The Maintenance Technology Division has announced its sponsorship of the 1969 Annual Southeastern Regional Graduate Aircraft Maintenance Seminar. The seminar will be held March 7 and 8 at the Willman Aviation Hangar (nearby ERAU divisions).

The purpose of the seminar is two-fold. Those in attendance will receive first-hand information about the latest developments and repair techniques from leading aviation manufacturers and educators. The seminar is designed to inform and avoid interest in Embry Riddle Aeronautical University from the manufacturers.

A agenda for the seminar is as follows:

Wednesday-March 7
9:00-9:50 am  Registration and wel- come
10:00-10:45 am  Keynote address and presentation: Art Holland.
11:00-11:45 am  Champion Spark Plug Company: W. B. McConnells.
1:30-2:30 pm  Bendix Energy Control Divisionuels: R. Holmested.
3:00-3:50 pm  Austin Supply Corporation - Management Principles: Tom Rhoades.
4:00-7:00 pm  Break - Tour of ERAU and GAAO Safety Tours.
11:00-12:00 pm  Federal Aviation Administration Safety Meeting and Inspection Authorization Renewal: Jim Clark.
Thursday-March 8
9:00-9:50 am  National Aviation Trades Association: Harold Englebren and Smith.
10:00-10:50 am  The Aviation Maintenance Technicians Past, Present, and Future: Chairman of Maintenance Technology Division at ERAU.
11:00-11:50 am  Dr. W. J. Johnson, President of ERAU.
12:00-1:30 pm  Lunch.
1:30-2:30 pm  Avco Lycoming Company: Electrical Components: Jim McManus.
2:30-3:30 pm  Shell Oil Company: Herb Poitras.
3:30-4:30 pm  Federal Aviation Administration Safety Tours: Jim Clark.
4:00-8:30 pm  Of interest to our local airframe and powerplant students is the contest which began Wednesday, February 28. Students are competing in various skill areas and the best will be judged the last day of the seminar. Several companies, such as Aircraft Research, Inc., will be providing aid and assistance to visitors during the seminar.

April Graduation Information

Graduation is just around the corner. If you are a graduating senior and have not started getting ready, you are late. As most everyone knows, the graduation/commencement ceremony will be at 9:00 am, Saturday, April 21, 1973, at the Peabody Auditorium. A reception for the graduates, their families, and the students and faculty will follow the ceremony.

Information from Dean Mansfield's office tells us that all graduating seniors must be at the auditorium no later than 8:00 am for marshaling. The faculty will march at 8:30 and the Platform group will include the Board of Directors, Board of Trustees, Officers of the University, and the graduates. The procession will be at 8:45. All guests must be seated by 9:00 am.

The Honors Committee has selected two distinguished people to receive honorary doctorate degrees at the ceremony. One of the recipients will be the guest speaker, Dr. W. J. Johnson, President of ERAU.

New Degree Program

Dr. Daniel Sain has announced the addition of the Aeronautical Studies Degree Program to the ERAU curriculum. The Office is the result of the new program is to provide more depth and skill sufficient for one of several areas of specialization in the aviation industry. A student may earn the Bachelor of Science Degree in Aeronautical Studies with a degree emphasis in Flight Technology - Management, Maintenance Technology, Aeronautical Engineering, or Reserve Officers Training Corps.

The Aeronautical Studies curriculum closely parallels and exists as an Aeronautical Science program except the student has a variety of options available in which to concentrate his study.

Though the new program combines general education with special area-related subjects, there is an increased flexibility now available to the student of offering an excellent opportunity for preparation for 4-year bachelor's degree programs in various fields. The new degree permits the student to meet all education credits, or other degree requirements, with 1 year of graduate work.

The new degree program is now available for students who have completed at least 2 years of study and wish to complete the degree requirements in 1 additional year. However, students may enter the program at any time and work toward the degree at their own pace.

Noise, Legs, and Alcohol

The Southeastern Regional Graduate Aircraft Maintenance Seminar was held in August at the Nashville GAC, to be in attendance. Gasaway has been assisting Poster and Searls in setting up the Embry-Riddle Seminar. He has run over 20 of these seminars in Nashville, and his advice has been invaluable.

All aircraft certified locations and all pilots in Florida have been invited to attend as well as airframe and powerplant technicians. Although the seminar is directed primarily at airframe and powerplant technicians, any Embry-Riddle student or faculty member is invited. At this writing, 300 people are expected to attend.

This is the first of what is to be an annual affair, and the more support the Maintenance Technology Division receives from the student body, the more successful the seminar will be.

Elective Credits Given For Varsity Sports

Though PE 221 has been dropped as a degree requirement by recommendation of the Academic Standards Committee, beginning September 1973, students may receive elective credit for participation in varsity and intramural sports.

In varsity sports, such as soccer, tennis, golf, and softball, all credit per trimester will be awarded. The same sport may be repeated toward a maximum of 2 credits.

Participates in intramural sports, such as flag football, volleyball, softball, and basketball will also receive credits.

Credit will not be given for other intramural sport, and a maximum of 1 credit per trimester will be awarded.

Former military training will no longer be counted as physical education credits, but physical fitness, transfer credits, will be acceptable.

though the 1973 graduating class found a good dance, convened upon the Inverness Inn last Saturday night.

The Cinderblock's third appearance at an SAA function was their grand finale, and while the band members did not separate their separate ways, their name and style will continue with Jim McClure leadership.

If you attended the dance, you might have noticed that several door prizes were given away. The SAA gave away 2 bottles of wine and 1 bottle of hard liquor. Delta Chi also gave away 8 packs of hard liquor worth $20.

One highlight of the evening was the appearance of well equipped band. Some of the more aggressive members of the audience tried checking the authenticity of these legendary measurements.

The late partiers voted themselves the largest surprise of the party: one extra hour of music for $100.

Gaseaway, Chief of the Nashville GAC, will be in attendance. Gaseaway has been assisting Poster and Searls in setting up the Embry-Riddle Seminar. He has run over 20 of these seminars in Nashville, and his advice has been invaluable.

All aircraft certificated locations and all pilots in Florida have been invited to attend as well as airframe and powerplant technicians. Although the seminar is directed primarily at airframe and powerplant technicians, any Embry-Riddle student or faculty member in invited. At this writing, 300 people are expected to attend.

This is the first of what is to be an annual affair, and the more support the Maintenance Technology Division receives from the student body, the more successful the seminar will be.
THE SGA PRESIDENT’S CORNER

Letters to the Avion

For motorcycle fans, "the World's Fastest Motorcycle" was somewhat of a letdown. However, the word doesn't seem to get around.

The idea of starting something which would awaken interest in my fellow students.

I have, therefore, organized the weekly presentation of aviation-oriented movies.

Some of the films have been taken from technical areas, such as "E=mc^2 Research Project," and was of interest to future engineering students.

If you have conflicts with school hours, please let me know the hours, when you could attend.

The AVION reserves the right to edit letters. As we receive a volume of letters, we may not be able to print all. Any letter may be edited in accordance with good taste. Accuracy of facts and. letters must be signed, although names will be withheld upon request from the author.

NEWS AND VIEWS FROM THE EDITORS DESK

Once again last weekend, the SGA flew another flight to Nicaragua. This was the last flight which Embassy-Riddle will undertake to Nicaragua. Randy Winters was in charge of organizing it and if you see him, he’ll tell you that it was "most successful."

One of our former staff members and an ERAU Alumnus, Steve Scofield, received a Zonia Scholarship for the amount of $300. Congratulations, Melonee.

The Eagles have yet to win a baseball game, not solely because of a bawler, but also on something called "school spirit." Attendance at games quite possibly diminished the mistakes-filled ball game, as only a handful made it out to support the Eagles, in spite of the outcome. For those fans who might have helped ease the pain.

School spirit around campus is absolutely nil. It is just for baseball but for all the other sports we play. Not a single student is proud of their athletic abilities. Why can’t we win? It seems as if the only way we will get good attendance at our games is if we give away some Riddle Blood (beer).

In approximately two weeks we will publish all the course curriculums which are pertaining many a student. It should answer all the questions being asked around campus.

Drew Kassal
Editor, AVION

Social Function: You haven’t tried anything until another night of self "blitzed,” standing alongside a platinum blonde, French, and 44-24-36; and the champagne. To those of you who attended the dance Saturday night at the Desert Inn, I am sure you enjoyed it as I did. "Rabette is real!"

Baseball Tournament: In reference to an article in the SGA in two weeks ago, the university has come up with 50 percent of the money needed to conduct the ERAU Invitational Baseball Tournament. The amount was $210. This week, the SGA will present Doctor Brown with a check representing its part of the agreement.

The baseball tournament is scheduled for March 15 and 16. The sixth falls on a Friday, when ERAU will be playing a game that afternoon to conclude the tournament. Game time is 2 p.m.

It was unanimously decided at the Executive Board meeting today to throw and maintain the monthly social function on Friday, March 16, around 7 p.m. in conjunction with the ball game. We are thinking along the lines of a fish fry, located near the baseball field.

The date and time for the event are not completely finalized, so make sure to watch for the advertisements.

Ring Sales: The ring sales are going tremendous. We have received three more samples to present to the students, and expect more in the near future. Ring sales are daily between 9 am and 3 pm at the SGA office.

Life on ERAU’s campus has been criticized by many. “It’s the administration’s fault,” seems to be the commonly used phrase, “It’s the admin’s fault.”

In reality, it is we who are responsible. Lack of interest among us is also true of "disease." Why should we feel this is true, I tried to start something which would awaken interest in my fellow students.

I have, therefore, organized the weekly presentation of aviation-oriented movies.

Some of the films have been taken from technical areas, such as "E=mc^2 Research Project," and was of interest to future engineering students.

If you have conflicts with school hours, please let me know the hours, when you could attend.

Tejinder Singh
ER Box #44

The opinions expressed in this paper are not necessarily those of the university or all members of the student body. Letters appearing in the AVION necessarily reflect the opinion of the writer and not the AVION, its staff, or the university.

*Note on the Editor’s Desk*

The finances committee which is responsible for accounting for the way the student activity funds are disbursed, the Internal Affairs Committee which is responsible for conducting activities on campus, the Social Functions Committee which conducts four times each trimester dances and barbecues, and REM which is responsible for anything that may affect teaching, education, or welfare of the students.

If you have a concern for what is happening, we need to see that almost everything that a student does on this campus is regulated by the student committees. The problem is that at the second senate meeting of this trimester, the newly elected senators, as well as the old senators, that they had their choice to express their views to the SGA legislature which they would like to work with. Only about 30 percent have done so.

A Note from the President

Dear student body: Please influence the nan you voted for to become active. Save some time and energy for the weight and beginning to get heavy to carry.

I don’t mean to alarm anybody, it is not all as fun as we would like it to be, the teachers, the students, the administrators, the students, the students, and the students, the students, and the students.

The only real problem with that is that they must try to work on fulfilling the requests of their regular duties to take care of the demands of someone helping out daily basis.

As of this afternoon, we will have assigned everybody by name, "like it or not," to a committee and we hope that this article will lend them in the proper direction so that they can get started on things that need to be done.

A Message from the Executive Board

Dear missing senators: When are you going to start representing the students? Nobody thinks that there is enough work to go around, they are sadly mistaken.

Richard F. Rummel
President, SGA

FROM THE MAILBOX

The term "bling" comes from the following:

- "bling" (ing or ridding) Hug, Observe, etc.
- "bling" (ing or ridding) Hug, Observe, up to 100 mph, with no internal supports, over 100’ with internal supports, etc., and/or dirigible.

HUMOR W + Luigi “bling”
Dorm 1 Snackbar Opening Soon

by G. Radin

According to Edward Gervase, Director Auxiliary Service, the newly built snack bar recreation hall behind Dorm 1 will be opening soon. The decision to build a snack bar was made last year, after many students complained about the problem of getting decent meals.

Last November marked the start of work on the building. The set date of operation was to be the 9th of January, unfortunately the work slowed down, making it impossible to keep this deadline.

A new date was estimated, without much action following. Gervase explained that the contractor had given him the information that the problem was with the sub-contractors, who seemed to be unavailable at the moment to finish the building.

Major and minor changes, such as finishing the floor, changing electrical connections, and cleaning the building, had to be made.

The food served and prepared will be supplied by Sands, who also will run the snackbar. For the early risers, breakfast will be served shortly after six. The menu consists of a variety of foods including eggs, bacon, and toast for breakfast; hamburgers of your choice and hot sandwiches for lunch, grilled food for dinner, plus many different types of refreshments, all at moderate costs.

John Foster, Director of Housing, explained that there will be entertainment provided by various types of amusement machines, such as pinball games, pool tables, football games, a jukebox for music, and electric games like "The Red Baron," "Stunt Pilot," "Sea Devils," and "Sonic Flight.

The different types of machines to be installed were requested by members of the student dorm council.

The exact time of operation, including the opening and closing time for the building has not yet been set. The first month of operation will be a test, to see how it will function in areas of both time and money.

Board of Visitors Gives Awards

The Embry-Riddle Aeronautical University's Board of Visitors held a luncheon meeting on Thursday, February 22nd at the Winter House. Representatives of the Student Government Association as well as key staff members of the university attended as special guests.

Overprors on the agenda was the presentation of special awards by the Austin O. Combs to Gilbert H. Chambers and James L. Schott, for their active participation during the past year in events and functions related to Embry-Riddle.

The Board of Visitors is a group of forty leaders in the local community and its purpose is to promote Embry-Riddle's growth for the general prosperity of the community and social and academic enrichment of the student body.

There is no truth to the rumor that the EPA's Black Smoke Test will be conducted by a national noise pollution committee.

THINGS TO DO

MOVIES

Big Tree: "Travels with My Aunt" probably will be held over, although the theater has scheduled "Gomes Schoolgirls Go Playboy" (R) to start Friday.

Cinema: "Arantli" scheduled to begin last Friday lost out to the hold over, "The Arabian Adventure." Maybe it will make it this time.

Daytona: "Cabaret" is scheduled to begin Friday. If you did not see this one last year, now is your chance. Lisa Minnelli and Joel Gray, both nominated for Oscars, are fantastic. The movie itself is up for the best picture award. My prediction is that both Lisa and Joel will win, but the picture will be snubbed out by "The Godfather.

Halifax: "Shamus," starring Burt Reynolds and Ryan Cannon, is the story of a pool-shooting card-playing, broad-chasing private eye. (PG)

Jerry Lewis Cinema: "Daisy's "Secknose" and "Broomsticks" stars Angela Lansbury as a delightful witch. (G)

Masona 1: Holding over "Trick Baby." (B)

Masona 2: "Private Parts." (R)

RUSSIAN TRIP

According to E-RAD President, E-RAD Russian trip is being organized for June and July 1973.

The seminar, "Soviet Life and Economy," will carry 6 units. Dr. Sain assisted by Jack Hunt, through the USSR, visiting factories, industries, universities, and space oriented museums and other cultural oriented points of interest.

The trip to Russia will start in New York, where travel in tourist class is provided by either Pan Am or Sab. First Class hotel accommodations including 3 meals a day are in the seminar cost of under one thousand dollars.

The set date of departure is the 25th of June and return from the USSR is to be in mid July. This trip is worth 6 credits.

All students interested please contact Miss Green in the Administration Building as soon as possible.

On Thwarting Thievtry

by Don Burke

With the Daytona Motorcycle Squad due in town around the corner, it's time to consider the possibility of having the iron horse ripped off.

The expected influx of bikers from everywhere will certainly attract the group that wish they were bikers, but are not, with bolt cutters, torches, jackes, big hammers and any other device employed by the International Brotherhood of Motorcycle Rip Off Artists.

The Daytona Police tell me there are generally two kinds of folks who will have designs on your poor, hurt possessed horses:

The Joyrider,

Age 7 to 35. Beady eyes. Drools a lot. Sees your bike, gets his eyes drooling, then dumps your scooter in a sand pit and carefully wiping off the fingerprints.

The Capitalist,

Any age. Cool and calculating. Black felt cap. Hangs around Main Street. Can be identified by wholesale parts catalogue protruding from his pocket. This guy is really dangerous. He's not just out to get your bike out of the state as quick as he can. He deals in, say, one piece, or in parts. Preferably a Harley, Triumph, Norton, or anything with a "chopability" factor. Buy Low, Sell High, make a fortune. He's pretty weird, he generally has a nervous eye. Hangs around bike meets. Method also employed by the "International Brotherhood of Motorcycle Rip Off Artists."

The expected influx of bikers from everywhere will certainly attract the group that wish they were bikers, but are not, with bolt cutters, torches, jackes, big hammers and any other device employed by the International Brotherhood of Motorcycle Rip Off Artists.

The Daytona Police tell me there are generally two kinds of folks who will have designs on your poor, hurt possessed horses:

1. Sell your bike immediately, without looking. If you do not, it will be taken from you.

2. Never get off your bike. Method also effective, but extremely tiring.

3. Hide it under your bed. This is fine for astronauts and line workers.

4. Handcuff yourself to it. Method works fine, if you're a mean and nasty type, but if some dude in convinced that it's his your scooter and somehow he can't live without, you're liable to lose it halfway through the process.

5. Throw it up into the air. This is effective only for short periods of time. Also, only works for extremely hefty bikers.

Perhaps the best method, though, to assure some degree of time being paranoid about it, You keep hearing about the "watched pot..."
The Mothers Are Coming

by Sid Pines

For March 4th, Frank Sappa and the Mothers of Invention will be in concert at Peabody Auditorium here in Daytona Beach. Sappa, who has a doctorate in music, is also the producer/director of the controversial film, "200 Motels." Mose Jones is also featured on the billings.

Two shows are scheduled for 3 and 8 pm. Tickets are $5.50, advance sale only. Outlets are: Walk-Lindsey in Delray Beach, Venture 1, and both book 'n Tapework locations.

Space Coast Music of Titusville, who sponsors this concert, hopes to mobilize several more top groups in the coming months.

UPCOMING CONCERTS

by Scott Marcella

On March 16th at 6:30 sharp, the doors of the C.W.I. Coliseum will open to the "Ultimate Rock Concert," featuring Savory Brown, Al Kooper, Spooky Tooth, Rory Gallagher, and Andy Brown.

This is the first time that four groups will appear on the same program at Jacksonville Coliseum. Tickets are $5.00 each in advance, and $6.00 at the door. Future concerts at Jacksonville will be: Alice Cooper, April 22; Led Zeppelin, May 7; Deep Purple and Billy Preston, May 19.

An Interview With Art Grumble

by Joshua Boodle

"I would like to extend our vote of thanks to all those who donated their time to last week's blood drive. You have given a great gift and all blood should feel very proud. Of course, since thousands of people are still in need of a transfusion, all you donors will find in your mailboxes a note charging $20 against your account for the privilege of giving your blood. Keep up the good work, sports.

At our last SGA meeting, it was decided to have all future social activities sponsored and run by the USA. I am sure this will be to our advantage.

I am proposing a referendum to your SGA to provide free tuition, free books, free food, and buses, and an unlimited expense account for all veterans attending ERAU. Please fill in the following ballot and turn it in to the SGA office as soon as possible.

MY VOTE FOR THESE BENEFITS IS:

Yes. Yes

I wish to thank all you good Americans who voted "Yes", and want to tell all you devoted connie perverts who did not vote "Yes" that we don't need you here.

The Last Race

By C. W.

I thought East Texas was another tough demolition derby as I could drive, but I had no idea these Southern drivers were this fanatic.

I threw my old Ford in reverse and caught a driver napping, ramming his radiator back through his water pump. While I was finishing his off, an old clipped me in the side, but I floored it to the wall and shot across the field and slammed into a Dodge van, pinning his front against his front tire.

So far, I was lucky, remaining unscathed as I weaved between the rows of stalled, fried, destroyed cars. However, I had let my guard down, allowing a guy to get through my blind spot and knock my front suspension into several pieces of twisted metal. I was through for this meet, but I realized I would do better tomorrow. I opened the door, gathered my books, and ran across the Academy Complex parking lot to make my next class.

Coast Guard And Marine Corps Recruiting Programs

The U.S. Coast Guard and the Marine Corps have recently notified the Placement Office of openings which Embry-Riddle graduates are eligible for.

The Coast Guard is recruiting A P Students who are FAA certified either in Airframe, Powerplant, or both. Those recruits with prior military service will be enlisted with Aviation Structural Mechanic Third Class or Aviation Machinist Third Class. Recruits without prior military service will be enlisted as Seaman Recruits and, upon completion of a ten-week training course, promoted to Third Class. All persons who have applied will be assigned to a Coast Guard Air Station and will be members of a flight crew.

The Marine Corps currently has positions for four men who are interested in becoming Marine flight mechanics and will be able to attend training by 16 June. In addition, the Marine Corps has need for students who are interested in aviation maintenance and will be able to attend training by 16 June. Both programs are designed to recruit and train students and are open to both men and women.

Fred Hamilton

Economics professor Fred Hamilton, an active member of the ERAU parh, will be discussing sport jumping just for the fun of it. After his first jump, he enjoyed this sport so much that he now has completed 108 jumps. Just last Christmas break, Professor Hamilton became a certified instructor, and he now has taught a class of twenty-three and a half students. One of these students, John Riddle, is a marine who is considering joining the Air Force in the future. However, he has not yet decided on his plans.

Vets Club

Toya Party, Friday, March 2 at 8:00 pm in President's Club House 713 Be AIA, Orlando.

Isla Vista, where the water is clear.

Overhead is “luking on the Itchuckie”.

This too is a summer study for Hamilton’s class, but the students will be flown to the head of the Itchuckie River and, they will explore an inner tube. The river is about 15 miles long and is clear and cool. It is a perfect day for a leisurely ride.

Winters Report:

More women are turning to private aviation, as FAA study reveals. Of the 32,919 women actively engaged in all phases of aviation, about 29,000 hold pilot certificates, an increase of three times more than ten years ago. Of these, 22,902 are pilots, and the most women pilots with 2,042, Texas is second.

Cooperative Education At ERAU

Cooperative Education is a competitive program at Embry-Riddle. The second year of each three-year class is currently being offered to seniors as a training assignment. By consequence, many students are taking advantage of this unique opportunity to learn and work with people, develop professional contacts and apply the theoretical knowledge from classroom studies to practical work experience.

What can you do, as a student, to become a Cooperative Education participant? First, learn about the program, see if you qualify and determine if Cooperative Education is really for you. It will not meet the needs of all students, so you have to evaluate the pros and cons of the program. Once you have made the decision to become a Co-op student, you are obligated to remain in the program until you graduate.

Who qualifies to become a Cooperative Education student? You have completed at least one full-time term at Embry-Riddle, if you are not on probation, and if you have sufficient credits to be classified as a sophomore or higher. You may apply for the program. Ideally, the first training assignment would fall in the first trimester of your junior year. The next off-campus training assignment begins on or about May 1, and continues throughout the month of August. Your second work period would then begin in the same rotation scheme.

Baseball This Week For Our Eagles Team

Four Losses

by Mike Talman

With their first four regular season games over, the Delta Chi soft-ball team have yet to register their first victory.

Thus, the Eagles have played Bethune Cookman, the University of South Florida and a double header with Florida Technological University.

The home opener last Thursday against Bethune Cookman turned into a 12 inning marathon. Bethune Cookman led all the way into the ninth inning by a score of 2 to 1. Then, in the bottom of the ninth inning, Gary Haught hit a double. Bernie Callahan executed a perfect squeeze play, bringing Haught home and sending the game into extra innings.

Both the Eagles and Bethune Cookman scored one run in the thirteenth inning.

In the top of the fourteenth, Bethune Cookman exploded for four runs. The Eagles came back with one run in the bottom of the inning, but couldn’t hold off the big Bethune Cookman lead. Final score: 7 to 4.

Saturday, the Eagles played their second and third games of the season in a double header against Florida Technological University.

Because it was a double header, the games were only seven innings each.

The Eagles lost the first game of the twin bill 5 to 4, after a last inning two-run surge that fell short of the win.

The second game turned into an embarrassing 11 to 0 loss for the Eagles. FNU made a marathon of their turn at bat in the fourth inning. Sixteen men came to bat, scoring all eleven of their runs on eight hits, five walks and three errors.

On Monday, the Eagles traveled to the Tampa campus of the University of South Florida. The Eagles were the first to score, knocking in four runs in the third inning, but USF took advantage of Eagle’s pitching problems, getting three runs each in the fourth and fifth innings, and six more in the seventh inning. The Eagles managed two more runs in the eighth inning, but went down to their fourth defeat of the still young season, 12 to 6.

Game 1

Bethune Cookman 13 7 2
ERAU 11 4 2

Game 2

FTU 4 5 0
ERAU 3 4 2

Game 3

FTU 12 11 4
ERAU 3 1 4

Game 4

USF 9 12 3
ERAU 10 6 1

Baseball, Intramural Style

The intramural softball season opened this past Sunday with perfect weather. The long-awaited season started off with the big bats of number one spraying hits all over the field. Number One’s fielding was flawless, except for the performance of their first-string shortstop, who committed three errors in the first inning, it looked as though we were about to witness a new man in which to play softball. Errors, erratic base running, and missed flies were the story for the first few innings. Then the players started to get it all together. It looked as though the game would go into extra innings, with the score tied 7 all in the beginning of the 7th inning. In this inning, however, Lambda Chi started off scoring 4 runs, followed by 3 Sigma Chi runs. Thus, the final score was 11 to 10, Lambda Chi’s game.

Sigma Chi vs. Lambda Chi

This was by far the most exciting game of the day, as these two fraternities were never more than two runs ahead of one another. In the first inning, it looked as though we were about to witness a new man in which to play softball. Errors, erratic base running, and missed flies were the story for the first few innings. Then the players started to get it all together. It looked as though the game would go into extra innings, with the score tied 7 all in the beginning of the 7th inning. In this inning, however, Lambda Chi started off scoring 4 runs, followed by 3 Sigma Chi runs. Thus, the final score was 11 to 10, Lambda Chi’s game.

Adventures of the Black And Blue Baron

by Terry Gardner

Theodore J. Throttlebottle was about to pursue his next adventure. The world's greatest aviator (as far as one observer, the time had arrived for another day of chasing death, testing his polished skills and freeing himself from the drudgeries of earth-bound existence.

Typical of most students at the Humpty Dumpty Flying School and Sude Ranch for Boys, Throttlebottle only liked to fly when he was scheduled and didn't like to fly when he was supposed to. "Oh well," he thought to himself while preparing for his next adventure by devouring a bag of peanuts and a warm coke from the ever-dependable vending machines, "my best friend and favorite dispatcher, Tubby, will get me an aircraft." So what if some ego-manic in the observation bunche They would rather sit around, tell war stories, and chew on every window, door, and toilet seat in the place. Caput had just threatened to resign, Tubby's salary was 25¢ per hour and put him on the six an Sunday shift, when old Throttle has to be at the range.

Thinking quickly, he posted a memo from Caput himself: "To Whom It May Concern: No Drinks Allowed", which was posted prominently on every window, door, and toilet seat in the place. Caput had just threatened to resign, Tubby's salary was 25¢ per hour and put him on the six an Sunday shift, when old Throttle has to be at the range.

The coach and players have devoted much time and effort to field a varsity team of viable quality. I know it must be disheartening for them to see so very few people in attendance.

That old school spirit was about as dynamic as an aging land tortoise in heat.

by Art Jacobs

The Montreal Expos can rest their fears; the Embry-Riddle baseball game will not ruin their attendance records this spring!

The school support for our team's season opener against Bethune-Cookman was non-existent, save for twenty hardy students, one girlfriend, two small children, the groundskeeper, and a stray dog.

It was sorely evident that our school spirit was about as dynamic as an aging land tortoise in heat.

by Bill Lewis

Florida residents, this is your last chance,

IF YOU QUALIFY, you may receive up to $1200 per year for the remainder of your undergraduate studies. Of the eight applying last year from ERAU, two grants were awarded.

The paperwork must be fully completed by March 15. Mr. Kasler urges those individuals who are interested to stop by his office as soon as possible.

MONEY TO BE GIVEN AWAY

by Bill Lewis

Florida residents, this is your last chance,

If you qualify, you may receive up to $1200 per year for the remainder of your undergraduate studies. Of the eight applying last year from ERAU, two grants were awarded.

The paperwork must be fully completed by March 15. Mr. Kasler urges those individuals who are interested to stop by his office as soon as possible.

Why not drop in to see if you qualify?
**PEGASUS**

Just cause you ain't never been published in paperback, hung your canvas in the ol' Guggenheim, or had the multitudes acclaim your self-impressionistic sculptures don't mean the pages of Pegasus ain't in need.

The purpose of Pegasus is to collect and publish the diverse and artistic talents of Embry-Riddle students. This annual project is in its third year and striving for improvement. The most important ingredient for such a refinement is your talent. The creative mediums of prose, poetry, painting, sculpture, sketching, and photography are several choices you may select. So share your individual artistic outbursts with us. The existence of Pegasus depends upon collecting those expressions - be they subterranean, esoteric or just plain, simple, straight-shootin' revelations. Plan to contribute to the spring issue of Pegasus.

Let it happen by inquiring in Building A, Rooms 103 or 123.
