Call for Papers

The *Journal of Digital Forensics, Security and Law* has an open call for papers in, or related to, the following subject areas:

1) Digital Forensics Curriculum
2) Cyber Law Curriculum
3) Information Assurance Curriculum
4) Digital Forensics Teaching Methods
5) Cyber Law Teaching Methods
6) Information Assurance Teaching Methods
7) Digital Forensics Case Studies
8) Cyber Law Case Studies
9) Information Assurance Case Studies
10) Digital Forensics and Information Technology
11) Law and Information Technology
12) Information Assurance and Information Technology

**Guide for Submission of Manuscripts**

Manuscripts should be submitted through the *JDFS* online system in Word format using the following link: [http://www.jdfs.org/for-authors](http://www.jdfs.org/for-authors). If the paper has been presented previously at a conference or other professional meeting, this fact, the date, and the sponsoring organization should be given in a footnote on the first page. Articles published in or under consideration for other journals should not be submitted. Enhanced versions of book chapters can be considered. Authors need to seek permission from the book publishers for such publications. Papers awaiting presentation or already presented at conferences must be significantly revised (ideally, taking advantage of feedback received at the conference) in order to receive any consideration. Funding sources should be acknowledged in the Acknowledgements section.

The copyright of all material published in *JDFS* is held by the Association of Digital Forensics, Security and Law (ADFS). The author must complete and return the copyright agreement before publication. The copyright agreement may be found at [http://www.jdfs.org/for-authors](http://www.jdfs.org/for-authors).

Additional information regarding the format of submissions may be found on the *JDFS* Web site at [http://www.jdfs.org/for-authors](http://www.jdfs.org/for-authors).

Special Issue on the International Conference of Digital Forensics & Cyber Crime
FROM THE SPECIAL ISSUE EDITORS

Dear Delegates,

It is an honor to co-chair ICDF2C. We are very excited to host the 2016 conference in Manhattan, New York at John Jay College of Criminal Justice. We are especially excited about the quality of this year’s proceedings. Similar to previous events, this year the conference features work from prestigious institutions from a number of countries including the United States, Korea, Brazil, Czech Republic, France, Turkey and India. We are proud once more to have such a diverse international presence.

We did have a very rigorous review process this year that resulted in 11 accepted papers that will be published open access in the Journal of Digital Forensics, Security and Law (JDFSL). Our goal has and always will be to focus on quality, and not quantity. We thank our TPC Chair, Timothy Vidas, and TPC Vice Chair, and local chair Ping Ji who managed the double-blind peer review process in an unbiased manner. Thank you both for ensuring that the work accepted is of the highest quality.

It is also important to thank everyone that helped support this year’s conference. Firstly, we would like to thank our sponsors NUIX and Google. We would also like to especially thank our conference managers Anna Horvathova and Ivana Allen for helping us throughout the whole process and for being patient with us.

We want to also thank a number of colleagues at the University of New Haven for their support: Ron Harichanran — Dean of the college of Engineering, Ali Golbazi — Chair of the ECECS department. Without their support, this event would not have been possible.

A special thank you goes to our keynote speakers, Nasir Memon from NYU-Poly and Elizabeth Schweinsberg from Google. Their experience in this domain is imperative for helping the community towards advancing the state of the art. It is also important to thank Glenn Dardick — JDFSL Editor-In-Chief for ensuring the journal’s special issue is reviewed, edited and published in time for the conference.

Lastly, we want to thank our workshop presenters for putting together relevant and timely topics in the areas of forensic analysis of large data, full-disk encryption, and drone forensics.

We have a great conference this year, in the heart of Manhattan! We welcome you to enjoy the conference and thank you again for participating in this year’s event!

Sincerely,

Ibrahim (Abe) Baggili Elder Family Endowed Chair
Associate Professor & Co-Director of UNHeFREG
Tagliatela College of Engineering, ECECS
University of New Haven

Frank Breitinger
Assistant Professor & Co-director of UNHeFREG
