Embry-Riddle Invades Model Senate

by Mike Tallman

Embry-Riddle will have a continuing program of sponsoring student participants in the annual Model Senate Workshop. According to Staton sources, the workshop will attempt to educate high school students on the atmosphere of the Senate in its program of general and special sessions, party conferences or the committee meetings at which the Senate will play the role of the senators themselves.

The ERAU contingent will portray the legislatures from New York and Montana: Ron Nyhan - Jake Buckley, N.T. Pam Burke - Jacob Javitts, N.Y. Tom Waltz - Mike Mansfield, Mont. Richard Biz - Lee Metcalf, Mont.

According to Ron Nyhan, topics to be considered by the Senate will be those of current interest: taxation, busing and curtailment of executive power.

Working with its advisors, Dr. Apperson and Mr. Campbell, the Embry-Riddle representatives have committed with utmost resolutions which will be taken up in committee during the workshop.

Mr. David Apperson, Chairman of Embry-Riddle's Aeronautical Engineering Division, will be justifying before the Aero-space Appropriation Committee on Saturday. His expected testimony is expected to convince the Appropriation Committee to provide funds for the project.

The conclusion of the workshop on April 15, will be given in the following areas: most effective committee, best committee chairman, most influential senator, best characterization of senatorial role, and most outstanding piece of work on the Senate Workshop.

ERAU walked away from last year's Senate with two awards:

A&P Broken In

On the weekend of March 24-25, the A & P hanger at Daytona Beach Aviation was broken into.

The thieves stole the tool boxes of three of the Airframe and Powerplant instructors of the KC-15 class as well as the mechanics' tools and several pieces of equipment.

The estimated loss of the tools and equipment runs into several thousand dollars and it will not be easy to replace.

This presents a slight problem to those students of the A & P program, especially those students who are now attending those classes from which the equipment was taken. But one of the A & P instructors, Mr. Robert Doyle of Kansas, has worked on the Intellectual property of the Senate Workshop.

A& P Broken In

The shop will be opened on April 12 with a keynote speech by the real Senator Mark Hatfield of Oregon.

Before You Go

Leaving ERAU Whether permanently or temporarily, all students must leave your forwarding address and number with Dean Spears office.

The effective date of departure or return date are important because.

Mailbox combinations are changed during the break.

A& P Broken In

The shop will be opened on April 12 with a keynote speech by the real Senator Mark Hatfield of Oregon.

Leaving ERAU Whether permanently or temporarily, all students must leave your forwarding address and number with Dean Spears office.

The effective date of departure or return date are important because.

Mailbox combinations are changed during the break.
THE PRESIDENT'S CORNER

This will be the last opportunity that I have to congratulate all the graduating seniors. Good luck to all of you in your future endeavors, and I hope you will find time to write back and let us know how you are doing.

Graduating Seniors Note: If you have not yet stopped by the Phoenix Office, please do so now. You must submit to them your final expense account and any additional charges due for your yearbook.

SGA Dance: The last dance of the trimester will be held on April 14, 1973, at the Desert Inn. Starting time will be approximately 8 pm. Acting President William M. Spranage will provide, without delay, the continuous music for your dancing and listening pleasure. The same weekend will find the Administration stage Band. (They are good:) A lot of you have already seen the advertisement concerning this event. Emphasis will be placed upon the atmosphere of the dance. Administration will be issued guest passes and tickets at a nominal charge as usual, B.Y.O.B., shirt and tie, faculty and administration welcome.

Parents Weekend: As most everybody already knows, our parents weekend of April 21, 1973, is loaded with all kinds of activities for students who are interested to attend. First of all, the last Alumni/Parent Dinner dance will be held the evening of April 19, starting time at 7 pm, and a buffet dinner will be served at 8 pm. The quest of honor will be our Chairman of the Board of Trustees, General William M. Spranage. At the dinner, music will be provided by the Bethune Cookman College Stage Band. (They are good!) A lot of you have already seen the advertisement concerning this dance. This dance was originally scheduled to take place at the Greek Community Center. Please note that the location has been changed from the Greek Community Center to the St. Augustine Hotel. This location is located across the street from the Florida Power & Light Company Building on Midgetwood Avenue. You can get more details on this dance by contacting Betty Bond in the Administration Building. Tickets for the dance can be purchased at the Special Activities Office, the lobby of the Administration Building, at the Dormitory, or at the Library in Building A. I urge all students to attend. I think we will enjoy it very much.

Parents Golf Tournament: The annual Parents Golf Tournament will also be held in conjunction with Graduation Weekend. The Golf Tournament will be at Tomoka Oaks, on Friday, April 20. All students are invited cordially to participate. Once again, you may contact Betty Bond for further details. May I point out that you do not have to be a good golfer and you do not have to have established a handicap to participate. The Caddie system will be used.

Fishing Tournament: The same weekend will find the Parents Association hosting the "Smiling Jack Deep Sea Fishing Tournament." This will be conducted on Saturday morning, April 21. Prizes, awards, and lots of fun are being offered in all of the above mentioned activities.

Due to graduation and other circumstances beyond our control, the following persons have been appointed and approved by the SGA Senate to the respective positions: The new Vice-President of the SGA, Mr. Richard DiPietro; and the new Chairman of the Administration, Mr. William M. Spranage. Mr. Spranage was elected by a majority of the students from the many candidates existing on campus. I have made some enemies during my tenure, but I don't feel like bothering to honor them with a name in print. Therefore, to hell with it.
by Terry F. Gardner

I with 300 hours of C-172 yourself
was mentally exhausted
pre-flight.

Terry had neglected this dur-

Ted's landing at the airport was uneventful
for a change, but he was quite surprised to see
all his old friends lined up at the ramp for a hearty
reception.

There was Captain Ceput
popping out from behind a butt can, Fran Flap,
Timmy Tornado, Tommy Twobars, S.B. Dumas,
Terry Trumpetmouth, Wilbur Wopnop and even old Terry Treadman who dropped by to check
out all the excitement.

As usual, Ted didn't
get in too much trouble. By the time they
had been hung from the nearest VHF antenna and down into the corps.
Purely by acci-
dent, Ted, administration coordin-
ar, Terry Throttle's IBM card with his
golf shoes, punching the proper holes in the card
so that Ted had passed the
course old as an "A".

Winters couldn't understand why no one had noticed the
lie that he did. Most of
the other dudes actually
praised him for his
vers faithfully as the ad-

Humphry-Dumpy dogmatic-
ally claimed that the aviation industry was
wide open with jobs aplenty.
Yes, anyone with 300 hours of C-172
time could easily land a
right seat position with the
twin's airplane.

Do you know what...? Throttle
bottles went completely
bananas and began scram-
bling around the cockpit
flipping every switch, knob and control he
could get his hands on.

With no success, the en-
gine emitted a systema-
tic staccato of coughs, but would not start. Ted,
no longer able to
let someone know of
his plight, inadver-
ently, the microphone
cord caught on the fuel
selection valve and pulled it back to the "in-
flight" position, where it should have been
the first place. Ted
had neglected this dur-
ing his usual thorough
pre-flight.

Like a new-born baby,
the engine was equipped
life and with a sigh of
relief, Ted roared off
once more with a narrow
escape. He had
learned much from this episode as usual, but
was mentally exhausted enough to call it a
day.
It's That Time Of The Year

Duane Allman: An Anthology

by Bruce R. Macomber

This album is a collection of the works of a great artist. Duane Allman, a once-in-a-lifetime guitarist who, no matter what he was told to play, would always choose to play by himself, remained in focus without overwhelming the session, the song, the group, or the artist. Allman's tower will. The album divides Duane's albums into two parts. The first part centers around his role as the resident freak at Rick Hall's Muscle Shoals studio, where all of the non-Memphis heavy rockers were being recorded. Songs like "Sweet Little Angel," "It's My Own Fault," and "New Blue Can You Get," taken from his Honolulu days, suggest Duane as a piercing, directionless lead guitarist with chops that easily equalled the likes of Bloomfield, Johnny Winters, or Cleaver.

Part two consists of Duane's experiences as backup musician for Jerry and Atlee Aschea ("The Beal"), King Curtis ("Games People Play"). But to mention thelayo sessions is to mention where Duane and Playbov's lead guitarist came both. the year, lead. Phoebe incorporates more of his backup.

The big question of censorship is, does the American public really need to be protected? With the invention of the printing press, a new dimension was added. For the first time, news could be spread rapidly and people in many far away places. The only problem is, the modification or change of the news by a censor.

The First Amendment states, "Congress shall make no law prohibiting the free exercise thereof, or abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and to petition the government for a redress of grievances."

The First Amendment stands for, but freedom of the press is suffering a slow stranguation. This is caused by the pressure put on the press by the government.

Duane plays with Bob Scoggins ("Loan Me a Dime") and John Paul Hammond (Willie Dixon's, "Shake for Me") not to mention an accidental gig on Delaney and Bonnie's "Po' Fun" ("Livin' on the Open Road"). Duane also worked with Johnny Jenkins to "play 'Sollie' Stone" and "Down Along the Cove." Sam "Old World" is a previously unreleased duet with Duane and Eric Clapton. One of the highlights of the album is the vocal cords for the first and last time recorded in "Goin' Down Slow."
On Becoming Self-Actualized

by Sid Dines

Every one of you has the potential for learning ability nearly as great as you can make your reaction time an equal amount, you are not more efficient with which to perform any task. This increase physical and mental tension, creativity, productivity, perceptual awareness, and well-being, as well as quitting smoking.

There is a way: Major General Franklin M. Davis, commandant of the U.S. War College, knows it; so does R. Buckingham Fuller, Engineer, Architect, Philosopher, and recipient of more than 25 honorary degrees. The President of the American Academy of Arts and Sciences, Dean of Engineering and Applied Sciences, Harvey Brooks also knows the secret. In fact, the number of people learning to cope with stress is growing at a rate of about 10,000 per month.

The key is Transcendental Meditation—T.M. It is a unique technique practiced for 15 minutes morning and evening. It requires no effort, no change in life style, and is easy to learn. The practice of T.M. is a means to the inner world of India so they could experience the clarity of mind, courage, strength, and increased efficiency which it provides. The technique was lost for centuries but has recently been recovered and is now being taught world-wide by Maharishi Mahesh Yogi.

Meditation requires no kind of belief. There are no special rules. There is no art; mysticism is involved. It is not yoga, concentration or contemplation. It is not even mind-stimulation as is sometimes reported. It is as Maharishi tells us, a systematic procedure of ‘turning the attention of the mind toward the subtlest levels of the mind, transcending the experience of the subtletest state of thought and arising at the source of the mind itself.

This is not just another fad. The extent of its present use, the scientific research being conducted, and the caliber of people endorsing it all claim otherwise.

The practice has been used by the major Aluminum Company, the Strategic Air Command, scientists at the Houston Space Center, astronaut Russell Schweikart, Hall Street brokers, Army generals, and State Department officials. The Peace Corps Line, which has passed a resolution calling for all educational institutions in the nation to study the technique, has drawn a General Franklin M. Davis urged the Army to support this research. But the Doctors are studying the effects of T.M. on such varied ailments as high blood pressure and drug abuse.

Studies of the effects of T.M. on drug users were particularly impressive. Of 143 marijuana smokers, 84 percent stopped and 15 percent reduced use. Of those who used hallucinogenic drugs, 86 percent stopped and 14 percent decreased their use. Of the 42 heroin users, 86 percent stopped and 14 percent decreased significantly.

Recently, Mr. Ron Henshaw of the Students International Meditation Foundation, a Detroit organization, was on the ERAU campus lecturing on the Science of Creative Intelligence (SCI) which is the over-riding focus of T.M. and applies to. If sufficient practice is given it is theoretically possible that an SCI course with academic credit may be offered here.

At present, there are two routes one can take. If you are interested in learning T.M., SICS offers a course to students for $45. Instruction requires only four hours each day for four consecutive days. After personal instructions in a private appointment, three meetings for verification of correct practice and further instruction are conducted. No further training is necessary.

If you are interested in the theory as well, SIMS is scheduling an SCI teacher training course here in Daytona Beach starting the last weekend in April. As well as teaching the entire theoretical knowledge of SCI, meditation in practice and, upon completion of the 8 week course, an SCI teacher’s certificate is awarded. The certificate is worth academic credit at Maharishi International University toward the B.S. in SCI. The possibility of academic credit at ERAU is good since many other universities now accept it. The cost is $125 to those who already meditate and $150 to new students who want to include the initiation in the course.

Further information is available from Mr. Henschaw at SIMS, 112 12th St., in Holly Hill, phone 265-1011.

Our Forgotten POW's

by Art Jacobs

All of our prisoners of war from Southeast Asia (according to the Communists, that is) are now back home in America. The media have initiated a refreshing display of patriotism and concern in this country. American hangers-on of highbrow influence partly in part, have been satisfying the likes of these men and have been commendably quick in paying homage. Perhaps we are unadvisedly rationalizing our past decade of errors, but few can argue that our POW recommissions have not had a beneficial effect on our nation.

But hold on, my friends. It is my opinion that our rejoicing up at home and our wear capsule plaudits have arrived much too late for the overwhelming majority of POW's who have been back for years. While Congress has voted on a special pay allowance for prisoners, and mayor across the country are offering-up keys to their respective cities to any Americans who are languishing in VA hospitals, we are more often than not, either under-staffed, ill-equipped, or poorly financed.

There have been no parades for our emputee and permanent disabilities. No crowds of well-wishers have jammed the airfields to welcome your aircraft. No one has asked them to recount the misery and suffering of their ordeal. Lying in a rice-paddy shuttered and disfigured, radio news-casters have chucked to report how many steaks, beverages, and pizzas they have consumed. No parties and receptions for them, just standing in pitted glances as we rush by, avoiding their eyes. These are our real prisoners of war, but you haven't seen any bumper stickers for them.

This horror has touched a lot of America. It is somewhat we have managed to adjust and continue our lives in a relatively normal fashion. At least one thing that is easy if you don't have to go and notice and the world under the shawls of your legs used to be, or try to hug your children with one arm. Have we done enough? No way in Hell!!!

Don't misinterpret this article. I am in no way trying to diminish or lessen the deeds and sacrifices of thousands of men who were held captive in the jungles and jails — they are heroes and deserve to be treated as such. However, a reassessment of priorities and sympathies is in order.

My only intent is to make you aware or re-emphasize that there are those who have unsurprisingly suffer the trauma of war for the rest of their lives. They are in psychologically, and physically stressful that no amount of counseling or goody-goody psychology can completely cure. Beginning a lifetime sentence at 20 is hell from any perspective.

By now I hope you are asking yourself, What can I do? Please retain this attitude, because I am asking you help. I am presently in contact with the National Troops and its Disabed American Veterans and am hoping to start a campaign to help, early childhood. Volunteer aid and fund raising will be the areas of concern. Look for my next article in the AVIATION NEWS TIMES.

Thank You
The Launch Of Skylab

by Greg Radin

On May 14, 1973, Skylab, the first space station, will lift off from Kennedy Space Center. This will begin a new era in space exploration.

Skylab is mounted on top of a two-stage Saturn V launch vehicle, which is assembled and launched at KSC. Skylab and its payload rises 114 feet, giving the rocket a total height of 333 feet, 30 feet shorter than the Apollo vehicles. Large parts of Skylab are folded and covered with a shroud which "provides aerodynamic streamlining." Once in space, the cover will be blown off and the solar panels and the antenna with its three elements will unfold. The interior volume of Skylab is over 12,000 cubic feet, about the size of an average three-bedroom house, according to NASA.

The first three men crew will spend 28 days working on projects ranging from studies of the run to actual tests in bio-medical science. Manufacturing techniques in outer space are among important research projects for which Skylab is equipped. Unlike previous Apollo spacecraft, Skylab will be reusable and serve more than one crew in its lifetime.

Within the coming year, astronauts will live a total of 140 days in Skylab. Skylab's Apollo spacewalks will be the primary shuttle transportation between earth and Skylab.

May 15, the day after the Skylab launch, a Saturn V-i vehicle will carry an Apollo capsule and three astronauts into space. The moon lander will dock with the space station. Shortly after the astronauts have transferred to Skylab, their work begins with checking out all systems and equipment aboard. Their first task will last 28 days in which many experiments will take place.

PEGASUS REVIEWED

From a moving poetic expression by Tejinder Singh Ahluwalia through twenty four pages to the striking and sensuous woodblock print by Jim Amstrong, Pegasus '73 is a literary surprise.

With quality as a keynote, the totally new publication presents the various artistic talents of the Embry-Riddle contributor.

The layout, choice of paper, and usage of type create a harmonious blend of graphics and prose. Although readers will respond differently to specific expressions, the overall "collage" is an enjoyable experience.

Pegasus will debut at the Academic Complex Forum Tuesday, April 10, 7:30 PM in the Academic Complex and, in this reviewer's mind, a certainly underpriced at $2.50 per copy.

E-RAU STUDENT RUN FOR MAYOR

by Vaughn Lane

Joe Syalo, a junior at ERAU, has decided to apply for the mayor's position. He has learned that he will not be attending college this year. Syalo's campaign is a basic, grass roots appeal to the people. A person to person campaign with word of mouth communication will be the means to become known.

Ironically, these same tools are the only way city residents can express their desires and problems. Since money can't buy honesty and sincerity, Syalo favors his student economic situation is no real handicap. Walking a two-way street is the only way the future will be a successful city government--in any city. Joe Syalo is pushing to be the youngest mayor in Deland. The challenge of his undertaking is great--and so are his ideas and enthusiasm.

New Food Center

"Good" is the general student consensus of Dorm I's new entertainment area, a recent on-the-spot survey showed.

When asked their opinion, most students had little to complain about in the food department, however, they want to see a few changes in the game room.

Sands was praised fairly often above average quality, service and opening hours, though many desired larger portions and variety. Mr. Robert Kasane, manager of Sands (Food Service) plans to replace some of the starcher meals with meat items. The manual food service operation, he said, was set up in accordance of the State Food Director and that the system is similar to those Sands operated throughout the state.

He also commented on the satisfactory sales of counter meals to date.

On the other hand, the food machines still tend to eat coins at night, as only a Sands vending machine could.

The entertainment devices are either new or well made. Dorm I Counselor member Charles Auger said Monday that some of the machines (leased from Bryan & Brown Co.) placed in the area were not asked for, and subsequently, are not used. These may be removed for the addition of another air hockey table.

The juke box brought dissent for not taking dimes (and for not being free!). Finally, the largest outcry for improvement lay with the needed addition of more tables and secondly - more girls!

VOTING POSTCARD

JOE SYSLO
MAYOR OF DELAND

All you smokers who plan to quit someday:

Can you throw away that pack right now?

It's not easy, is it?

In 20 years, after 10,000 more cigarettes, you think it's going to be easier?

Don't kid yourself.

Quit now. You'll never get a chance like this again.
LIEUTENANT WHO?

Nothing is as permanent as death, the final, irrevocable payment in the scheme of things. I'm not mad about it, but I have never gotten accustomed to it. The thing that strikes me as odd about death is that I forget or quickly forget those who have gone on to Fiddlers Green, that special soldier's heaven. Faces blur then disappear from memory, names become difficult to remember as if the person had never been born, lived or died. Death almost promises anonymity.

And yet men risk death freely and willingly for a cause, a principle, for glory, to prove bravery, for patriotism, or simply for money. They laugh at death, but don't talk about it; ignore it, but never lose the nagging presence of it. But mostly they just don't think about it. I am as guilty as they.

It was in the late afternoon of a Sunday in 1966 that I understood the reality, the finality of death as the plain wooden coffin of a fellow aviator hung unceremoniously, but gently, into an Air Force cargo plane to be winged home for burial in a military cemetery. Later, in our bivouac area among the rubber trees of an old French plantation near the Cambodian border, I sat through the dusk and, into the dark pondering his death. How long would it be before he would be forgotten? Who would remember his laughter, his vitality, his love of life, his bravery in that last final moment of life? Who would remember his death? Who would remember him?

Under the dim light of an unshaded bulb over my canvas cot I reached for pen and paper and wrote these words as I felt might say them from the stillness of his freshly filled grave:

They surround me now with flowers, quietly placing them around the monument in orderly profusion. On the newly spaded ground, I hear a whisper softly, and feel their tears drop warm, but it does not matter to me. For I have passed beyond the storm. It does not matter to me now, the throbbing of the pain. Death has stanching my warm blood's flow and dulled its bright red stain. For me the war has ended, leaving here this shattered form, but it does not matter to me, for I have passed beyond the storm. With sights eyes I gaze around at crows row on row and cannot help but wonder: Do my people really know?

Do they know why we are fighting, quietly riddling shot and shell? Why we held the steaming jungle, though so many gallant fell? Around me lie our heroes, men unafraid to die who took the torch of Flanders Field and held it once more. High, now they, too, have faltered, the freedom's torch must pass again. Will you take it from their failing hands, or have they died in vain?

He was a good guy. The type so aptly described by the cliche "only the good die young." Full of youthful vigor and bravery, a real soldier's soldier.

I often wish now that I could recall his name.
