The Maintenance Technology Association has announced its sponsorship of the Annual Southeastern Regional Communication, Maintenance & ERADU- 

The purpose of the seminar is to provide a forum for the exchange of ideas and information about the latest developments in both maintenance and repair techniques. The seminar is designed to attract professionals and students interested in the fields of aircraft repair and maintenance.

The Aviation Maintenance and Repair Conference on Thursday, April 30th, will feature presentations on the latest developments in aircraft repair and maintenance technology. The conference will include a keynote address by a leading expert in the field, as well as sessions on specific topics such as engine repair, avionics, and structural integrity.

In addition to the conference, there will be a networking event on Friday, May 1st, where attendees can connect with other professionals in the field and learn about potential job opportunities. The networking event will include a panel discussion on career development and a reception with industry leaders.

The seminar is open to all professionals and students interested in aircraft repair and maintenance. It is expected to be an informative and engaging event, and attendees are encouraged to take advantage of the opportunity to learn about the latest developments in the field.

The seminar will be held at the Nashville Convention Center, located at 505 8th Avenue South, Nashville, TN 37203. For more information, please visit the seminar's official website at [www.aviationseminar.com](http://www.aviationseminar.com).

Funded by Student Body

Placement Tests Change from ACT's to SAT's

Beginning in the summer of 2018, test takers have the option to choose which test to take. The SAT and ACT are both widely accepted and respected as indicators of college readiness. However, the new system offers more flexibility for students and schools.

The SAT is a more traditional test that focuses on reading, writing, and math skills. The ACT, on the other hand, is a more comprehensive test that includes science reasoning. Both tests are used by colleges and universities to evaluate applicants.

Students can use the online tool to compare the two tests and determine which one is better suited for their needs. The tool provides information on the test format, content, and scoring, as well as sample questions and practice tests.

For more information, visit [www.collegeboard.org](http://www.collegeboard.org) for the SAT and [www.act.org](http://www.act.org) for the ACT.

New Degree Program

Dr. Daniel Salo has announced the addition of a B.S. in Aeronautical Science to the EAU curriculum. This degree is designed for students who are interested in the field of aviation and wish to pursue a career in the industry. The program offers courses in aerodynamics, flight dynamics, and aircraft design, as well as opportunities for hands-on experience in the classroom and laboratory.

The curriculum includes courses in aerodynamics, flight dynamics, and aircraft design, as well as opportunities for hands-on experience in the classroom and laboratory. Students will also have the opportunity to participate in research projects and internships with local aviation companies.

For more information, contact Dr. Salo at [daniel.salo@eau.edu](mailto:daniel.salo@eau.edu).
News and Views from the Editors Desk

Once again last weekend, the SGA flew another flight to Nicaragua. This was the last flight which Embry-Riddle will undertake to Nicaragua. Randy Nettles was in charge of organizing it and if you see him, he'll tell you that it was "most successful."

One of our former staff members and an ERAU alumnus, Mel Scoufler, received a Zonia Scholarship for the amount of $300. Congratulations, Melonie. The Eagles have yet to win a baseball game, not solely because of a bad team but also on something called "school spirit" where attendance at games is quite possibly 0% of those who attend the dance Saturday night at the Desert Inn. I am sure you enjoyed it as I did. "Babette is real!"

Baseball Tournament: In reference to an article in the Arizona Republic, the university has come up with 50 percent of the money needed to conduct the ERAU Invitational Baseball Tournament. The amount was $210. This week, the SGA will present Doctor Brown with a check representing its part of the agreement.

The baseball tournament is scheduled for March 15 and 16. The 16th falls on a Friday, when ERAU will be playing a game that afternoon to conclude the tournament. Game will be held at 3:30 PM.

It was unanimously decided at the Executive Board meeting today to hold and throw the monthly social function on Friday, March 16, around 7 PM, in conjunction with the ball game. We are thinking along the lines of a fish fry, located near the baseball field.

The date and time for the event are not completely finalized, so make sure to watch for the advertisements.

Ring Sales: The ring sales are going tremendous. We have received three more samples to look at and are expecting four more in the near future. Ring sales will run daily between 9 am and 3 pm at the SGA office.

Letters to the Avion

Social Functions: You haven't tried anything yet. If you don't, you will have a lot of trouble "blitzed," standing alongside a platinum blond campus fling with 44-24-34 dimensions. To those of you who attended the dance Saturday night at the Desert Inn, I am sure you enjoyed it as I did. "Babette is real!"

Life on ERAU's campus has been criticized by many. "It's the administration's fault," seems to be the commonly used phrase heard dead at all times.

In reality, it is we who are responsible. Lack of interest arises among us in "the disease."

Because I feel this is true, I tried to start something which would awaken interest in my fellow students.

I have, therefore, organized the weekly presentation of aviation-oriented movies. Some of the films have been obtained technically, such as "X-15 Research Project," and was of interest to all those engineering students.

For motorcycle fans, "The World's Fastest Motorcycle" was something of interest. However, the word doesn't seem to get around.

Because of less interest in our aviation oriented future should be worth watching, and so I close this letter with the hope that all those interested in aviation will be looking for Jaws a hour a week will contact me.

If you have conflicts with school hours, please let me know the hours when you could attend.

Dorm 1 Snackbar Opening Soon

by G. Radin

According to Edward Gervase, Director Auxiliary Service, the newly built snackbar recreation hall behind Dorm I will be opening soon. The decision to build a snackbar was made last year, after many students complained about the problem of getting decent meals.

Last November marked the start of work on the building. The set date of operation was to be the 9th of January, unfortunately the work slowed down, making it impossible to keep this deadline.

A new date was estimated, without much action following. Gervase explained that the contractor had given him the information that the problem was with the sub-contractors, who seemed to be unavailable at the moment to finish the building.

Major and minor changes, such as finishing the floors changing the electrical connections, and cleaning the building have to be made.

The food served and prepared will be supplied by Sandra, who also will run the snackbar. For the early risers, breakfast will be served shortly after six. The menu consists of a variety of foods including eggs, bacon, and toast for breakfast; hamburgers of your choice and hot sandwiches for lunch grilled food for dinner, plus many different types of refreshments, all at moderate cost.

John Foster, Director of Housing, explained that there will be entertainment provided by various types of amusement machines, such as pinball games, pool tables, football games, a jukebox for music, and electric games like "The Red Baron," "Stunt Pilot," "Sea Devils," and "Sonic Flight." The different types of machines to be installed were requested by members of the student dorm council.

The exact time of operation, including the opening and closing time for the building has not yet been set. The first month of operation will be a test, to see how it will function in areas of both time and money.

Board of Visitors Gives Awards

The Embry-Riddle Aeronautical University's Board of Visitors held a luncheon meeting on Thursday, February 22nd at the Winter House. Representative of the Student Government Association as well as key staff members of the university attended as special guests.

On the agenda was the presentation of special awards by the Austin O. Comes to Gilbert H. Chambers and James L. Schmitt for their active participation during the past year in events and functions related to ERAU. The Board of Visitors is a group of forty leaders in the local community and its purpose is to promote ERAU's growth for the general prosperity of the community and societal academic enrichment of the student body.

There is no truth to the rumor that the SGA dance weekend night would be tested conducted by a national pollution committee.

THINGS TO DO

Big Tree: "Travels with My Aunt" probably will be held over, although the theater has scheduled "Gamera Schoolgirl's Play" (8) to start Friday.

Cinema: "Arantli" scheduled to begin last Friday lost out to the holdover, "The sildenafil Adventure." Maybe it will make it this time.

Daytona: "Cabinet" is scheduled to begin Friday. If you did not see this one last year, one is your chance. Liza Minnelli and Joel Gray, both nominated for Oscars, are fantastic. The movie itself is up for the best picture award. My prediction is that both Liza and Joel will win, but the picture will be named out by "The Godfather.

Halifax: starring Burt Reynolds and Dyan Cannon is the story of a pool-shooting card-playing, broaching private eye. (PG)

Jerry Lewis Cinema: Disney's "Beckhlo and Mr. Broomsticks" stars Angela Lansbury as a delightful witch. (G)

Masanova #1: Holding over "Trick Baby." (R)

Masanova #2: Ditto "Private Parts." (R)

RUSSIAN

TRIP

According to E-RAU President Howard Hunt, a Russian trip is being organized for June and July 1973.

The seminar, "Soviet Life and Economy," will carry 8 units. Dr. Rain assisted by Jack Hunt, through the USSR, visiting factories, industry establishments, and space oriented museums, as well as key staff members of the university attended as special guests.

The trip to Russia will start in New York, where travel in tourist class is provided by either Pan Am or SAS. First Class hotel accommodations including 3 meals a day are in the seminar cost of under one thousand dollars.

The set date of departure is the 25th of June and guarantee from the USSR is to be in mid July. This trip is worth 6 credits. All students interested please contact Mr. Green in the administration building as soon as possible.

On Thwarting Thievry

by Don Burke

With the Daytona Motorcycle Squad now on the corner, it's time for a return of the "iron horse" to consider the possibility of having a bike ripped off.

The expected influx of bikers from everywhere will certainly attract the ghosts who wish they were bikers, ghosts with bolt cutters, torches, jacks, broad hammers, and any other device employed by the "International Brotherhood of Motorcycle Ripped Off Artistes.

The Daytona Police tell me there are generally two kinds of folks who will have designs on your most prized possession.

The Joyrider

Age 7 to 35. Ready橙s. Drollos a lot. Nothing more than a kick in the form of being thoughtless. When they kick, then dumps your scooter in a sand pit and carefully wiping off the fingerprint.

The Capitalist

Any age. Cool and calculating. Drives flashy cars. Hangs around Main Street. Can be identified by wholesale parts catalogues protruding from his pockets. This guy is really dangerous. He just gets out of your bike out of the state as quick as he can, leaving one piece, or in parts. Prefers Harley, Triumph, Norton, or anything with "Chopper" and high resale value.

There are, however, a few ways to insure your continued status as a scooter freak during and after those upcoming days or crisis:

1. Sell your bike immediately. Method effective, but defeats the purpose.

2. Never get off your bike. Method also effective, but extremely tiring.

3. Hide it under your bed. This is fine for short periods of time.

4. Handcuff yourself to it. Method works fine, if you’re a mean and nasty type, but if some dude is convinced that it’s your prize possession, he can’t live without, you’re liable to lose it and be broke in the process.

5. Throw it up into the air. This is effective only for short periods of time. Also, only for extremely hefty bikers.

Perhaps the best method, though, is to spend your days of being paranoid about it. You can still old saying about the "watched pot..."...
The Mothers Are Coming

by Sid Dines

Saturday, March 4th, Frank Sappa and the Mothers of Invention will be in concert at Peabody Auditorium here in Tambourine, Sappa, who has a doctorate in music, is also the producer/director of the controversial film, "200 Motels." Moss Jones is also featured on the billings.

Two shows are scheduled for 3 and 8 pm. Tickets are $5.50, advance sale only. Outlets are: Walk-Lincoln in Belair Plaza, Venture I, and both book 'n Tapework locations.

Space Coast Music of Titusville who sponsors this concert, hopes to stimulate several more top groups in the coming months.

UPCOMING CONCERTS

by Scott Marcella

On March 14th at 6:30 sharp, the doors of the Avion will open to the "ultimate rock concert," featuring Savory Brown, Al Kooper, Spooky Tooth, Rory Gallagher, and Andy Brown.

It is the first time that four groups will appear on the same program at Jacksonville Coliseum. Tickets are $5.00 each in advance, and $6.00 at the door. Future concerts at Jacksonville will have Mary Cooper, April 22; Led Zeppelin, May 7; Deep Purple and Billy Preston, May 19.

An Interview With Art Grumble

by Joshua Bodine

We would like to extend our vote of thanks to all those who donated to last week's blood drive. You have given a great gift and we should feel very proud. Of course, since the organizations let you feel so proud for nothing, all you donors will find in your mailboxes a note charging $20 against your account for the privilege of giving your blood. Keep up the good work, sports.

At our last SGA meeting, it was decided to have all future social activities spaced apart and run by the USO. I am sure this will be to our advantage.

I am proposing a referendum to your SGA to provide free tuition, free books, and board, and an unlimited expense account for all veterans attending ERAU. Please fill in the following ballot and turn it in to the SGA office as soon as possible.

MY VOTE FOR THOSE BENEFITS IS:

Yes. Yes

I wish to thank all you good Americans who voted "yes," and want to tell all you devoted communist perverts who did not vote "yes" that we don't need you here.

The Last Race

by C. W.

I thought East Islip was a tough demolition derby as I could drive, but I had no idea that Southern drivers were this fanatic.

I threw my old Ford in reverse and caught a driver napping, ramming his radiator back through his water pump. While I was finishing his off, an olds clipped me in the side, but I floored it to the wall and shot across the field and slammed into a Dodge van, pinning his fender against his front tire.

So far, I was lucky, remaining unscathed as I weaved between the rows of stalled, fried, destroyed cars. However, I had let my guard down, allowing a guy to get through my blind spot and knock my front suspension into several pieces of twisted metal. I was through for this meet, but I realized I would do better tomorrow. I opened the hood, got my books, and ran across the Academic Complex parking lot to make my next class.
Coast Guard And Marine Corps Recruiting Programs

The U.S. Coast Guard and the Marine Corps have recently notified the Placement Office of openings which Embry-Riddle graduates are eligible for.

The Coast Guard is recruiting a Flight Student program for men who are FAA certificated either in Airframe, Powerplant, or both. Those recruits with prior military service will be enlisted within Aviation Structural Mechanic Third Class or Aviation Machinist Third Class. Recruits without prior military service will be enlisted as Seaman Recruits and, upon completion of a ten week training course, promoted to Third Class. All persons will be assigned to a Coast Guard Air Station and will be members of a flight crew.

The Marine Corps currently has positions for four men who are interested in becoming Marine flight officers, and any male will be eligible to attend training by 10 June, 1973. The candidates must have at least a B.A. or B.S. degree, preferably in Engineering, Aero-science, Data Processing or Computer Science, be less than 27 years old at the time of assignment, and meet all other standards established by the Marine Corps.

The training course, which will last eight months, is designed to familiarize the candidate with the use and operation of airborne computers, avionics and navigation devices. Upon completion of the course, the individual will be qualified for assignment on a flight status as either a Tactical Helicopter Navigator, Marine Air Officer, bombardier/navigator or an airborne electronic warfare officer. The candidate will be a FAA civilians.

Toya Party, Friday, March 2 at 8:00 pm, President's House 317 Be A, Atlantic

Fred Hamilton

Economics professor Fred Hamilton, an active member of the ERAU parrot society, is preparing to enter sport jumping just for fun. "I've only jumped in the first jump of the course, and I'm surprised that I now have completed 185 jumps. Just last Christmas break, Professor Hamilton became a certified instructor for the sport, and he has taught a course of twenty and heer jumps for a parrot class. One was Mr. Lassiter, an Embry-Riddle math instructor, the other an Embry-Riddle physical education student. Both did well enough, and they've both been going. However, sport parachuting isn't Hamilton's only hobby; he enjoys shrimp fishing in his ten foot Jon Boat, the Titanic. He enjoys oystering too, but the waters around Daytona Beach are too polluted for this. He must go south of you, the place to rent airplanes

Baseball This Week
For Our Eagles Team

Four Losses
by Mike Talman

With their first four regular season games out of the way, the Delta Chi middle baseball Eagles have yet to register their first victory.

Thus, the Eagles have played Bethune Cookman, the University of South Florida and a double header with Florida Technological University.

The home opener last Thursday against Bethune Cookman turned into a 12 inning marathon. Bethune Cookman led all the way into the ninth by a score of 2 to 1. Then, in the bottom of the ninth inning, Gary Haupt led off with a double. Bernie Callahan executed a perfect squeeze play, bringing Haupt home and sending the game into extra innings.

Both the Eagles and Bethune Cookman scored one run in the eleventh inning.

In the top of the twelfth, Bethune Cookman exploded for four runs. The Eagles came back with one run in the bottom of the inning, but could not score the tying run.

In the bottom of the twelfth, big Bethune Cookman lead. Final score: 7 to 4.

On Saturday, the Eagles played their second and third games of the season in a double header against Florida Technological University. Because it was a double header, the games were on a seven hour schedule. The Eagles lost the first game of the twin bill 5 to 4, after a last inning two-run surge that fell short of the win.

The second game turned into an embarrassing 11 to 1 loss for the Eagles. FTU made a marathon of their turn at bat in the fourth inning. Sixteen men came to bat, scoring all eleven of the runs on eight hits, five walks and three errors.

On Monday, the Eagles traveled to the Tampa campus of the University of South Florida. The Eagles were the first to score, knocking in four runs in the third inning, but USF took advantage of Eagle's pitching problems, getting three runs each in the fourth and fifth innings, and six more in the seventh inning. The Eagles managed two more runs in the eighth inning, but went down to their fourth defeat of the still young season, 12 to 6.

Baseball, Intramural Style

The intramural softball season opened this past Sunday with perfect weather. The long-awaited season started off with the big bats of Sigma Chi spraying hits all over the field. Numero Uno's fielding was flawless, except for the performance of their first-string shortstop, who committed three errors (we won't mention any names this week, but if it happens again...). Numero Uno effortlessly beat Arnold Air by the score of 23-8. Numero Uno will be one of the top teams this season, as many people expected.

Vets vs. ITP

The Vets and ITP played the second game. The score was continuously see-sawing, the first few innings. It looked as though ITP might have pulled an unexpected upset, but in the bottom of the ninth inning, the Vet team, led by the big bat of M. Elza, scored 9 runs, to put the game away. The final score was Vets 14, ITP 5.

Delta Chi vs. Sigma Phi

The Delta Chi softball team found themselves behind at the beginning of the game. Sigma Phi scored 3 runs in the first inning, and 5 more in the second. Delta Chi, cool and calm, quietly put across 2 runs in the bottom of the first but Sigma Chi's lead to one run. Then, in the second inning, Delta Chi exploded, scoring 10 big runs, never giving up, however, Sigma Phi came up with a last inning rally and gave Delta Chi quite a scare by scoring 4 runs. The thread was quickly tied, and when espionage grounded to the shortstop, who made a beautiful play, the runner out, while tying runs were on base.

This was by far the most exciting game of the day, as these two fraternities were never more than two runs ahead of one another. In the first inning, it looked as though we were about to witness a new manner in which to play softball. Errors, erratic base running, and misjudged flies were the story of the first few innings. Then the players started to get it all together. It looked as though the game would go into extra innings, with the score tied 7 all in the beginning of the 7th inning. In this instance, however, Lambda Chi started off scoring 4 runs, followed by 3 Sigma Chi runs. Thus, the final score was 11 to 16, Lambda Chi's game.

Delta Chi... Sigma Phi... Lambda Chi

Team Batting

Numero Uno... Delta Chi... Arnold Air... Vets... ITP... Sigma Phi... Lambda Chi...

Adventures of the Black and Blue Baron

by Terry Gardner

Theodore J. Throttlebottle was about to pursue his favorite pastime. As the world's greatest aviator (as far as he observed), the time had arrived for another day of chasing death, testing his piloting skills and freeing himself from the drudgeries of earth-bound existence.

Typical of most students at the Humpty Dumpty Flying School and Bode Ranch for Boys, Throttlebottle only liked to fly when he was scheduled and didn't like to fly when he was supposed to. "Oh well," he thought to himself while preparing for his next adventure by devouring a bag of peanuts and a warm coke from the ever-dependable vending machines, "my best friend and favorite dispatcher, Toby Puff, will get me an aircraft." So what if some ego-manical inquirer said he'd never been around, tell war stories and puff his patch counter, there was Ted arrived at the dispatcher's office.

After a frustrating day of sitting at the door of the empty Humpty Dumpty Ranch; puffing out his chest, he demanded in his usual, "Ted, what's going on?"

"I told you, Mr. Campbell, I was here on Sunday." Ted arrived for another day of chasing death.

"What's worse than death?... and I know it must be orders of one or the thousand per cent over the opener." thought Mr. Campbell to do his famous pom-pom cheer, so get over to a game and check out the action!

MONEY TO BE GIVEN AWAY

by Bill Luevko
Florida residents, this is your last chance to apply for grants or participate in the Florida Student Assistance Grant Program. If you qualify, you may receive up to $1200 per year for the remainder of your undergraduate studies. Of the eight applying last year from ERAU, two grants were awarded. The paperwork must be fully completed by March 15, Mr. Kasler urges those individuals who are interested to stop by his office as soon as possible. Why not drop in to see if you qualify?

February 28, 1973
Volley Ball
JUST‘CAUSE YOU AIN‘T NEVER BEEN PUBLISHED IN PAPERBACK, HUNG YOUR CANVAS IN THE OL‘ GUGGENHEIM, OR HAD THE MULTITUDES ACCLAIM YOUR SELF-ImpRESSiONISTIC SCULPTURES DON‘T MEAN THE PAGES OF PEGASUS AIN‘T IN NEED.

THE PURPOSE OF PEGASUS IS TO COLLECT AND PUBLISH THE DIVERSE AND ARTISTIC TALENTS OF EMBRY-RIDDLE STUDENTS. THIS ANNUAL PROJECT IS IN ITS THIRD YEAR AND STRIVING FOR IMPROVEMENT. THE MOST IMPORTANT INGREDIENT FOR SUCH A REFINEMENT IS YOUR TALENT. THE CREATIVE MEDIUMS OF PROSE, POETRY, PAINTING, SCULPTURE, PHOTOGRAPHY ARE SEVERAL CHOICES YOU MAY SELECT. SO SHARE YOUR INDIVIDUAL ARTISTIC OUTBURSTS WITH US, THE EXISTENCE OF PEGASUS DEPENDS UPON COLLECTING THOSE EXPRESSIONS - BE THEY SUBTERRANIAN, ESOTERIC OR JUST PLAIN, SIMPLE, STRAIGHT-SHOOTIN‘ REVELATIONS, PLAN TO CONTRIBUTE TO THE SPRING ISSUE OF PEGASUS.

LET IT HAPPEN BY INQUIRING IN BUILDING A, ROOMS 103 OR 123.

[CONTRIBUTION DEADLINE: 15 MARCH 1973]
