Future SAC Team Will Strengthen Arsenal

By SACEAPPO

The Strategic Air Command of the 1980s will be equipped with one of the most modern and sophisticated teams of any arsenal in the B-1 and B-52 Strategic bomber and the SRAM (Short Range Attack Missle).

Although still in the development stage, the B-1 is planned as a carrier for the strike missile to do in the 1980s the B-52 and the FB-111 are doing today.

The B-1 is designed to fly at twice the speed or sound at high altitudes and about 700 miles per hour at near-cruise levels. It is being develop

SAC expects delivery of its first production model B-1 in 1979, but it will be late 1980 before an initial operational capability of 65 aircraft is attained.

The variable sweeping B-1 will be manned by a crew of four and powered by four turbofan engines. Small in comparison with the B-52, the superbombardier radar image should be about the same as that of the B-52.

The need for the B-1 has been stressed by the Air Force Chief of Staff, General John D. Ryan and many other military and civilian aerospace leaders. The one pressing factor, however, as the aging B-52 fleet which has been in the Air Force inventory since 1954. Even the newest B-52s have already been around for 10 years.

The SRAM (Short Range Attack Missile) which is able to follow the terrain or take a semi-ballistic (higher arc) path to a target, will provide the bomber with a "stand off" target strike capability regardless of terrain or point of launch.

Another unique feature of the SRAM is a 360 degree targeting capability which allows it to be released while the aircraft is flying parallel to, or away from a target. Google SRAM's capability with the prelaunch survivability, increased quick reaction time and safe escape distance features of the B-1 and they will make up one of the most elusive deterrent teams ever in the SAC arsenal. Also, shorter runaway requirements will allow the SRAM-equipped B-1 to be effective in very small airfields thereby complicating the enemy's offensive tactics and prolonged the F-111's are doing today.

The Florida Chess Association is holding the Florida State Open Chess Tournament beginning August 31, 1973. It will continue for the duration of that weekend. It is to be held at the Quality Hotel Oceanside, 8675 Atlantic Avenue in Ormond By the Sea. Prizes will be awarded to the winner and second and third and fourth place finishers in each of three divisions. This event is being hosted by the Sigan Chi Fraternity. Further information can be obtained by contacting Juan Puchelman SCA Membership Secretary, Florida A&M, Tallahassee, Florida 33314.

The light scattering of the earth is about normal. There are always a few faculty members who show up for these school functions. However, I hope those who attend will not do so to make others want to know if the rest of the faculty didn't go or if the word or perhaps they are just ignoring us.

Moat Monster Murdered

Dormitory I had a mascot, a two foot alligator. It had been a resident of the moat in front of Dormitory 2 for approximately two months. During the time it resided in the moat the alligator became very popular with the resident students. Sally, an attender who provided his with his favorite cuisine, hotdog owners.

Until July 17, no one attempted to catch or molest the alligator; but on that fateful day, a student, who was unfortunately anonymous, pummeled the creature to death with rocks. This thoughtless student was observed by a fellow student and advised that he was violating the law, he momentarily desisted, then, after that student left, completed his ghastly project. The Florida Union Commission has been informed of the crime and is concerned against the student.

The Game Commission is also attempting to locate a new alligator for the moat. If a new alligator is placed in the moat it will probably live under very close scrutiny.

Proposal for Action By The Academic Council of Embry-Riddle Aeronautical University

Until September, 1972, the acceptable percentile rank for course accreditation on the USAF End of Course Tests was the twenty-fifth (25%) percentile. After September, 1972, the Academic Council of Embry-Riddle Aeronautical University raised the acceptable percentile score level to the fiftieth (50%) percentile. This level will be enforced until the beginning of the Fall Trimester, 1973, after which the accreditation level will be lowered to the twentieth (20) percentile.

We would like to submit that the action taken by the Academic Council was designed to raise to the rise and fall of the acceptable percentile level, poses an inequity to the students who entered during the September, 1972 through September, 1973 period.

In order that this inequity might be erased, might it be proposed that the percentile rank of students who entered during the September, 1972 through September, 1973 period be lowered to the twentieth (20) percentile.

The students and faculty are not taking advantage of the SGA activities. During the school year, the SGA spends tens of thousands of student dollars on entertainment of which the several Bar-B-Que comprise a large amount of the total expenditure. This past Saturday was just such an event featuring, all the hamburgers, barbeque and potato salad that could possibly be eaten with plenty of beer and coke to wash it down. All paid for by you, the students with your trimmest contributions to the SGA.

The cooking was done by the Sigma Chi Fraternity who also kept the beer & coke truck operating.

If you missed the past SGA functions you have missed an opportunity to meet your fellow students and the faculty in a very relaxed atmosphere. I urge you to make SGA functions a part of your college social life. The fun is all yours—take advantage of it.

The light scattering of the earth is about normal. There are always a few faculty members who show up for these school functions. However, I hope those who attend will not do so to make others want to know if the rest of the faculty didn't go or if the word or perhaps they are just ignoring us.
ON THE LINE

When the mercury starts the steep decline to the old thermometer and Mr. Bass decides to head for the summer retreat in the deepest, coolest hole in the lake, it's time for you to get harder and harder. Some fishermen tie up the old boat for the season and drift from the water when faced with odds of long odds, but especially if they have not had the opportunity of receiving a sound fishing education. And, in keeping with the "Middle of the Future" principle of teaching their students to understand and deal with the many complications of the natural world, I will suggest a method of catching bass during those hot fishless months.

Because of the high water temperature Mr. Bass spends his days tucked in some cool hole but after the sun is down he heads for the shore of the lake where he can catch a few bass with a frog or two. With this information we can provide you with a "fishing boat" alternative.

A few of the night anglers will work with the old plastic worms but the more successful ones will use a night fisherman's most important thing to remember is to keep the plastic out of the water. The next question is what to do when the fish are gone. We have found that using a light tackle is best. The light tackle allows you to feel the fish and gives you a better opportunity to land it. Several of the best places to look for bass are the shallow areas near the shore. Many bass are caught in these areas.

The Avion Staff

PLACEMENT

Please complete a Qualification Record for our files prior to your leaving the University. We have not already done so.

The new Aviation Employment Report (705) is here. It contains a number of general copies which may be borrowed.

There are many employment opportunities for flight instructors and aviation engineers with our Powerplant technicians.

Longview High School, Longview, Texas has a position for an In-Training instructor in general aviation courses and primary flight instruction.

Pan American Goodyear-Tex, Jacksonville, Florida is looking for a managerial position out of their North Carolina office.

PART TIME EMPLOYMENT

If you are seeking employment at the University or in the local area, stop by and contact the Placement Office and make the available connections. Perhaps we can assist you.

Interview

DEAN SPEARS

Dean Spears has had a long and successful career in aviation that has helped him perform his duties as the Dean of Men. Due to the pressures of the Vietnam veterans and the standards of EAU have risen substantially, since his arrival.

Dean Spears served 27 years as a member of the Air Force and was a high percentage of them spent in Vietnam. As a result of his service, he was selected to serve as Chief of the Military Air Force of the United States Army, in which capacity he was responsible for the development of 17,000 military officers. In addition to this assignment, he has been commander of all Special Forces units in Vietnam and worked on the development of world-wide limited war doctrine at Fort Bragg, North Carolina.

There has been quite a change in the nature of the Vietnam veterans since his arrival at EAU in September 1967. In this context, the majority of these students were classified as Pro-Pilot or A & F. A large majority of these students were Vietnam veterans and they had a lot of time to avoid the draft.

Dean Spears indicated that the majority of his efforts were directed toward a more disciplined and orderly student body. The students at EAU were with accreditation in late 1968. At this time, the university was involved with the academic standards of Pro-Pilot or A & F. This was due primarily to the influx of Vietnam veterans.

The university's standards for EAU have risen substantially, since his arrival. Dean Spears served 27 years as a member of the Air Force and was a high percentage of them spent in Vietnam. LETTERS TO THE EDITOR

Dear Editor:

I have to take it for granted that you have not heard of a University for too long a period of time. I approached last week’s editorial with a positive attitude, which I feel is good. However, I do not agree entirely with this attitude. All too often we have seen this initial charge of exuberance become bogged down with time, and slowly dissipate until the intentions are good, but I tend to think that they won’t last.

I have been at this school since the summer of 1969. When I finished high school I was interested in obtaining an education in the aviation field. I looked around and found that Embry-Riddle would be my best choice. When I first came here the "University was an "Institute." But shortly after, they added a few courses, the air force helped with funds, staff, received accreditation, and attached a "University" to the name. They could have attached any name to their two founding fathers. The name in fact, does not represent reality. I do not intend at this point to go into the differences between a "University" and an "Institute," or any other title. An exact definition probably will not be possible. I will use the word "University" in terms of atmosphere. I attended a few so-called "Universities," and have noted the different atmospheres. Again, unless one has been to a major University and knows what it is like, one cannot readily describe it.

This school does not have this "University" atmosphere. It will never have this atmosphere as long as the percentage of active (Cont. on page 4 Col 2)

I believe that communication is the key to understanding people and that it is a vital necessity for the improvement of our society. In line with this thought, it is my belief that a forum such as this be a forum for discussion and not discussion should not be limited. Perhaps all of the discussions should not be the only place for meaningful discussions to take place and that these discussions should not be limited. Students need discussion with other students and teachers with other teachers. Certain managerial techniques could be employed to stimulate discourse. Perhaps a solution to this problem would be to form an active teachers organization. Are you aware that this university does not have just a teachers organization of any kind? It is my observation that usually teachers put in their all to prepare the classroom and office hours properly, and give their best. If a student doesn’t bother to search out the instructor during these designated times he may be out of luck. But in this respect the blame does not lie entirely with the instructor but must be shared jointly with the student. That is to say they drive to class in the morning, attend class and leave as soon as their last class is over. After the study of their obligations to students and teacher to student, to our present lack of students is evident in the late comers and unpreparedness of the students. I know there were a few occasions arrive for us to meet and talk in an informal setting, yet I think the few people who come to class are the only ones capable of seeing the whole picture and that only they can direct the master plan.

I upsets me to hear unfounded rumors about the quality of this university. It seems they usually stem from the non-political classes but are quickly applied to the whole. The best way to counteract this is to allow opinions to be ventilated officially and to allow a forum to exist where questions can be answered frankly and honestly. Communication is the key.

Notes From
The Senior
Class President

The senior class held a meeting on Monday, July 23, 1973.
Mark Shoemaker was elected Senior Class Spokesman and Bill Maxwel the alternate.

Invitations for the Senior Class Banquet were also available at the SGA office. The party will be held at the Greek Community Center, 129 North Halifax, beginning 7:30 P.M. on Wednesday, August 15. From 7-7:45 P.M. there will be an open bar and a full menu of hors d'oeuvres. After 7:45 P.M. set ups will be provided and music will be furnished by the "DJ's." The invitations are for all August and June graduates and one guest. Additional invitations can be purchased for $3.00 per guest at the SGA office.

Graduation ceremonies will be held at 9 A.M. behind the dormitory, on Friday, August 17. Graduating seniors should plan to arrive by 8 A.M.

Ron Nyhan, President
and non-active military personnel remains as it is. How do we get the wrong idea by this last comment? I assume that the military does not train its 

personnel to fit into this atmosphere. Nor do I ever think it should. I think I can however relate to you a few reasons why this atmosphere is, with a high degree of military personnel on campus, will never be attained.

The first reason is that the majority of military people on this campus are married. Therefore the social need for them is fulfilled and they are relatively satisfied. The next reason is that the average military individual on this campus is older, being older, and some times more mature, the military individual thinks and acts differently than that of a non-military. In some respects it is different, and I feel he is more so as much more along the conservative line. The particular personality type of the military individual is "University" atmosphere.

Naturally, the military tend to stick with the military and develop. It is clearly evident that factions have developed on this campus. These factions of military and non-military on this campus can be especially seen in the classroom. The military individual, using any number of techniques, tries to squeeze all possible information from examinations. Much to an instructor's dismay, he is constantly hounded to get the wrong idea by this last comment. I assume that the military does not train its personnel to fit into this atmosphere. Nor do I ever think it should. I think I can however relate to you a few reasons why this atmosphere is, with a high degree of military personnel on campus, will never be attained.

To bring up the subject of examinations. I would never recommend Embry-Riddle to any prospective student. Not faulting the academic system, I feel the quality is generally adequate, it has only got out of an education what he puts into it. (How many times have you heard that??) What I question is the environmental balance. Realistically, what has this school to offer the non-military student in the way of social functions other than a backbone every month or fraternities which are so disorganized or either disbanded or going bankrupt?

I truly feel that a school should be necessary to attain a good academic environment or vice-versa. However, critics of this theory will say, "Are you going to school to have a good time or study?" At major universities there are endless social functions from which a student has to choose. However, I seriously doubt that it will.

The editor mentioned that every course he has taken here has been professionally conducted. This is another factor which leads me to believe that the school has never been here very long. I will make an assumption that most of the student body (excluding the editor) on this campus has attended at least one course which was not conducted professionally. I have taken many courses which I have taken at Hiddie University and have to meet University standards. If anything I realize that in any College or University throughout the country, one will find many courses that don't live up to standards. I have taken a few courses at another school and found them in particular, was more professional. When the editor sits in on a few courses, one would want to reiect his statement. One might begin to question whether or not the editor have many courses that I feel are on the same level. Let face it, if the word not, the school would not be accredited.

The editor was not able to be directed toward the administration; I realize that this was defensive in order to find all the amenities of a large University, or the funds in developing any sort of a military type. Having ERAU The first reason is that the military there are risks involved more militancy that there is a military type. Someone years, with present military, one of the educationalauration point will be reached. Hiddle seems to operate with the idea or educating the military. In a few years, there may be no more military to educate. In the future, they might have to go into high schools for recruitment, facilities the way they are now, this recruitment might become a problem.

For four and one-half years I have picked up many Avion's and read newspapers. I did not agree with any of them. But, I also have cropped-out to this great feeling of student apathy and failed to voice my opinion. Now a large part of my last month, I've had my say. I hope Mr. Editor that your editor, I would like to see this letter will continue throughout the rest of the paper androught. If I am wrong, I am not afraid to admit it. I seriously doubt that it will.

Harvey L. Shuman
President Corner

There are many committees of the University on which students serve. It is very important to each of us to transfer information, complete, etc. to the individuals concerned so that they may have a better input to their respective committees. The following is a current list of students serving on the various University committees:

1. Faculty/Student Conduct Committee: This is a committee established to provide a hearing for students in order to protest the interests of the student and the University. The student members are:
   - James Cagle ERAU Box 104
   - Stanley Newberry ERAU Box 308
   - William R. Blackburn ERAU Box 001
   - Robert Elsworth ERAU Box 040

2. Student Publications Policy Committee: This committee is established to govern the quality of publications and to protect the interests of the students. The student members are:
   - Tim Swell ERAU Box 046
   - Jim Kusan ERAU Box 4246
   - Sid Dines ERAU Box 024

3. The Academic Policies Committee: This committee is responsible for recommending policies in the areas of academic standards, credits, quality control, graduation requirements, etc. The student members are:
   - Morris Ford ERAU Box 0397
   - Wayne Jones ERAU Box 4246

4. Program/Curriculum Development Committee: This committee is responsible for guiding and recommending the development of new degree programs as well as the expansion, improvement and integration of existing programs. The student members are:
   - Morris Ford ERAU Box 0397
   - Wayne Jones ERAU Box 4246

5. Media Resources Committee. Formerly called "Library Committee" it provides a broader perspective with emphasis on "learning materials" rather than just books. Responsible for guidance and recommendations in the area of AV equipment and materials—purchase, distribution, control, etc. The student members are:
   - Cam Sutherland ERAU Box 0105
   - Don Frederick ERAU Box 0774

6. University Athletic Policies Committee. It is responsible for establishing the types of athletic policies that the University will sponsor and budget. Student member:
   - Stan Bartlett ERAU Box 1361

7. Financial Aid Policies Committee. It is responsible for establishing policies to assist the students in financial matters. Student member:
   - Teryc Stipe ERAU Box 0506

Social Functions:

I was really surprised that a lot of students never showed up to the B&B last Saturday. Larry Kehr, social functions chairman did a great job in putting it all together. Speaking of social functions Larry has a great dance lined up for August the 11th. It will be at the Desert Inn and will be a semi-formal B.F.O.S. Attention A & P graduating seniors

I received the word that your final F.A.A. exams will be held on the 14th & 15th of August instead of the 15th & 16th which were the original dates. The reason for this was to relieve you from studies the night of your senior class party. So I guess I'll be seeing you all at the party at the Greek Community Center, on the night of the 15th.

Senior Class

Tickets for the senior class party will be available in the SGA office after today. All graduating seniors should stop by and pick yours up. "They're free."

Graduating seniors should also stop by the Phoenix office and put their name on the mailing list for the yearbook.

Finally I would like to close this article by reminding you students that the SGA general elections will be held next trimester on Wednesday, September 26th. The positions of President, Vice-President, Secretary, and Treasurer will be open, plus many senatorial seats. These positions are very important to the student body and to the success of this University. If you're the type of person who thrives on challenging situations or responsible positions I invite you to come in and talk over these positions.

Dick Helmann
President, SGA

EDITORS NOTE: Look for a special feature next issue entitled, Profile: The Student Body President, an in depth study of the office and its requirements. It is not all gray and good times.

STAFF TO THE WINNER OF THE CHRISTMAS CARD CONTEST ! ARE INVITED TO ENTER THE CONTEST, DESIGN AN ORIGINAL CARD AND SUBMIT IT TO THE SPECIAL ACTIVITIES OFFICE BY OCTOBER 1, 1973.

ATTENTION: STUDENT ORGANIZATIONS

Any student organization interested in making a presentation to the incoming students during orientation please contact Mr. Jeff H. Ledewitz at the Guidance Office. All student organizations are encouraged to make a presentation so that new students will be aware of the number and variety of organizations on the campus. Organizations should note that this is an excellent way to increase their membership while performing a service to the university.

BUSINESS MANAGER NEEDED

The PHOENIX yearbook staff is in need of a business manager for the 1974 yearbook. Desired qualifications include expected enrollment at FBU through the summer of 1974, not on academic probation, should have completed a beginning accounting course. This is a paying position and entails approximately fifteen hours of work per week. Interested applicants should contact the Phoenix at extension 13.

Record Review

By Jim Mercer

Strawbs—BURSTING AT THE SEAMS

Since their first release, ANTIQUES & CURIOUS, in 1970, the Strawbs' music has grown in class and quality. Their latest release—BURSTING AT THE SEAMS—is by far their best to date. The band has grown; it's a more versatile and complete Strawbs. Written by Chris Wood, which is definitely the classiest song on the album. Steve Winwood's piano playing on this cut is executed in absolutely the best style. My ears need not be fooled.
