Tuition Increase
For Fall '73 Trimester

Prices around the country are reaching new highs, and the cost of education at Embry-Riddle is no exception. In September 1973, charges will be made in tuition, living (dormitory) and flight fees. While the price increase has not been announced, the changes in all three areas will be reflected in the cost at the University.

According to Harry D. Neis, Director of Finance, the changes are as follows:

- **Academic tuition** will rise to $425 per trimester.
- **A P tuition** to $625.
- **Flight fees** will increase 10%.

The new changes will take place in September and will affect all students except those continuing without taking a trimester break.

All students are automatically on the guaranteed tuition program, and as long as one attends continuously, there will be no break in the plan. Even if the student is absent for one trimester, the tuition charge remains the same.

Society of Automotive Engineers Meeting

The Glia Telescoping Wing Concept will be the topic of the meeting of the Society of Automotive Engineers, held in Wichita, Kansas, April 3-5.

The National Business Aircraft Meeting and Engineering Display of the S.A.E. will be attended by more than 30 companies involved in the industrial sector of the aviation industry, including manufacturers of aircraft, components, and related services. The meeting will be presented and discussed during the three-day meeting.

Dr. J. Ritchie, Chairman of the Aeronautical Engineering Division of AIAA, will talk about the status of the Glia Telescoping Wing Concept with manufacturers attending the annual meeting.

Ritchie has been involved with the telescoping wing design.

University Relations

Harry Wilkes has been named Coordinator of University Relations, a new position in the Department of University Affairs. Wilkes, who is administrating the University Affairs Office, has been named Assistant for Special Activities, has been named Assistant for Special Activities, has been named Assistant for Special Activities, has been named Assistant for Special Activities, has been named Assistant for Special Activities.

No Show Policy

Due to the recent increase in scheduled flights, it has become necessary to have a "no-show" policy for each period missed without prior notice. This policy will be strictly adhered to in the future.

As before, it will be up to each flight student to make sure that the schedule boards daily in order to see if he is on time of his schedule and any changes may have been made.

Summer Jobs Are Available in Europe

Thousands of paying summer jobs are available for European students. Positions range from jobs in fields such as engineering, medicine, and business. The University Relations Office encourages all students interested in pursuing summer jobs in Europe to contact the Office of University Relations for more information.
Several things are in the mill for the next couple of months that everyone should be aware of. First, and probably the most important, in Pre-Registration. Pamphlets are currently being distributed on campus for all students. I urge you to read them carefully. Note the dates for faculty advisement are March 13 through 19 and that the actual Pre-Registration will be conducted on March 20 and 21. Already, we have received in this office many complaints about course availability and summer scheduling. It is not our intent to offer assistance, but we do advise you to consult your faculty advisor first before you come to us.

Graduation Announcements: The SGA issued bids for the sale of the graduation announcements. The ERAU Vets Association Used Bookstore received the contract and now offers the graduation announcements, to include the inserts, on sale at that location. The price is $30 each and it is well worth it.

Community Relations: The SGA was approached by a representative of the Halifax Boys' Club to assist in a fund-raising drive, which will go from now until April 28. It was decided by the Senate last Tuesday to enter into an assistance program for guided campus tours. Senator Norm represents the Halifax Boys' Club to the Community Relations Committee. He also made the request for a percentage of our money, but we are accepting the 20 percent commission of the raffle and will provide guidance in the final game of the ERAU baseball tournament. Let's get out and support the team and have a good time.

Final Note: You will be seeing shortly advertisements from the ERAU Marching Band. The way it looks now, ERAU will have annually what is called the "Parent's Weekend." There are a number of activities planned for the days of April 20 and 21. Some of these activities are percolating the alumni, Parents' annual dinner dance, graduation ceremonies, and guided campus tours for visiting parents and officials. Students are cordially invited to participate in many of these activities. Further information concerning these festive weekends can be obtained through Betty Bond in the Alumni Office.

I am looking for any student living in the dorm who comes from around Fairfield or Westport, Connecticut.

NEWS AND VIEWS FROM THE EDITORS DESK

The opinions expressed in this paper are not necessarily those of the University or all members of the student body. This paper is not responsible for errors or omissions. The opinions appearing in the AVION are those of the writer and not necessarily those of ERAU administration. The AVION reserves the right to edit letters as we see fit in accordance with good journalistic practice. All letters may be signed, although names will be withheld upon request from the writer.

LETTERS TO THE AVION

So far this season, Embry-Riddle's baseball team has played five home games and has been an understatement to say that the student attendance has been poor. In fact, it has been close to nonexistent. I have attended three Eagle games as a reporter for the AVION. If the attendance at those three was any sample, total attendance for all five home games can't be more than forty.

The Eagles and their coaches have done their very best to put together a team that would be a good representation of Embry-Riddle. So far, despite their efforts, they're having a very discouraging season. It may be that with a little student support and enthusiasm behind them, the Eagles could win some games.

Next week Embry-Riddle is sponsoring a baseball tournament. The games are played on the Exposition fields across from the administration building. Baseball is a spectator sport, why not participate. Remember, it's your school they're representing.

According to North American Rockwell, there is an explosion in electronic demand not only in America but also in Africa, Latin America, South America, Asia, and the Middle East. In 1984, the world market for electronic equipment will be $24.8 billion. Some people think it's going to keep growing, but others think it will peak in the next few years. The AVION is a publication for Embry-Riddle students. Participation in field trips for the student government association. Field trips may be submitted to the AVION for publication by the student government association. All letters may be signed, although names will be withheld upon request from the writer.
Legislative Intern Program Offered

Persons wishing to apply for the Florida Legislative Intern Program short course in Tallahassee, Monday, March 31st, Rep. Richard Hodes, Chairman of the Joint Legislative Intern Committee announced this week.

Internships, to run from Sept. 1, 1973 to Aug. 31, 1974, provide opportunities for college graduates and/or students to work up legislation, participate in research, and carry out legislative projects. At the same time, legislative committees are provided with additional staff expertise through the internship program.

To qualify for the internship, a person must have completed 28 undergraduate studies by June and/or be enrolled in graduate school in an accredited Florida college. Rep. Hodes said applicants will be accepted from all major areas of study. Sixteen persons selected for the program will be paid a $500 per month for the latter part of April.

Interns will receive $500 per month for a year plus FSU partial academic fee waivers. A Directed Individual Study course each quarter within the discipline of choice of the internship coordinator.

Interns last year received training ranging from analyzing laws, rewriting statutes for concerned or staff personnel and pre-preparing their involvement in the legislative sessions.

Persons enrolled in the program are given a choice of where they would like to work. Their selection is based on major, interest to house, and senate committees' particular needs.

Serving as chairman of the Joint Legislative Intern Committee is Rep. Richard Hodes, D-Tampa.

Cyclorama: Daytona Beach Style

If you are wondering why the state of Daytona Beach are overrun with motorcycle, this is what you might be doing. Daytona Beach is overrun with motorcycle during the Daytona Beach Intern program. Portland College is the prime destination for the Intern program. Portland College offers a three-year program in motorcycle maintenance and repair.

Motorcyclists Beware!

By Pete Hamilton Several weeks ago, Robert Greenway, an ERAU student, was involved in motorcross accident.

Greenway's bike was wrecked to an extent that he could not ride it away. The police officer on the scene suggested he sell Steve's Motorcycle Wrecker Service. Bob agreed, not knowing the price of this service.

To take the bike a total distance of 4.6 miles, it cost him $22.50, and $1.50 for every day that he stored it. After he contacted Honda, City, they said the books would have picked it up anyway.

THE IMPOSSIBLE DREAM?

by Peter Munro

Many of us see ourselves driving a 707 every time we close our eyes. Is it a permanent fantasy, or a real possibility? All this talk about major airlines only hiring 23 year old, former Air Force pilots with 3,000 hours and a master's in aeronautical engineering is what it seems...just talk. Regardless of who was hired with what experience in the past, one thing should be made clear: "no training, "standard" is anything but temporary. Nowadays else in this fact more clearly illustrated than in the airline business.

It is a simple case of supply vs. demand. When an airline needs 20 pilots to fill a class on Monday, it will take what it feels to be the best the field can offer. One third of Pan Am's 3000 pilots will retire in the next six years. They also plan on expanding their fleet of aircraft in two years. So, disregard that pessimist who puts his sunglasses on when he gets out of bed in the morning and talks a little too loud and a little too often.

If driving a 707 is your dream, the future looks good. Keep flying anything and everything, anywhere you can, and job growth is likely to be there. In fact, United was hiring so fast that in 1971, over 30,000 applicants were screened for the last year.

Looking at the past, one third of Pan Am's 3000 pilots will retire in the next six years. They also plan on expanding their fleet of aircraft in two years. So, disregard that pessimist who puts his sunglasses on when he gets out of bed in the morning and talks a little too loud and a little too often.

If driving a 707 is your dream, the future looks good. Keep flying anything and everything, anywhere you can, and job growth is likely to be there. In fact, United was hiring so fast that in 1971, over 30,000 applicants were screened for the last year.

The Impossible Volunteers

by Marvin Stokes

Big Tree: "Oh, Calcutta", the title track off of their upcoming album. They play come to Daytona. (X) On the same program in the Greensboro Coliseum on "Fritz the Cat".

Cinema: If "Avanti! is held over (it prob- ably will) then "Heart- break Kid" will begin Friday, "Ride the High Country" will be shown Thursday. Charles Grodin, Jeanne Berlin. Whacky adult comedy about young mar- riaged. (PG)

Daytona: Disney's "The World's Greatest Athlete". A very funny comedy about two washed-up coaches, Tim Conway, a very funny man) and John Amos, who find an athlete, Michael Vincent, who can do everything in sports and do it better than anyone else. (G)

Halifax: Scheduled is a Bruce Reynolds, a British Reynolds actually actor. "Deliverance" also starts John Voight, a very funny actor, and "Cowboy" fame. This is an excellent motion picture, attested to by its nomina- tion for the Best Picture Oscar. (R)

Jerry Lewis Cinema: The Broadway musical "1776" has been made into an even more so-so movie. If you can imagine George Washington and Thomas Jefferson dancing and singing their way into the Revolution, or Ben Franklin singing out the praises of our "new mar- riage", as well as extol- ling the virtues of his illegitimate offspring, then you should enjoy this farce. (G)

Manasquan I & II: "Black Caesar is Halas's ver- sion of "The Godfather", and it is not a good ver- sion. Fred Williamson, voted Mr. Concoled of All Time" on "Stars. Do they really have to waste both theaters on this trash? (R)

Trans-Lux Blue: Also showing "1976". a comment of "Black Caesar".

The Dope On Alpha Rho Omega

It has been a parti- cularly interesting and active month for Alpha Rho Omega, the maintainative fraternity's professional fraternity. Starting with the in- troduction of fraternity members on January 15 at Legion Hall, Frater- nity President, Jim Baer- wolf then presented the main speaker of the evening.

Mr. Jack D. Fales, who works for Eastern Air- lines, voiced some en- couraging words as to the present and future employment opportunities for students in the airlines. On February 14, Alpha Rho Omega members were favored with a personal tour of Eastern Airlines Inc., Vero Beach facil- ity by one of our own fraternity brothers, presently employed at the bustling operations. Active member of our fraternal brotherhood, Mr. Fales discussed the corporate aspect of fraternity di- vision. He also spoke on February 26 with a con- gregation of dinner for mem- bers and their guests at the Roaring House Restau- rant. Mr. Paul C. Gayer, Jr. of NASA was the speaker of the even- ing with his presentation of the space shut- tle and its relevance to the maintenance techni- cian of the flight deck. For further information concerning the fra- ternity and its future activities, please con- tact the fraternity. One of the members of the Alpha Rho Omega may be able to answer your question.

UPCOMING CONCERTS

by J. P. Hunter

On Friday night, March 16, the Jackson- ville College of Education presents three big artists. They are B. J. Thomas, Jo Gunne, and Al Kooper. If you've never seen Al Kooper, make your bus- iness to get blasted and naked. He will definitely dent your brain.

Upcoming concerts are: Steve Stills, April 6; Alice Cooper, April 22; Led Zeppelin, May 19; Deep Purple, Bill Preston, and Pink Floyd, June 26.

By Marvin Stokes

VOLUNTEERS URGENTLY WANTED

Students are urgently invited to help in archaeological excavations in England this summer. Deadline for applications is April 1. City center redevelopment is threatening the disappearance of prehistoric graves. Iron-age settlement remains of the Roman Villas, fascinating relics of medieval towns, all over Britain.

American students free from mid-May, and with previous archaeological experience, are invited to join an interna- tional team on a dig of the important site at South Hill where the 1971 excavation hopes to find new evidence of the early pagan settlements. Experienced helpers will receive free board for helping in an important work. Similar help can be obtained in work on a medieval tower near Chester.

Other students without experience are in- vited to join the Brit- ish Archaeological Sem- inar at Lincoln College, Oxford, organized by the Association for Cul- tural and Natural Heritage. Academic credits can be earned by participating in this low-cost program which ends by three weeks participation on digs in different parts of England and Scotland.

These include the Association's now-lo- nely dig on the island of Orkney in the He- brides which last summer was headed up by Quintin Eliz- abeth, Prince Charles and Princess Anne. Cost, $500. Write now for further details to Ian Lowson, 529 West 112th Street, New York, N. Y. 10025.
FBU has won the NCAA championship twice already. To win this championship means that this team has beaten most of the best colleges and universities in the nation.

With a sore arm pitching staff, the Eagles had a slim chance against this hard hitting team. Despite 14 walks, the Eagles matched FSU almost hit for hit. FSU had eleven hits and the Eagles had eight. Both teams made only two errors each. Center fielder, Wayne (Whitey) Ford showed what the Eagles could do by catching a long fly through the man out at home plate. The Eagles showed up 10-6, with that of FSU, but with only 4 pitchers for the Eagles and 10 for FSU, things looked pretty grim.

The score itself did not really tell the game. Actually it was a much closer game than the score read (16-0), because all 16 runs were scored by walks or errors.

First Victory For Eagles

by Mike Talman

Last Saturday the Embry-Riddle Eagles re-
covered from their first vic-
tory of the season in a double header against the Engineers from the Florida Institute of Technology.

The Eagles got into the third game with 4 to 2 win over the Engineers in the second game of the day.

The Engineers started off the second game by scoring twice in the first inning on an error by the Eagle second baseman, two singles and a double. That was the end of Engineer scoring. In the third inning, the Eagles tied the game when Brian Owens hit a home run with Mike Ballaint on base. The Eagles scored again in the fourth inning when Wayne (Whitey) Ford, the center fielder, was bunted in after getting on base through an Engineer error. The last Eagle score came in the fifth inning when Engineer Jim Hausman hit a line drive into center field for a triple. With two outs, Ford got a clutch single and then drove in the Hausman home run for the fourth Eagle run.

Two distinctions went to Brian Owens in this game. He became the first only Eagle pitcher to have won a game and the only one of the team to have hit a home run. The Eagles didn't 't fare as well in the second game.

The Eagles didn't fare as well in the second game. Their only runs were scored in the fifth inning when Wayne Ford drove in two runs under par, eight strokes weren't enough and the Eagles went down in defeat 5 to 2.

First Annual Baseball Tournament

The Embry-Riddle Invitational Baseball Tournament will begin on March 14.

Three teams have accepted invitations to play in the first annual Embry-Riddle Invitational Baseball Tournament, to be held March 14, 15, and 16.

The teams that will be competing are: Wabash College from Indiana, Atlanta Baptist from Georgia and Florida International University, from Miami, Florida. The games and starting times have been decided on and are listed below:

Wed. March 14 Time Teams
9:30 ERAU vs. Atlanta Baptist
11:30 ERAU vs. Wabash
1:30 Atlanta Baptist vs. Flori-
da Int.

Thurs. March 15
9:30 Atlanta Baptist vs. Wabash
11:30 Florida Int. vs. Wabash
3:30 Florida Baptist vs. Wabash
5:30 Florida Int. vs. Atlanta Baptist

Fri. March 16
11:30 ERAU vs. Atlanta Baptist
1:30 ERAU vs. Florida Int.
3:30 ERAU vs. (?)

Wabash College is a small liberal arts school which usually comes up with a good baseball team. Atlanta Baptist is a group of many seniors last year, some of which received minor league contracts. Atlanta will have a very young team. Florida International University plays a very tough schedule, and is the only team with a large student body.

Although our own Eagles have a poor record coming into the tournament, we are just starting out. If our pitching can continue to be good, we will be a tough opponent.

The SGA is providing a fish fry for the Friday afternoon ball games. See you at the games.
Second Week Of Softball Proves Interesting

by Jim Sheridan

Sigma Phi vs. Lambda Chi 14 - 9

The second week of softball began with a flurry of hits and a few mishaps on both winning and losing teams. Sigma Phi evened their record out with a victory Sunday over Lambda Chi. Lambda Chi took a quick 5 run lead in the first three innings to score 14 big runs. The biggest amount of runs came across in the last of the 3rd, when Sigma Phi rounded the bases 3 times.

Both of these teams are now 1-1 after Sunday's game.

Numero Uno vs. Sigma Chi 17 - 3

Numero Uno is continuing its winning ways as they soundly defeated Sigma Chi 17-3. Once again the big bats of $1 thrashed out hits all over the field. Layne was the big bat for Numero Uno with 2 hits out of 3 at bat, with those 2 hits both home runs. There were 4 home runs this game all by Numero Uno.

Numero Uno is now 2-0 and tied for first place, and Sigma Chi is now fighting for the last place trophy with IPT.

Vets vs. Arnold Air 21 - 2

The Vets are winning, and they are winning big. Last week they defeated IPT, and this week they beat Arnold Air in convincing fashion.

The pitcher of the Vets, Smith, only allowed 4 hits, while the Vets knocked the ball through numerous gaps of Arnold Air's defense 24 times. Else is now leading the league with 3 HR's and will soon catch up to Henry Aaron. HR's for this game by the Vets were made by MacNeal, Elze, Baerwolf, Dauphin, and Stavenbock.

The Vets are undefeated, while Arnold Air is now 0-2.

Delta Chi vs. IPT 14 - 0

The defense of Delta Chi registered the first shutout of the year against IPT. Stephen Ward threw a 2 hitter against the under-manned IPT team, which only fielded 8 players for the first five innings. The big bat for Delta Chi was Cakes, who went 3 for 3, 2 of them home runs.

After the game was called due to lack of players after the 5th inning, two players from Delta Chi were traded to IPT (Jim Sheridan, Wayne Layne) and the team quickly whipped into shape and scored 5 runs, but it was not quite enough.

IPT also made history by making a triple-double play. Figure that out!

Captain E. Defayo guarantees a victory over Arnold Air.

The umpiring by the 1st base umpire was purely outrageous. He threw a player out of the game last week.

THE LAST BIG CHEER FOR THE DELTA CHI JETS

Since 1970, there has been one organization on campus that has shown how one group of people can get together for achieving a common goal. Delta Chi has proven this for the past three years. People talk about a lack of spirit, well, here's a group that stands a chance.

To show how it all got started, we have to go back to the fall of 1969 to the formation of an independent flag football team, the Jets. It was formed by Paul Barry, Bob Cramer, and Pete Moyer. Since that time, the Jets have amassed a record of 36-2-0 and have won thirty straight games.

In the fall of 1970, they began the formation of the Delta Chi fraternity and since that time have enjoyed the stature of a leader in athletic and IFC competition.

This year, many of these individuals will be graduating. We would like to show them that they have been instrumental in building intramural athletics and the fraternity system on campus from near nothing, to a powerful part of the university.

Since 1970, these people were responsible for the rise in stature of Delta Chi through these events:

- 1970 Intramural football champs
- 1970 IFC football champs
- 1970 Greek Week champs
- 1971 Second place softball champs
- 1971 IFC football champs
- 1971 Intramural football champs
- 1972 Third place softball champs
- 1972 Second place IFC football champs
- 1972 Intramural football champs
- 1972 IFC football champs
- 1972 Greek week champs

Within the next ten months, we will bid farewell to the nucleus of Delta Chi and this formidable team. Many thanks from Delta Chi Fraternity to:

Paul Barry Dec. 73
Steve Carvahlo Apr. 73
Bob Cramer Apr. 73
Lary Frodve Apr. 73
Dennis Gerle Apr. 73
Jim Hunter Apr. 73
Bob Levins Dec. 73

Skip Stone Aug. 73

A Soccer Lesson For Stetson

ERHU Soccer Club gave Stetson a lesson in soccer Tuesday, as they rolled up a 8-2 victory, "in style.

This Wednesday, March 14, the soccer club again plays Stetson at 3:30 pm at Avalon Stadium, across from the administration building. It has been rumored that refreshments will be present.
# BACHELOR OF SCIENCE DEGREE CURRICULUM IN AERONAUTICAL STUDIES

The objective of this program is to provide the knowledge and skills sufficient to enter one of several areas of specialization in the aviation enterprise in the civilian or government sector. An area of concentration is to be chosen in one of the following: Flight Technology, Management, Maintenance Technology, Aeronautical Engineering or Reserve Officers Training Corps. The minor electives are to be chosen from the area of concentration.

Undesignated elective requirements may be met by any course which is sufficiently different from the courses required (e.g., college algebra is not sufficiently different from college math).

This curriculum is parallel to the Aeronautical Science degree in that all of the required courses are also required in the Aeronautical Science degree except for the flight training courses. Thus a student may transfer from this curriculum into the Aeronautical Science curriculum at any point providing he has taken the flight training equivalent to that required in the Aeronautical Science degree up to the time of transfer. One can transfer into the Aeronautical Science curriculum up to the eighth trimester.

#### AREAS OF CONCENTRATION

A minimum of 18 credits is to be selected from one of the following areas of concentration (minor). Courses are to be chosen from those listed. Necessary prerequisites apply. One should consult with his academic advisor to make certain that the area selected is relevant to his overall educational objectives.

### AERONAUTICAL ENGINEERING

The Associate in Science Degree in Aeronautical Engineering Technology may be earned by taking this area of concentration, the required engineering mathematics courses, and one additional trimester of course work.

### FLIGHT TECHNOLOGY (Fixed Wing or Rotary Wing)

If this area of concentration is chosen, one must take the courses necessary to qualify as a commercial pilot with the instrument rating. Flight credits may be accepted from a regionally accredited college or may be awarded to current military and commercial airline pilots who hold the appropriate FAA ratings in either fixed wing or rotary wing aircraft. The Division of Flight Technology will provide flight evaluation to validate other types of previous flight experience for credit.

Adventures of the Black And Blue Baron

by Terry Gardner

Last week we left our intrepid gardener, Dore J. Throttletbottle after a daring rescue of Tubby Trumpetmouth from the wrath of the Humpty Dumpty Flying School and Duke Ranch for Boys head Master, Captain W. T. Throttletbottle, being of persistent character, was naturally undaunted by the whole episode with Captain Capes and used in his efforts to obtain Tubby from some one else’s expense. Also, it appeared that today was not his day as Tubby was so upset emotionally he cut off to decide to take the rest of the day off.

Approaching the problem from another angle, Ted contacted his instructor, Ralph Halkas, who was catching a few winks behind the downstair’s trophy case. Now Ralph was capable of deviating but often lacked an important quality, judgement. He had a special fondness for his instrument and instead of playing through flocks of seagulls and doing touch and holding while sitting in the back seat of a 172, he always managed to get the fiddle in his hands. Then (stop signs, smoking rules, and continuity men).

With this better to do, Ronk desisted and helped the student obtain an aircraft. Utilizing one of his favorite techniques, he slipped a dime to that well dressed coffee break, Tommy Tubbs, who would do anything for a cup of coffee. It was also famous for his lack of memory (a fact he was caring about) the entire operation. His favorite trick was to get everything fouled up then fosh that when they take a coffee break.

With a brand new dime in a sweatcoat, Tommy took off the machine, leaving Ted with a chance to grab his own aircraft. Obviously, everything up to this point was highly against operational policies, but things like this seemed to get covered up and buried under a ton of memos concerned with trivial matters such as who was allowed to sit in the upstairs lounge. Everyone was so concerned with covering their own backside the kids never knew what really happened.

With his new found freedom of choice, Ted naturally grabbed the only instrument shy left so polite and simple whose name was duddy-hop to his favorite night spot and roll station on the AOF while poring holes in the sky. Of little consequence to him were the four inoperable violins, varnished in a less obvious manner. This airplane plane with control locks and tie-down chairs. Care was avoiding the ruckus, Ted slid out the door to begin his next skyborne expedition.

*Check in next week for more adventures of our friendish flyboy.*

New Production At Once Upon A Stage

by Marv Stucke

Jack Kelly, TV’s "Hart of Dixie," has been signed by Once Upon A Stage to play in its play "One Man’s Yankee." Kelly, who starred in the play, "The Yankee," has been signed to play in the stage production of "Dixie." The play, which Kelly has been considering, will open March 14th for a six-week run.

Kelly, a versatile actor, has been involved in show business for many years. He began modelling at the age of two and by the time he was nine was already a seasoned professional. His first movie role was in Lee Schubert’s production of "Swing Your Oranges." Although a New York native, Kelly moved to California early and most of his education took place in California. However, it was not until after service in the Air Force in Alaska and radio and TV work in New York that he made his Hollywood debut in "In Fighting Man of the Plains." Other movie roles followed in such films as "Submarine Command," "To Hell and Back," "Terror in the Night," and "The Commandos," "Dr. No," and "You’re a Big Fool." By the time he signed with Warner Brothers for his TV series running "Yankee," he was already a familiar TV actor with appearances on "Studio One," "The United States Theatre," "Philco Playhouse," and "King’s Row." He has guested on many top network shows, most recently "Ghost Story," and "Ironside," and was host of NBC’s daytime game show "Sale of the Century." He is also talented musically, Kelly has starred in shows on National Educational Television and in "The Music Man," "Pajama Game," "Guys and Dolls," and "Cactus Flower." He is a member of the Americanradio Society.

He is married to the former Jo Anne Smith and is the proud father of a daughter, Nicole Christine. His wife will join him in Orlando for his run at Once Upon A Stage.

Kelly, an athletic stall, is seen outdoorsman, with an enthusiasm for salmon and bass fishing, golf, tennis, and camping. He also has a pilot’s license.

Ian Stuart, General Manager of Once Upon A Stage, stated, "He is delighted to welcome Mr. Kelly to Once Upon A Stage as the spearhead of a host of name stars who will be appearing at the theatre."
