Lesson from the ashes: How NTSB feels emergency response can be improved

Robert L. Sumwalt, III
Since 2000, NTSB has issued 42 safety recommendations related to emergency response.
A sampling of recommendations

- Better interagency coordination and periodic drills
- Improved interactions between ATC tower controllers and ARFF personnel
- Use of technology to improve locating aircraft wreckage in low visibility conditions
A sampling of recommendations

- ARFF familiarization training programs and with accurate aircraft diagrams for cargo aircraft responses
- Improved dissemination of info regarding HAZMAT contents
A sampling of recommendations

- Need for more specific policies and guidance for using High Reach Extendable Turrets HRET.
A sampling of recommendations

- Min ARFF staffing levels
- Development of best practices to avoid striking or rolling over injured or deceased persons
“From tragedy we draw knowledge to improve the safety of us all.”
