STUDENT CENTER SOON?

BY JIM OWEN

At 4 p.m. last Saturday 3 white teenagers tried to steal a Hodaka Super Mat from the Ford 1 motorcycle lot by washing it down the drive, which indicates it was not locked.

The Security Guard on duty, Mark W. Patterson, noticed these individuals earlier. When he saw their actions, he ran to interrupt.

With odds at 1 in favor they escaped but the police were summoned. A blanket has been outlawed to belong to the suspect discovered by E&F Security, an employee of the Daytona police dept.

Factors that contributed to this incident were the front fork was not locked and the bike wasn’t chained down, enabling the thief to easily carry the Hodaka away.

"The major contributor to the ending of the incident was the Guard was on and making rounds" reported Walt Hanef.

He continued "This shows the Guards are not "Blue Meanies" but protectors of school and Personal Property! But, the burden of securing personal property belongs with the individual owning the property!"

Graduation Notes

Candidates for graduation may apply for graduation by December 1st. If accepted, the graduate’s diploma/certificate will be mailed at a date subsequent to that established for particular ceremony. There will be three graduation ceremonies each calendar year during April, August and December for those students who have met all of their requirements for graduation. Students completing requirements in mid-term may participate in the ceremony following.

E&F FACULTY ADDS THREE

By VAUGHN LANK

Dr. Daniel Saik, Dean of the College of Aeronautical Studies at ERAU has announced three replacement faculty appointments for the Spring term.

Myron Zartell is an Assistant Professor of Administration. Professor Zartell, retired from TIT where he was Administrative Assistant, has been the Data Equipment Systems Division in Toronto. He holds a Masters Degree in Business Administration from Fairleigh Dickinson College and a Master of Science in Public Administration from the University of Western Ontario. Professor Zartell has been a member of the American Management Association since 1972. He and his wife Eleanor reside in Ormond Beach.

Bruce Chadbourne, former President and General Manager of the B-70 Railway Co., is an Assistant Professor in Aviation Management. He has a Masters Degree from Stetson University. He and his wife Bila Mae and three children live in Ormond Beach.

Richard Emley, Assistant Professor of Aeronautical Sciences, is a retired Army Lt. Col. He holds a Master of Science in Aerospace Operations Management from the University of Southern California. Professor Emley and his wife Donna live in Fort Orange. ERAU currently has 95 full-time faculty members.

By Virgil Kassal

Ever since E&R first started in 1926, the school has been under a series of steps in growing. Today, E&F has grown from a hanger in Miami to an expanding campus here in Daytona.

Last night, the architect came up with the blueprints for the new student center but ran into a problem when the GSA and Dean of Students disagreed as to the location of the new building. Although there was no agreement, the student center will be built on a site in a direct line from the academic complex and the dormitory.

This will help make the student center an asset to the campus as it will provide a place for students to relax and socialize.

ER &A Sail Plane

By VAUGHN LANK

ERAU recently acquired an RF-12 sailplane. Mr. Jack Johnson, President of the ERAU Parent’s Association and Manager of Flying for Eastern Airlines, located the sailplane and arranged for it’s transfer to the University. The sailplane, known as the "Lark," was donated by Mr. John R. Loveless, a Captain for Eastern Airlines. Captain Loveless gave the sailplane as a gift to the University, complete with a specially built enclosed trailer. Mr. Russ Strine, a student at ERAU, towed the trailer and sailplane by car from Stanford, Conn., during the holiday break.

The Division of Maintenance Technology at ERAU intends to use the sailplane as a student project. Students in the Airframe and Powerplant curricula will inspect, assemble, and repair necessary components to restore the craft’s airworthiness. The sailplane is expected to fly in the very near future. Plans are already underway to form an ERAU Soaring Club.

April Grad Meeting Today

11:00 A 108

Almost Nabs Three

"Blue Meanies"

This well needed center will house many of the needs of students plus a little extra. Some of the facilities and offices in the center are: Placement, Career Center, Inceptions, Guidance, GSA, Student Publications, Quiet Room (Court Room), Game Room, student and faculty dining services. This dining facility can accommodate the entire student body, faculty and administration members for lunch. The total area of the dining hall is 1000 sq. ft. Concessions will include a post office with 2400 boxes, a barber shop, book store and used book store.

Under consideration is to build a Student Union and if possible, something resembling a Playhouse. Another aspect put out by the planning committee is to have a portable dance floor in the dining area for use by fraternities, clubs or any social function.
President’s Corner

LETTERS TO THE AVION

Preumably, the intent of the back page of the Jan. 19th issue of the AVION was to promote student participation through written contributions to the student newspaper. We hope this carrier the intention of the avion in using in preparation of this advertisement the foolishly disguised picture of an international religious leader. In our view, this advertisement is offensive in nature and the point of journalistic taste.

Julie A. King

(wife of a SRA student)

M. King,

You are correct in saying that the SGA is a testing ground for students who may wish to participate in the administration of the campus environment by submitting suggestions to the SGA for the attention of your representatives.

It is interesting to note that the Student Government representative will be participating in all of the above mentioned plans. At no time were student opinions left out when any of the major decisions were made.

SUGGESTIONS: Regarding what some people write about SGA election results are always important. It is a respectable position to be held by any member of the SGA and the student body in general. I believe that the SGA members have great interest in who their representatives are. It is a challenge, to say the least, to be a member of an organization that is given so much respect and say-so in the growth of the University. Elections will take place Jan. 31.

Richard A. beet
President SGA

THE AVION reserves the right to edit letters as we see fit in accordance with good journalistic practice. All letters must be signed, although names will be withheld upon request from the writer.
National Blood Drive

BY VAUGHN LANE

ERAU will kick-off a Red Cross sponsored national college blood drive Feb. 15th and 16th. The blood drive will receive national coverage on various radio stations across the country. Anyone who donates blood will assure all the blood needed for one year anywhere in the U.S. for the donor, spouse, their children, parents, and grandparents. The Florida Chapter of the Red Cross supports a number of Florida hospitals including three V.A. hospitals. Regular donors who have given one gallon of blood have a life time Red Cross blood coverage. There is no charge made to recipients of Red Cross Blood.

All blood contributions are used. Whole blood less than 21 days old is used in surgical operations. Blood unused in 21 days is processed to obtain blood derivatives for preservative medicine against measles, infectious hepatitis, victims of hemophilia, and other uses. It takes less than one hour to give blood including the enjoyment of free refreshments afterwards.

Blood Drive Rules

BY JIM BARE

The Navy Recruiting Team will be on campus the week of Feb. 14. They will be in the Student Center on Feb. 15. An information table is set up in the Student Center.

The representative of Good Humor Corporation will be on campus on Feb. 28, 1973. They have summer employment opportunities for college students. If you desire additional information or if you want to arrange an appointment, please stop by the Placement Office.

Many students new to ERAU have already found their way to the Placement Office, which is located near the rear entrance of the Administration Building. If you need part-time employment, perhaps we can be of assistance. The Employment Office will be open around 3 p.m., beer, hotdogs, and hamburgers will be served behind door 1.

The second barbecue will be sponsored by the Student Senate and will occur on campus. The Student Senate will be hosting the 1973 Valentine Dance on February 14th. The Valentine Dance will be on campus and will occur at 8 p.m. There will be a special edition of ERAU Social Functions.

In order to get some school spirit the scheduled barbecues this trimester will begin at the baseball field across the street from the Administration Building. Saturday, Feb. 14th, there will be a game between ERAU and St. Johns. Beer will be served at the field beginning at 12:30 p.m. and when there are around 20 people, beer, hotdogs, and hamburgers will be served behind door 1.

The second barbecue will be sponsored by the Student Senate and will occur on campus. The Student Senate will be hosting the 1973 Valentine Dance on February 14th. The Valentine Dance will be on campus and will occur at 8 p.m. There will be a special edition of ERAU Social Functions.

NATIONAL BLOOD DRIVE

There is an opening on the Student Court for a Justice. Interested persons should have two trimesters remaining, including spring-termin. We are responsible to the Student Senate and interested in working to improve present administration. Applicants submit name to Chief Justice, Jim Bare, ERAU Box 621, not later than Feb. 1, 1973.

With the beginning of the Trimester Student Court will convene at 6 p.m. on Tuesday evenings to hear traffic cases, special hours will be announced on other sessions. Spectators are invited, but try to be a spectator only.

ERAU Social Functions

Our Valentine's Day Dance will be on Feb. 27. It will be a rock and roll band the lead singer is Mr. Cornwall's brain.

WHAT IS WATT IN HI FI

By Ray Di Lorenzo

There seems to be a tremendous amount of mis-conceptions concerning audio equipment these days. For instance, "How many watts?" is 5000 for a good speaker system?" are among such questions often asked. This article will be the first in a series of articles discussing the ins and outs of purchasing stereo equipment. What to look for, what to be aware of, what to listen for, it will cover all this. This is important because the speaker you pick will have a great effect on the amplifier you choose, which will come later.

The most effective method of buying speakers is to simply buy the units you feel sound the best for the money. Portability, size, and looks are like what brand they are. You will find the quality very competitive.

Today's Music / Loggins & Messina

BY RORY DONNELLY

I really didn't think it was possible, but then again, I never thought about it. Kenny Loggins and Jim Messina have released a second album on the Columbia label and it's every bit as good as their first, 'Sittin' In'. As a matter of fact, because of a slightly more mature sound, the new album, titled simply 'Loggins and Messina', may have to be given a slight edge in the quality department. However, it could be considered the second half of a double-disc album if these two albums are released simultaneously. That's how closely related the two albums are.

A lot of people are moving to the mellow lately and it's they who will find the album most appealing. If gentle mellowness can come across intensely, then that's exactly what Jim Messina and Kenny Loggins do. Together with Loggins, they produce some of the most relaxed and emotive music in the industry.

About the only way to adequately review this album is to go over each of the eleven songs individually. They may be adequate in parts, in this case, not good enough. You have simply got to hear this one for yourself. It would be too easy to rave on endlessly about "Thinking of You," "Good Pickin'," "Hole in My Heart," "Lady of My Heart," "Long Tail Cat" and "Angry Eyes," which are the most easy-to-listen-to songs on the album.

These two artists have created a sound that many other popular performers have tried to attain. Their biggest attribute seems to be their naturalness. They sing of everyday things such as friends, whiskey, and women. Music comes from inside, that's obvious, as anyone who has heard them can testify. The feelings that they portray through music can't be pretended.

FRISCH'S

BY DREW KASIDA

If you're one of those people who like to eat hamburgers or don't like to spend a lot of money on a meal, Frisch's Big Boy is a place you should look into.

Frisch's has a hamburger called Big Boy, which resembles that of a Big Mac. This can be ordered separately or as a platter which includes cole slaw or french fries and onion rings. The platter costs $1.20 and is very reasonable. They also have other varieties of hamburgers, if that's what you have in mind.

For a change of pace, Frisch's offers other dinner selections such as fried chicken, a sea food platter, shrimp, spaghetti and steak. The price ranges from $1.20 to $2.25. All the portions are average size and are at reasonable prices. A good item to invest in while eating your meal is to order some onion rings, if your stomach can handle them. I have found them to be one of the best in the area.

If you're not full after your main course, there are desserts very tempting and will finish the job in filling you. They have a variety of pies, cakes and ice cream treats.

Whenever you're beach side near Bel-Air Plaza drop into Frisch's, 3701 S. Atlantic Avenue (one block north of Bel-Air Plaza) and try a meal there. The best opinion is your own.

ERAU SPORTS

ERAU BASKETBALL TEAM

In a fantastic upset the Eagle Basketball team outplayed the Jacksonville University Dolphins at Mainland Jr. High School in what was a great boost for basketball at Embry-Riddle.

For those who missed this exciting game, the lead see-sawed through the first half as both teams were hot as pistols and exchanged baskets for baskets. The first half ended with the score deadlocked at 54 apiece and J.V. knew they were in a ball game.

This is the same Jacksonville team that as freshmen defeated the Plaza State University freshmen 147-71 and reeled off 20 straight wins and led the nation with a 109.9 scoring average.

The Jacksonville winning streak was in jeopardy as the second half started and the Eagles jumped to a 6 point lead.

Jacksonville University then started to get hot and with their 6'10" center Paul Molinaro hitting from inside the game up and from there on it was a hard fought finish with E-R winning the hard fought contest 95-85 as the Eagles started running away with the game in the last two minutes.

On Feb. 5th these teams will have a rematch with an expected crowd of over 10,000 spectators to be the largest crowd to ever see an ERAU Athletic team in action.

The Jacksonville Junior Varsity consists of 4 sophomores, 3 juniors, and 1 freshman.

BY JACK KURIBA

Since 1964, National Championship Air Races has been operated as the world's fastest motor sport. Once again, the pilot is a hero but this time he's fast. The pilot climbs into a Bearcat and in less than 30 seconds hits the straw section at 400 miles per hour. As in all contests, man races because he wants to, because he feels he has to.

Air racing, like any sport, is a game men play to win. The PRFR General Race Rules are designed to keep the heroes out of the race and increase the safety of the race.

At the Miami Air Races, there were four classes of aircraft: T-6 class, the bi-plane class, the Formula 1 class and the unlimited class. The 76 class consists of very slightly modified aircraft. The object is to keep them as stock as possible. This gives more competition to the race. The T-6 race was a wing-tip-to-wing-tip battle for first place. The sport bi-plane was an air-craft designed for general aviation flying. The enthusiasm in bi-plane competition grew to the point of developing an entirely new class. The race reaches speeds up to 300 miles per hour with, again, very close competition.

The two classes that are strictly built for racing, are the Formula 1 and unlimited classes. In the formula 1 class, the aircraft must weigh at least 300 pounds and use a continental 0-200 unmodified engine. The race turns out to be a sweat-drawing, wing-touching event, with the crowd in an uproar. Of course, the unlimited race is the most fascinating event. There are no limitations, except for the aircraft.

Hoover pacing the pack for the start, they dove into the number 1 pylons. As Hoover pulls away, the race began. Lyle Shelton and his Bearcat grabbed an early lead, and held it throughout the race. With speeds over 400 miles per hour over an eight mile course, the unlimited class proved that the piston engine is far from extinction.

The races themselves made up only part of the show. Between races, that it has to use a piston engine. With Bob

we're various fly-bys, stunt flying, parachute jumps, and plenty of hot air from the speaker. The Flying Piers really did a fantastic wing walking routine. Believe it or not, Mrs. Pierce did the wing walking! Of course, Mary Gaffaney was there. You know, the Women's World Champion in stunt flying, who does snap rolls faster than you can blink your eyes?

The most impressive events in the show were 747 and DC-10 fly-bys.

We've got to stop meeting like this.

BY JAMES HUNTER

Intramural Softball Meeting

BY JAMES HUNTER

Last year the ERAU Intramural Softball League consisted of 8 different teams and the season lasted all the way up to final exams. This year, despite the amount of teams are expected to be organized, so Mr. Wurtzbach has decided softball league should be organized earlier this trimester.

Anyone interested in organizing a softball team should elect a team captain by next week. The Captains will have their first meeting Monday, Feb. 6 at 7 P.M. in room 106 building A.

Last year the broken bats took the Softball Championship, but this year it looks as though Delta Chi will be the team to beat!
Sky King Revisited

Until two months ago Sky King was only a memory, an action series that had died off more than a decade past. Kirby Grant, Sky King himself, plans on a return to the blue yonder and the soaring heights in a return engagement of one of the first TV airshows.

Still, problems such as finding a sponsor have to be ironed out, but as today’s TV shows lack much of enjoyable action I feel assured of the return of the new Sky King series. The shows will be Air and Space oriented, with ERAU as a working base, being close to Kennedy Space Center which is likely to be used in the series.

The new Sky King series is apt to arouse the interest in flying among TV viewers of all ages.

Sky King, once again, will bring exciting action and lots of pleasure to his friends.
