass, the walls are of brick, and the posts are concrete. Those elected shall be of the money aristocracy, elections cost money. Past campaigns have cost upwards of $60,000. So much money has been frivolously thrown away in order to litter the landscape, not for a couple of weeks but for months. Look about you as you walk. (and watch out for bumper stickers from elections past (and other past events) on wall doors, buses, trash cans, and urinals.

James T. Bigot proposes a limit be placed upon those trying to coin the most revered and hated collection of characters on campus. In fact, the Student Government Association, this limit would be the SGA fees in excess of the limit that the election (Thus allowing for inflation.) With the slight adjustment, I see a more reasonable and better election with the emphasis on person to person and issue basis of campaigning.

Those interested can reach their Senators and Candidates. A list of them is supposed to be in the Student Center.

U.S. Marine Corps Coming To Student Center

The U.S. Marine Corps Official Selection Team from Jacksonville, Fl., will be here 24-25th January 1973 to discuss Marine Corps opportunities for men and women.

The Team will be available between 9:00 a.m. to 3:00 p.m. in the Student Center to interview, counsel and test those persons interested in earning a commission in the U.S. Marine Corps.

Available programs include Officer Candidate School for freshmen and graduate students. The Platoon Leaders Class summer training program is offered for undergraduates and seniors that are interested in obtaining officer positions, pilot training, school and naval school assignments. The PLC program offers financial aid and civilian pilot training for those who qualify.

Students are invited to discuss their interests with the team and for those who desire may be tested on campus.

New Ring for Riddle

The HERIFF-JONES Co. will now be contracted to the students to make rings for interested individuals. The amount of delays and incorrect deliveries with the previous company and the SCA decided it was time to take action to remedy the unfortunate situation.

Mr. Adam Sowell will hold a ring day sometime during the beginning of February inorder to display his company's products. Design and cost of the new rings is expected to remain approximately the same; the major improvements in the field of quality and customer satisfaction.

We're looking forward to hearing and talking to Mr. Sowell here on campus.

Daytona Beach Aviation

TURNS OVER A NEW LEAF

Since the purchase of Daytona Beach Aviation by Emory Riddle, the operation of the FBO has been completely independent of the school. Daytona Beach Aviation is still run as an independent company, just like it was before, but with Emory Riddle graduates running the show, and the university as the sole stockholder.

The president of DAB Aviation, Mr. T. Jones, stated that there are still a few bugs to be worked out in the operation of the FBO, but they seem to have the problems well in hand.

ERUU airframe and powerplant classes are held on the second floor of their hangar and there are plans to start a work study program between the school and DAB Aviation. This may open positions at a later date for certain ERUU students in areas such as management, mechanics, and other various job opportunities.

It has been described as a great incentive to give graduates, and soon to be graduates, the opportunity to find him or herself involved in the real world of aviation, not just studying about it, but actually working with it as it is done with various other programs ERUU offers. This will definitely be a landmark for the students of this school and their future achievements.

New I.D. Cards Issued

BY JOHN FOSTER

All students MUST come to the Dean of Men's Office and pick up a Certificate of Registration of the new I.D. Card.

Old I.D. Cards WILL NOT be accepted on campus after January 26th. Also local merchants in Daytona are also being notified of the I.D. Card change.

The reason for the change in I.D. Cards is due to the excessive misuse of the old I.D. Cards.

The old I.D. Card had no expiration date on it. In the new I.D. Card system now being incorporated, I.D. Cards will remain as long as a student continues as a registrant of the University.

So be sure and get your new cards as soon as possible. Call the Dean of Men's Office before Jan. 26th. Also Friday, Jan. 26, 1973 old I.D. Cards will NOT be accepted on campus as they are not the new and local merchants will be advised not to accept the old I.D. as any form of identification.

MA 111 Led By "Blackbelt" Of Quadratic Equations

BY BILL LEEDS

A former ERUU student and faculty member, Mr. Jim Laedec who came to ERUU when he graduated from the University of Miami in 1968.

Mr. Laedec graduated from the University of Florida in 1968 with a B.S. in Aeronautical Engineering. Not being fond of the draft during that particular period of American history he secured an interesting job with the Hamilton Standard Co. in Conn. His duties were varied and numerous and included working for the propulsion Mechanics Dept. and was later in charge of a United States Research for the Underwater Sound Lab Project.

Mr. Laedec managed to migrate back to Fla. in January 1971 where he entered the University of Florida in a Mechanical Engineering Curriculum. Finding that Mechanical Engineering was not as personally rewarding as he had originally anticipated he moved back to Daytona Beach and began teaching the Math II course on a part time basis. During the summer of '72 he transferred to the Daytona Beach Branch of Florida Technology University in pursuit of a Master's Degree in Engineering Mechanics and Material Science. As is evidenced by his past educational background he is very much interested in Structural Design, especially in the area of Structural Analysis.

His hobbies include working on his Masters Degree, attending a remedial Math course to the 50-60 dancers Broadway "A" and attempting to get into the Faculty Alumni mensana Building B using his skate key.

When asked about his experiences at ERUU he volunteered that the student body here works very hard, that he is working well during class. I look forward to expanding these areas of interest and meaningful to the students and am willing to help them learn. My goal is to teach students with a solid working knowledge of math so that the student body and the University can expand and grow together. I know Mr. Laedec and can only comment that this individual gets my vote as Teacher of the Year!
BUDDY BAKER MOVES

Buddy Baker, one of the nation's fastest and most successful automobile race drivers, will begin a new profession on Dec. 15.

Baker, the first driver to break the 200 mile-per-hour barrier on a closed course and winner of the recent season ending 500-mile NASCAR Grand National Race at Texas World Speedway, will join the public relations staff of the Internal Speedway Corporation.

Announcement of Baker's appointment was made by Jim Foster, vice-president and director of corporate communications for the company which operates the world's largest and most challenging race tracks, Daytona International Speedway at Talladega, Ala.

"We are very pleased to have Baker join our staff, even on a part-time basis," Foster said. "He is one of the brightest and most professional men in the racing profession - and we feel he has a great future in public relations."

Baker will work with the speedway publicity staff on weekdays and will be in the mail room at Daytona Speedway. He will also assist in poster and brochure distribution, writing and editing, as well as make public appearances.

"This is a good opportunity for me to learn public relations from the ground up," Baker said. "It's something I've wanted to do for several years and I am pleased to be associated with the group at Daytona." Baker emphasized that the start of a new profession does not mean he is thinking of retiring as a race driver. "I have a lot of competition ahead," he said.

He will compete in 1973 in the K&K Insurance Dodge prepared by Harry Hyde of Charlotte, N.C.

Baker won two major Winston Cup Grand National races in 1972 en route to winning $97,540. He has won over $200,000 in his last two seasons.

PARACHUTE CLASS

EUAU's Sport Parachute Club will hold its first class of instruction Monday, Jan. 23 at 7:00 p.m. in Building A, Room 105.

New students, or those who have been attending E-R and who are interested in jumping, or in learning how to jump are urged to attend.

According to Fred Hamon, E-R's recreation instructor, both he and Jim Horrobin, academic administrative assistant and transfer student and advisor, were recently certified as U.S. Parachute instructors, and out of a class of 22 students. Hamilton said that this was the first time this had ever been offered in the State of Florida.

The class was taught by William Rodlinger, a USAF instructor/examiner, at EUAU and a fellow club member.
Volleyball: NCAA, Intramural

by James Hunter

This trimester ERAU intramural volleyball is really going places. Aside from the regular intramural volleyball games, which will be held in the old gym next to the student center, Coach Wurtsbach is organizing the first Varsity Volleyball team. Toward the end of the intramural season the best players will be picked from each team to form one varsity team. After a few more weeks of practice, this team will travel up to the University of Florida at Gainesville to compete in the invitational volleyball games. This will take place sometime in March. Anyone interested in forming a team should get at least six people together and elect a team captain. Coach Wurtsbach is holding a meeting Wednesday, January 24th at 7 p.m. in building A room 100 to discuss the rules and make up a schedule for each team. Each captain is urged to attend this meeting in order to get his team on the roster. The first game will be held Wednesday, February 7th, and don't forget everyone is invited.

Baseball Warms Up

by Jim Hunter

In the past the ERAU team has done very well considering all the injuries they encountered, but this trimester under the direction and supervision of Coach Brown, the Eagles are really looking strong. With the exception of a few good men from last year, the team consists of all new blood. Each man has had much previous experience and it shows in their practices. Already, with only one week of practice, they have been much better hitting and stronger catching than in the previous seasons. Thru extra efforts by the team alone, such as selling light bulbs and asking for donations from small businesses in town, the eagles have added a new pitching machine to their practicing equipment. Now, thats team spirit.

The Eagles first scrimmage is against Saint Johns Junior College on Saturday, January 26th, at home. These scrimmage, or pre-season games are nothing more than practice where every man on the team gets a chance to show his ability. After these practice games are over, its down to business for the Eagles, because this trimester involves some tough competition. They will be playing schools such as Lebanon College, University of Delaware, Harvard, and the tough Florida Southern team who are the NCAA champs.

Crackdown Continued

Immediate suspension or dismissal may be imposed for failure to pay assessed fines within ten (10) days of final judgement.

4th Incident: On or Off Campus - Mandatory appearance before Faculty/Student Conduct Committee, which has authority to recommend suspension or dismissal.

NOTE: A combination of "Off" or "On" incidents subjects the individual to the maximum possible penalty for either category of penalty for the total of incidents involved.

The number of incidents will continue to accrue throughout any two-trimester academic year (or equivalent period); subsequently, one trimester will be dropped when the third trimester has been completed.

Cheating Changes Continued

An offense as cheating on exams, both present and past, is subject to the student's actual knowledge on the subject.

Many students may not realize that when an instructor grades on a "cave" (cheating or plagiarism by other students) may prevent the honest student from attaining the grade he deserves.

Prior to the issuance of this policy, these offenses were handled individually, Campbell stated. The expected punishment was vague and subject to approval by administrators above the Division Chairman. Now punishment will be consistent and will not be handled objectively within the department.

Prior to the new make-up exam policy, Campbell added, many students were abusing the privilege by missing exams for minor or improper reasons, causing more work for instructors than should be necessary. It is almost impossible to provide make-up exams to different individuals at different times that can be equal to the original test when the late-comer has the advantage of finding out what was tested on the first exam.

According to Campbell and his faculty, giving make-up exams on one specified day, April 7, 1973, will aid the ultimate objective of giving the students the grades they deserve.
