GRADUATION WEEKEND: SOMETHING FOR EVERYONE

Well, fellas and gals, there's a good chance Mama will come see you in April. The Embry-Riddle Parents Association has planned a Parent's Weekend over April 20th and 21st to coincide with graduation weekend.

Visiting parents may participate in the "Smilin' Jack Golf Tournament" on Friday, the 20th. The 18 holes of handicapped play is also open to students and will be held at the To- moka Oaks Country Club. Trophies will be awarded in all categories. In the evening, the Parents Association will hold their annual meeting.

Saturday, April 21st, is the day for Graduation Ceremonies in the 20th. The 18 holes of handicapped play is also open to students and will be held at the Tomoka Oaks Country Club. Trophies will be awarded in all categories. In the evening, the Parents Association will hold their annual meeting.

Parents not planning to attend Graduation may elect to try golfstream fishing. The fishing permit begins on Saturday with trophies being given in all catch categories.

Campus tours will be given at 2:00 pm for parents. A plane ride may also be included in the tour.

At 7:00 am, the Alumni/Parents Annual Dinner-Dance honoring visiting parents and new graduates will begin at the Greek Community Center.

Visiting parents have an enjoyable weekend lined up with something to please everyone. If you have any questions, feel free to contact the committee.

BRITISH EDUCATION IS CHEAPER

How would you like to study in Britain? A new British government policy has fixed a standard tuition rate at any of 700 British universities and colleges for overseas students, of $265. This covers 45 quarter credits or 30 semester credits.

As a result, the schools in British Association reports that the total cost for an academic year at a British college or university (including round trip air fare) can now run as low as $2500 to $3500. This includes tuition, fees, lodging and books.

Furthermore, American students (or faculty members) can now study on any of five levels:

1. At a campus of an American University in Britain.
2. As a visiting student, scholar or fellow.
3. As a graduate or undergraduate at a college or university, combined with research, work experience or independent study.
4. As a student of the British institutions such as the theatre, the arts, welfare services, politics, medical services, the law, etc.
5. In the performing arts, doing special research or sabbatical study.

Complete details of these work and study programs are available from SIBA. Preliminary planning takes three months, so now is the time to plan for the next study year.

For further details about SIBA's reference kit and other services available, write "British Universities Department", British Tourist Authority, 680 Fifth Ave., New York, New York 10019.

NEW FEES ARE ANNOUNCED

by Bill Lieder

The registrar has released the new tuition schedule effective Septem- ber 1, 1973.

In the field of Aeronautical Science, the fee will be $1520.00 per trimester. This includes the cost of flight training to be accomplished during that trimester.

In the Aeronautical Studies area, the fee will be $1520.00 per trimester with an additional charge for any flight course undertaken.

The cost of flight training will also be increased to $265.00 per trimester on September 1.

The following flight course fees will also become effective in the Fall:

<table>

IFC Holds Party

Make sure that your fraternity is well represented this Saturday at the IFC Party. Action Central will be the hub of all the events, 215 S. Ridgehead Avenue. The Wooden Spoon will be on the barstand at 9:00 pm. Dress is informal, wear your fraternity shirts. Admission is $1.00 and there will be a quick service bar where drinks will be 40 cents.

Pegasus Deadline

The editors of Pegasus are reminding everyone that today is the deadline for submitting all contributions. If you have not already submitted your work, please do so as soon as possible.

PanelBURKE representing the Coast Guard is the day for an enjoyable weekend.
THE PRESIDENT'S CORNER

Community Relations: Senator Norm Whitson was appointed by the President of the Ad-Hoc Honor Roll Committee to head the new Electro-Optical Passenger Service Committee. We have already seen some advertising on campus concerning this worthy cause. Cash awards will be offered and cooperation and participation in ticket sales both to organizations and individuals will be rewarded.

The Electro-Optical Passenger Service Committee is very appreciative of our efforts and would like me to express their thanks to the ERAU student body.

External Relations: Last weekend, the President's Club sponsored an origami workshop. The President's Club is very appreciative of our efforts and would like me to express their thanks to the ERAU student body.

Flight Line: The complaints about the flight line are numerous. Unfortunately, if you only discuss it with your fellow students, it will do you little good. A student, who has a complaint about the flight line, should go to the flight line, faculty member, or the first-line supervisor. I can assure you that if you proceed up the chain to the department head, if you still do not satisfy, he should then bring it to the SGA so that we may help him out in any way we can. I have been receiving several verbal complaints, however, we cannot go out on the front door of the SGA office without something in writing. It is not always the school’s fault when things like this come about. On the contrary, it is usually a misinterpretation on the student's part. If you have come, put it in writing and address it to the President of the SGA.

I hope to see everyone at the baseball game this Friday. From 2:00 on, the students will be provided a free fish fry and beverages. The entertainment will be the last game of the ERAU baseball season in which the Eagles will play Florida Atlantic University. If you have any classes that afternoon, do not worry about it, there is plenty to go around and it will still be going on when you get out of class later.

SPRING BREAKING

OBSCENITY: A VIOLENT PROVIDENCE

It seems that in last year’s Spring Break, technical errors were overlooked.

The no show cost is $7.00 instead of $2.00. Tuition for the Aeronautical Science program includes both academic and flight fees, and, therefore, would be an exception to the $700 tuition cost stated in time and space, unless, of course, you identify, as in fact Director of Admissions.

I hope that the mistakes didn't offend anybody.

News and Views From The Editor’s Desk

The opinions expressed in this paper do not necessarily reflect the opinions of all the members of the student body, nor do the opinions appearing in the Student Newspaper reflect the opinion of this newspaper or its staff.

On Monday, March 2 at 7:00 pm, at the school gym, there will be an open tryout for Varsity Volleyball. Coach Holcomb organized the men turning out into two teams to play against each other. After 2 hours of hard play, Holcomb stated that there was no varsity team, they would have to play playing by international rules to play on a personal team down at the VCCA and not to represent the school in any fashion. At this time we were told that extra could be a team in September and maybe a clinic. We held this summer to teach international rules.

If I had been asked, I could have told the coach that he should have played by international rules before the position of Holcomb. I am unaccustomed to thinking of myself as an employee of international rules. This particular night, I did not realize that I had better things to do with my 2 hours and I resent this deceitful act of trickery.

Dear Sir:

An article entitled "Motorcyclists Beware" by Pete Hamilton, which appeared in the issue of March 9th seems to me to be unfair to all motorcyclists. Mobile Dealers and Car Wrecker Services and a prime example of irresponsible reporting. One telephone call would have enabled any reporter to determine all of the facts necessary to complete the news story, rather than just half which led to the unwarranted allegation of a "Rip Off".

Modern wrecker costs from $20,000 to $30,000 and the drivers are well trained and responsible people who are on call 24 hours a day. There are three local companies who provide wrecker service and their calls are made under the direction of the Municipal Police, the Sheriff's Office or the Porto Police. The duties of our drivers, at the scene of an accident, include assisting the officers, removing debris, untangling wrecks, removing these hazards from the highways and sweeping broken glass, etc.

It also should be noted that fees are uniformly set by the City, not by the driver. Of course, if the fees are imposed upon in this unethical manner, this particular night, I did not realize that I had better things to do with my 2 hours and I resent this deceitful act of trickery.

All staff and faculty who need an I.D. card, please come by the dean of Men office on Monday March 10th, from 8-5.

Those that are currently held should take note.

The AVION is a publication for Embry-Riddle students partially financed by the Students Activity Fee through the Student Government Association.

Articles may be submitted for publication by the administration, the faculty and the student body. The AVION deadline is Monday afternoon at 4 p.m. Please mark all items AVION and deliver the complete layout to the editor, inside the campus, or ERAU Box 4.

UNFAIR TO AUTO DEALERS

**Jet Lab Prepares Students For Future**

by Alfred Arlen

ERAD's jet lab course has to be the most advanced and up-to-date course in the whole Technical Division.

In an interview with Mr. Bolton, head of the ERAD jet lab, he gave us an eye opening experience. He talked about how the turbine engine affected aviation and its future, where it has been, how it is now, where it is going, and what the maintenance, and technology division is doing to prepare those students for a career in aviation maintenance.

A turbine course takes seven and a half weeks to complete. Half the time is spent working on jet engines.

Every engine in the jet lab is test run by those students who assembled them. Embry-Riddle is the only school that has this type of program. Other technical schools in avionics technology stated that they have no such program.

Safety is a major issue. The jet lab students are under the supervision and instructions of their instructors every step of the way. The students get the maximum benefit from their instruction.

When the jet lab course was first set up seven years ago, it was originally a fifteen week course, but since then all A & P courses were changed to seven weeks and the jet lab followed suit.

ERAD's jet lab course is preparing those students for the day when jet will be the only way to fly.
by William E. Maxwell

Contrary to popular belief, the nervous system is not a super, egotistical inner computer. It is, in fact, a very complex system whose functions are not well understood. This complexity requires that we take care of our nervous system and that we understand what goes on in it.

To begin, the nervous system is a complex network of nerves and muscles that controls all aspects of human behavior. It is responsible for the regulation of body functions such as heart rate, breathing, and digestion. It also controls movement, sensation, and thought processes.

The nervous system is divided into two main parts: the central nervous system (CNS) and the peripheral nervous system (PNS). The CNS is made up of the brain and spinal cord, while the PNS consists of nerves that extend throughout the body.

The CNS is responsible for processing and integrating information from different sources, such as the senses, muscles, and organs. It then sends instructions to the PNS, which carry out the actions required to maintain homeostasis and to respond to changes in the environment.

The PNS is responsible for carrying signals from the CNS to different parts of the body, as well as for transmitting signals from the body back to the CNS. This system is responsible for maintaining the body's balance and for controlling movement.

The nervous system is also responsible for many of our emotions and behaviors. For example, it regulates the release of hormones that affect mood and motivation. It also controls the release of chemicals that produce pain and other sensations.

In conclusion, the nervous system is a complex and vital part of the human body. It controls many of our physical, mental, and emotional functions, and it plays an important role in our overall well-being.

by John H. Miller Jr.

Embry-Riddle's Developmental Reading Course was designed to help students overcome reading difficulties. However, recent studies have shown that the course is not as effective as originally thought.

When an executive or manager does not read well, they may miss crucial information that could affect the success of the company. It is important to ensure that all employees are able to read and comprehend information effectively.

The course is not a replacement for a master's or a doctoral degree. It is designed to help students who have had difficulty with reading and comprehension. However, it is not intended to replace the need for additional education or training.

The course does not promise to make a person a better reader. It is meant to help students overcome specific reading difficulties and improve their reading skills.

The course is designed to be taken at a pace that is comfortable for the student. It is important to remember that learning takes time and effort.

by Drew Kasai

When my 2 o'clock "hollow hole in the stomach" had about reached its peak, I decided to order some good, solid and filling Italian food. Just what the doctor would order on the way to the hospital.

I came upon Tony & Pat's Pizza, a cozy little place located on 30 N Grandview Avenue in the foothills of San Francisco.

After examining the menu, an unusual snack struck in my mind: Stromboli. At the recommendation of Tony himself, I decided to try it. After a very minimal wait of 8 minutes, my wife and I were served one Stromboli, at $1.75, sufficed for 2 and could easily have satisfied 3 hungry people. It was at least 15 inches long in its entirety.

The Stromboli consisted of a wide and long flaky pizza dough in which onions, peppers, ham, and cheese were enclosed. It was served piping hot and absolutely succulent.

Commenting upon the reasonable price for such a serving to Tony, he told us that his shop catered more to the year-round Daytana Beach residents, rather than depending upon tourist trade and consequently, he wasn't out to "rip anyone off."

 Barely able to finish the Stromboli and certainly well satisfied, I left with the ambition to try their pizza the following night.

Upon returning, I found the pizza to be of the same quality and quantity as the Stromboli. The crust was light and flaky, the cheese thick and rich and the sauce was delicious. The only slip-up was the mistake of putting tomato sauce instead of pepperoni on the pizza. When informing the waitress of the error, we were not charged for the extra topping.

I would rate Tony & Pat's at the top of your Italian eating parlor. Their food is savory, but the food is too good, the portions are too large, and the atmosphere is warm. Anyone who leaves Tony & Pat's hungry, can blame no one but themselves.

**EAGLES WIN OPENER**

By Jim Sheridan

This week was a week of sports beginning, the team rosters have all been turned in and there still remains 3 understudied teams: Delta Chi, Vets, & Numero Uno. By the end of this week there will most likely be possibly 2 understudied teams until the meets begin. Delta Chi plays Numero Uno, and the Vets play Lambda Chi.

The action past Sunday was once again an event to be witnessed in person.

**Delta Chi vs. Sigma Chi 17 - 1**

The first game of the day put undefeated Delta Chi against winless Sigma Chi, and Sigma Chi fans were not disappointed. The score was 17-1. The defense of Delta Chi only allowed 3 hits to Sigma Chi. This Sunday, two understudied teams, Delta Chi vs. Numero Uno.

**Numero Uno vs Lambda Chi 16 - 4**

What could be said about a team who has spread, power, and fielding? We won’t say a word about Numero Uno. They will just have to play all these scrub teams to see how they match their pitched this Sunday. However, last Sunday they ended Lambda Chi their second loss of the season.

**Fencing Riddle vs Stetson**

Coach Myron Bakst and his "Over the Hill Gang" seem to be on their way to a very successful season.

The first of a series of unofficial and semiformal fencing meets was held Tuesday night at Stetson University. The coach commented that the entire team’s performance was exceptionally good.

**VETS vs. SIGMA PHI 10 - 8**

It looked as though the Vets would have handed their first loss of the season by the hue of Sigma Phi’s score. However, the Vets opened the game with 7 runs and looked as if Sigma Phi would lose the Vets. However, the Vets came back with 2 runs in the first, 4 in the third, 2 more in the 5th and 2 more in the 7th. The defense of the Vets was solid, and they were able to win over Sigma Phi.

The Eagles jumpped to an early lead over the Wolfpack in the first inning, scoring 3 runs and tying the ballgame. The Eagles came back again in the fourth inning, scoring 4 runs on four hits, a walk, an error and a passed ball. Winning pitcher for the Eagles was starter George Carovillano. Bay Beller came on in relief in the fourth, giving up only two hits in the remainder of the game.

In the second game of the tournament, the Eagles played Western State College and lost a heartbreaker by a 5-4 score.

The Eagles led the entire game, accumulating a 4-0 lead going into the top half of the seventh inning. Brian Owens had a no-hitter going for six innings and had given up only one walk.

The seventh inning was a different story. The first two Western State batters got singles off Owens. Coach Brown brought in reliever Jim Hausmann from the right field. Hausmann struck out the first two batters. But then, one out away from a second Eagles victory, Western State hit a double, scoring two singles and a double, scoring five runs. The winning run scored on a double hit into left field, with left fielder Batsone.

This week in Sports

**Saturday March 17 thru Friday March 23**

- **Sunday March 18** Intramural Softball
  - 9:00 IPF vs. Sigma Phi
  - 10:15 Sigma Chi vs. Arnold Air
  - 11:30 Lambda Chi vs. Vets

- **Monday March 19** Varsity Tennis E.R.A.U. vs. Lake City Navy
  - Intramural Fencing 4:30 p.m. Gym

- **Tuesday March 20** Varsity Tennis E.R.A.U. vs. Stetson Invitational
  - Varsity Baseball E.R.A.U. vs. Delaware Home 1:30

- **Wednesday March 21** Intramural Volleyball
  - American League vs. National 7:00 p.m.

- **Thursday March 22** Varsity Baseball E.R.A.U. vs. Bellarmine 1:30 Home

- **Friday March 23** Intramural Fencing

Career Day

This year the ERAU Placement Office has planned a Career Day for Friday, April 6. The broad objective of this program is to develop a better relationship with their students and to utilize the skills and knowledge of our graduates. The day's activities are limited to those students who are in their senior year at ERAU, and to A11UW.

To date, we have firm commitments from the following:

- Aero Commander Division
- Alpine Engineered Products
- Beaconsentronics Corporation
- Cessna Aircraft Company

Placement and Employment

The Navy Recruiting Team will be on campus Monday, March 19; Friday, March 23.

- Graduate Employment opportunities received during the past week include:
  - Design Engineering - Cessna Aircraft Company
  - Airframe & Powerplant - Grumman American Corporation, openings in Savannah and Cleveland.
  - Airframe & Powerplant - Williams Flying Service, Fakukoki, Florida.
  - Operations Analyst, Air and Fire Protection Planning, Civil Engineers - Peleus, St. John and Associates, Orlando.
  - Flight Instructor - Punta Gorda Aviation, Punta Gorda, Florida.

LETTER TO THE AVION: ANOTHER BROADSIDE

Four years ago when I arrived at Harry Riddle, it was an Institute where you attended classes in a fairly modern academic complex, and at that time had a student center that was capable of handling the small enrollment of less than 1000 students.

Four years later, the new flight line is up, the academic complex has been enclosed, and the student center is still the same and now handling double the enrollment of four years ago.

This so called student center not only has inadequate dining facilities, but also offers no type of recreation or entertainment for the students. Then the Administration wonders why the students of Dormitory One are always so restless and damage school property. The obvious answer is boredom.

In a school that has one administrator externally married to soccer, and the other trying to create the perfect smoke ring, the result is a shabby trailer for a student center.

I'm still getting over the shock of the Holiday Inn's Riddle Specials of four years ago, as they attempted to serve us our meals with day old food. Well, you can see it didn't last long.

On a weekday between 11 and 1 o'clock, the student center looks like the scene for an air raids drill. The tables and chairs are so close together that you cannot walk between the seats. The cuisine of the student center, I must confess, is unmatched.

For breakfast or lunch you can have hamburgers, cheeseburgers, or chili dogs, and yes, even French fries and a milk shake. For seven days a week, 365 days a year, that's a good menu, that is if your name is Wimpy.

Yet, I can see the day when Riddle will have a modern student center with breakfast, lunch, and dinner, a bookstore that sells something else besides Harry-Riddle advertisements, and some recreational facilities for the students. I know that this is costly and that the education of the students come first, but I am sure that the great minds of the Riddle Administration can put a project for this into the budget someday.

At least by the year 2000 A.D.

I noticed that the whole Administration Building is being remodeled on the inside. Well, that's progress, and we must keep the people who run this school comfortable. Perhaps at the expense of others, but that's why they never bothered to turn on the air conditioners at Dorm One. I lived there for three years, and somebody was either mighty, or very stingy on the electricity bill or so slow that they couldn't tell the difference between summer and winter.

Well, what more can I say, except that I hope I graduate after this article is read by our leaders, and perhaps the students will get a little crowded in Riddle's Sardine Center and ask for a change.

Letter by Dennis Gerle
After The Hangerover, How About A Movie or Concert

by Marvin Stokes

Concert: The Florida Symphony Orchestra is in concert at Peabody Auditorium, Friday, March 16, at 8:30 pm. Guest soloist will be Erick Friedman, a sensational violin virtuoso.

Jerry Lewis: Cinema: "One More is back for another run. Lots of Clint Eastwood type action (PG)"

Masanova #1: "I don't believe they are holding over "Black Caesar". You have got to be kidding! (R)"

Masanova #2: "Bringing back that beautiful Academy Award nominated performance of Diana Ross in "Lady Sings the Blues". If you missed this one the first time it was here, you made a mistake and now is the time to rectify that mistake. (R)"

Halifax: Finally getting around to showing "Delivery", Academy Award nominee for Best Picture. This one is really worth seeing. Burt Reynolds and John Voight deliver moving and powerful performances as two of four men who start out on a fun-filled canoe trip. However, the trip turns into a tragic one. Very, very good. (R)

Big Tree: Holding over X-rated double feature: "Oh! Calcutta!" and "Fritz the Cat". Both of these features are worth the time. "Fritz" is coolly sarcastic. "Oh! Calcutta!" on the other hand, is a quite sophisticated farce about sexual hang ups.

Cinema: "The Life and Times of Judge Roy Bean". Paul Newman stars in this movie version of the fictional character who declared himself "the hanging judge and the law west of the Pecos". The movie actually holds pretty close to the real life of the cantankerous old judge, who had the audacity to name his town Langtry, after the most idolized actress of the time, Lillie Langtry. Judge Bean consulted no one about the name change, not even Miss Langtry, who he never even met. This will no doubt be one of Newman's best roles and the movie should be one of the better ones this year. (PG)

Daytona: "The World's Greatest Athlete" is being held over and I can certainly understand why. Tim Conway is at his funniest, Howard Cosell is, well, Howard Cosell, and Jan-Michael Vincent portrays Nano, the jungle boy, as convincingly as Johnny Weissmuller portrayed Tarzan. This is truly excellent family entertainment. (G)
