RIDE TO RIDDLE

In an effort to aid the incoming students through the confusion and stress of arrival at Daytona Beach Airport, the brothers of Lambda Chi Alpha offered a welcome hand as a "Ride to Riddle." Several of the brothers on August 31st and 2nd spent the day at the Daytona Beach Airport shuttling arriving students to the dormitory and giving them information and assistance. Tip Fuller, originator of the "Ride to Riddle" idea, said, "It was a much needed program for the student who arrives often alone and bewildered. A helping hand is in the spirit of fraternity and demonstrated the present student's willingness to help new students." He further added that he was developing follow-up programs for next term and hoped other organizations would pursue programs to aid students at E-RAU. The incoming student is often a forgotten person by the established students. He is often misled, frustrated, harassed, confused, and embittered. Perhaps many of these emotions might be eliminated if organizations and individuals took an active part in trying to help new students through the maze of matriculation.

NEW TRAFFIC HEAD

Bob Weikle was recently named head of the Traffic Division for E-RAU traffic. The graduation of Wayne Medlake on August 15, 1972 left the position open. Mr. Weikle's first order of business was getting cars registered on campus. In a recent interview, Mr. Weikle informed the Avion that, "Every one should check the expiration date on their sticker, and if they need a new sticker, they should come by the Traffic Office and pick up one." Traffic stickers are good for a period of one year and must be renewed on September 1 of every year.

ADDITIONS TO ERAU

The Division of Flight Technology at Embry-Riddle Aeronautical University has added three new flight instructors for the fall term. Mr. Warren Ross has been added as a Special Faculty Flight Instructor. His extensive aviation background began in WWII when he taught flight tactics and gunnery as a Navy instructor for the Marine Corps, and he was an instructor for E-RAU in 1965-66 until he left to fly for Air Asia. Mr. Ross recently returned from Saudi Arabia where he worked as a charter pilot and airline flight instructor. Mr. David R. Smith, a former E-RAU flight student, is employed as a Flight Instructor II. Originally from Headin, Pa., Mr. Smith graduated from Penn State University as an Aeronautical Engineer Mr. Benjamin C. Ritter, Jr., also an E-RAU flight graduate, will add his talents to the faculty in the fall term as a Special Faculty Flight Instructor. Mr. Ritter is a member of the AOPA and is a member of the Deland Pilots Association.

The Division of Flight Technology has acquired eight new Cessna aircraft to bring E-RAU's total training fleet to 43. The flight line has been moved to the new Gill Robb Wilson Memorial Complex where the classroom and simulator training will be held. The Division of Maintenance Technology will send Mr. Frank O. Impagliazzo, Jr. to the instructor staff, Mr. Impagliazzo, a former Air Force aircraft propeller specialist, is an E-RAU Airframe and Powerplant graduate and has an Associate Degree in Maintenance Management. The Ocean City, W.J. native is continuing work toward a B.S. in Maintenance Management. More than 30 new Airframe and Powerplant students will begin the fall term at E-RAU. The A&P enrollment for the fall term represents a 30 percent increase over last year.

The Administration has added Mr. Harry Wilkie as Assistant for Special Activities. Mr. Wilkes, a member of the Sigma Chi Social Fraternity, has a B.S. Degree in Aeronautical Science and is currently a Naval Reserve helicopter pilot.

PRO PILOT REGISTRATION

The next Professional Pilot Program at Embry-Riddle Aeronautical University begins registration September 12 with ground school starting September 14. For further information contact the Admissions Office.

The Gill Robb Wilson Memorial Aeronautical Center officially began operations in August 1972. The three new hangars offer students an efficient flight operations area, weather briefing room, four classrooms and individual study-tutoring rooms.

The heart of the flight operations center is the Big Board located in the Tine W. Davis building. The Big Board, manned by student dispatch personnel, facilitates total coordination between flight instructors and students.

In the same building is located a weather briefing room equipped with a barometric pressure indicator and a teletype weather readout machine. The weather room will also be equipped with wind speed and direction indicators.

The four classrooms are located in buildings M and N. New control units with built-in individual response buttons are the unique feature of the classrooms. The control unit gives the instructor various capabilities for monitoring individual students to administering exams.

Tutoring rooms are also located in buildings M and N. These rooms allow uninterrupted studying and individual instruction. Each room will soon have slide projection equipment which will aid the student in review of classroom material.

CURRICULUM CHANGES

Curriculum changes, academic counseling, and standardization of the Level Examination Program test centers were among items at a faculty workshop held Monday, August 28, at the oceanfront home of E-RAU President, Jack Hunt.

Topic chairmen for the morning sessions were Professor Garrett, counseling; Mr. Eberle, curriculum; Professor Deissler, CLEP standards. Members of the academic faculty joined the group of their choice, pointing out existent problems and suggesting possible solutions in each area.

During the afternoon session, the three topic leaders presented a summary of the findings of each group to the entire academic faculty who discussed, questioned, and, in some cases, approved the initial suggestions and recommendations.

Bob Weikle also serves as a senator in the SGA and he has held that position for three years since the summer tri and is head of the traffic committee of the SGA.
The SGA President's Corner

The AVION reserves the right to edit letters as we see fit in accordance with good journalistic practice. All letters must be signed, although names will be withheld upon request from the writer.

Welcome all new students and new returning students. We at the SGA hope that you will find your time spent here beneficial and rewarding. If you look off during the break, we hope you had a wonderful time and are ready now to settle down to some serious studying.

Any student needing financial assistance, please contact the Placement Office. Numerous jobs are available and they will be glad to give you all the help you need.

The first important upcoming event is the elections scheduled for September 27. If you are not going to run for office, at least go out and meet the prospective candidates and see their platform. Do not just simply vote for a name, but know who you are voting for. All those interested in running for office, pick up a pre-registration form from the SGA Office.

LETTERS TO THE AVION

Dean West

"I spent over 10,000 dollars to send my kid to this school and this is the way I treat him."

That is an unusual comment to hear or to think of by the outlook of the August Graduation. Yes, K-RAU has done it again. They took our money then we seemed to have been cheated at graduation. But we the graduates cheated ourselves. After two meetings the grades promised we were 75 in number who wanted a quick ceremony on campus, and we did get our diploma.

Our Senior Class Officers ran with the slogan "get your money's worth". They gave us everythi..." we wanted. But not everything they promised.

Our Senior Class Officers ran with the slogan "get your money's worth". They gave us everythi..." we wanted. But not everything they promised.

PARKING PROBLEM REMAINS UNSOLVED

Students returning to campus this fall may have a difficult time finding parking space near the Academic Complex and Gill Robb Wilson building. Because of the limited number of parking spaces, student parking will be severely restricted.

Assistant Chief of Security, John Foster, projected that about 750 spaces will be needed for parking in the Academic Complex and Gill Robb Wilson area, and at present only 545 spaces are available.

"Our most urgent problem at present is finding enough parking spaces for the students," said Foster. The Security Office has been working on the parking situation through the summer tri, preparing for the influx of students and their vehicles.

Proposals for additional parking spaces have been drawn up and presented to Mr. Hanson. K-RAU Executive Vice-President, Mr. Hanson is well aware of the situation, and he has informed us that the school will soon unveil a new ramp for the aircraft which are presently parked in the front of the Gill Robb Wilson building. The new ramp is completed, and all the parking in the Academic Complex will be turned back into a parking area as it once was," Foster stated.

The area presently occupied by the aircraft was opened up until the beginning of the summer tri when the Gill Robb Wilson building opened for business, and the parking area was turned into a ramp.

"After working with Mr. Hanson and talking with Mr. Hunt on the matter, I feel confident that we are sincere in our talk of building a new ramp, and by the time the new ramp back to student parking as soon as possible. Naturally, any project of this size and expense will take time, and the estimate they have given us at present will be about 6 or 7 weeks. All we can do now is sit back and see how the day will play itself out," Foster said.

"The Traffic Division of the Security Office will work closely with the restricted parking of red and blue stickers, and it is hoped that when the additional parking areas are obtained that the restriction can be lifted."

"Until the restrictions can be lifted, we ask for the cooperation of everyone involved, and anyone who has questions concerning the situation is welcome to contact me or Bob Neikel, head of Traffic Division, to find out the answers," Foster said.

Students with red stickers on their cars are not allowed to park in the Academic Complex and Gill Robb Wilson parking lot, and students with blue stickers are not allowed to park in the front lot of Dorm. H. Parking maps of the campus are available in the Security Office.

THE RETURN OF THE POWER OF THE VOTE

Last year, the system made a mistake. It gave eighteen-year-olds the right to vote. But the system doesn't like to make the same mistake twice. So they're making voter registration a little difficult, a little confusing, a little more ludicrous. How? In some states, you have to register where you parents live, not where you live. In others, you can register in your precinct only two days out of the year. Voter registration in many areas is compiled by the police, not the American tradition - machine politics.

The system knows the power of eighteen-year-olds. They are potentially twenty-five million now young voters in the United States. In 1968, Richard Nixon and Hubert Humphrey each received thirty-one million votes for the presidency. There is practically one new voter for every vote Richard Nixon received in 1968. Add to that the forty-seven million Americans who were not inspired to vote in that election, and we would have had a whole new ball game.

You can elect the next President of the United States - you can create a responsive base of power in your community - you can establish an alternative that would be vastly superior to the one we have now. If you register to vote, your voice can make a difference. You can have a say in who rules your country, and it costs nothing. Just register to vote.

Curriculum Changes

There have been a number of curriculum changes at E-RAU this fall. In addition to the recently established Cooperative Education Programs, end-of-course examinations will be available. If passed, will allow a resident student to take a formal course for degree credit. Two new courses, Slide Rule and Journalism, will also be added. A number of courses have undergone revisions with some strengthened in credit hours. Full-time student status will be removed to 36 or 32 credit hour effective January 1973.

Recruiters Visit Campus

The U.S. Navy will visit Baby-Riddle Aeronautical University Sept. 11-15. Interested students may discuss career matters with the Officer Selection Team in the Student Center during school hours. The U.S. Marine Corps will visit the E-RAU campus October 7-11. All interested students or military opportunities and recruiting details will be available in the Student Center during school hours.

Educational Testing Service

Educational Testing Service announced that undergraduates and others preparing to go to graduate school may take the Graduate Record Examinations on any of six different test dates during the current academic year.

The first testing date for the GRE is October 28, 1972. Scores from this administration will be reported to the graduate schools around Dec. 4. Students planning to register for the October test date are advised that applications received by ETS after Oct. 1 will incur a $3.50 late registration fee. After October 10, there is no guarantee that applications for the Oct. test date can be processed.

The other five test dates are Dec. 9, 1972, Jan. 20, Feb. 14, and June 16, 1973. Equivalent late fees and registration deadlines apply to these dates. Choice of test dates should be determined by the requirements of graduate schools or fellowship sponsors to which one is applying. Scores are usually reported to graduate schools five weeks after a test date.

The Graduate Record Examinations include an Aptitude Test of general scholastic ability and Advanced Tests measuring achievement in 19 major fields of study. Full details and registration forms for the GRE are contained in the 1972-73 GRE Information Bulletin. The Bulletin also contains forms and instructions for requesting transcript service on GRE scores already on file with ETS. This booklet is available on most campuses or may be ordered from:

1973 Sebring Race moves to Atlanta

ABCF, Inc., organizers of the Sebring Grand Prix of Endurance, announced this week that they have reached an agreement with Road Atlanta, Inc. to lease the rolling Georgia circuit for the 33rd annual edition of the Sebring world championship auto race.

This action will insure the continuation of the nation's oldest endurance event for which a competition of reasons has has to abandon fur

3

ther use of the traditional 5.2-mile central Florida airport circuit.

Plans call for the event to be run on the weekend of April 14-15, 1973, with a race for touring and grand tour

ing cars on Saturday and the World Championship Sports Car Enduro on Sunday.

This park-like, 2.5-mile Atlanta circuit, carved out of the Georgia hills, offers some of the finest spectator viewing points found anywhere. It is located on State Hwy. 53 between Interstate Hwy. 85 and State Hwy. 365, in the vicinity of Gainesville, Georgia about 40 miles northeast of Atlanta. Accommodations are close by, and the track has excellent camping facilities.

For further information, contact: A.B.C.F., Inc., R.O. Box 719, Sebring, Florida 33870.

RATTLER BITES THE DUST

Norman Brown, an Aviation Management student and a security guard at Marco Polo Park Headquarters, was killed several weeks ago while making his rounds on his diamondback rattlesnake. Understandably, Norman didn’t want to ask where the snake had gone when he realized that his 9 mm Kiwi pistol had fired all 12 rounds which ended the confrontation. As the photograph shows, our former pistol team captain triumphed.

There is no truth to the rumor that our art- ercise to work for the New York Times.

WHAT’S A PLEDGE?

Traditionally a pledge has been that wide-eyed aspiring young man who used his note as a map for his mysterious journeys into the wilds of law, or found himself in a myriad of predicaments. The purpose was to mold him into a fine example of the fraternity image. The program hoped to develop the kind of man the fraternity was looking for. We at Lambda Chi Alpha are not seeking out that kind of individual who would subliminate himself to the wish of his “superiors”. Lambda Chi is, and we at R-RAU are pioneers in eliminating pledges altogether. They have been replaced by associate members who have the same privileges and responsibilities as the active brothers. There are no second class citizens in Lambda Chi.

WELCOME PARTY

The Embry-Riddle Veterans’ Association will hold its annual Fall WELCOME PARTY at Lakeview Mobile Home Estates Recreation Hall on Friday, September 8, at 8 p.m. The party is open to all veterans, active duty, reservists, their wives and dates, and the faculty at R-RAU. There will be free beer, hot dogs, hamburgers, and a mixed bar ($4.40 a drink). The purpose of the party is to introduce the association to the active students on campus and provide a welcome environment for all in attendance. The Veterans’ Association is an organization on campus and looks forward to another fine trimester this fall. The dues are only $5.00 and the returns are plentiful. If you’re a vet and would like to meet some fine people, come on tonight and join the fun.

DORM ROOM SHORTAGE

Many new and returning ERAU students are presently living in motels in the Daytona Beach area when they should have a room in Dorm I. Why? Well, I tried to find out, but Mr. Hoffstadter, Director of Student Housing, was not available for comment, and the Dean of Students’ secretary, Mrs. Humphrey, was too busy trying to straighten the situation out to give me an interview.

ELECTION ’72

Soon all of us will have an opportunity to exercise democracy’s highest privilege - the right to vote. The purpose is to elect, among others, our chief executive. This is a unique election in that it welcomes our 18-20-year-old students. To vote you must register; but that’s not as hard as you might think. According to the Volusia Department of Elections, if you have lived in Florida for 60 days and consider this your home, you should go to the new County Courthouse Annex to register. This must be done no later than October 7, but it is wise to do so before this date. If you wish to register absentee, you must do so 45 days prior to the election through your county Supervisor of Elections.

The Department of Elections in the courthouse annex is open Monday through Friday from 8:30 - 10:30, and on Saturday from 8:30 - 5:00. It’s your vote; make it count!

*APRIL 1972*
New Instructors

The College of Aeronautics and Astronautics at Embry-Riddle Aeronautical University has seven new faculty members for the fall term to accommodate the increased student enrollment and curriculum. Mr. Richard P. Clukey will begin the fall term as an instructor in Aeronautical Engineering and Mathematics. Mr. Clukey, a member of the Experimental Aircraft Association, previously worked as a technical staff assistant to aerospace vehicle design at the University of Texas at Austin. He holds an M.S. degree in Aeronautical Engineering and is originally from Dexter, Maine. Dr. Howard R. Curtis will be an associate professor of Aeronautical Engineering. He comes to E-RAU from Tuskegee, Alabama where he was an assistant professor of mechanical engineering. Dr. Curtis, a member of the American Society for Engineering Education, earned a Ph.D. in engineering sciences from Florida State University. Miss Mary C. Fletcher now serves as an instructor as assistant professor of mathematics. She holds a M.S. degree in mathematics. Miss Fletcher, from Clinton, Tennessee, was formerly a mathematics teacher in the Roanoke County Schools in Salem, Virginia. Dr. Donald J. Kemerait has been added as an instructor in aviation management. Mr. Kemerait comes from Temple Terrace, Florida, and holds an M.S. in business management. He was formerly a coordinator with Honeywell, Inc. of St. Petersburg. Mr. James G. Ladesic, from Pittsburgh, Pennsylvania, will instruct in mathematics.

He has a B.S. in aeronautical engineering and is pursuing an M.S. degree at the University of Texas before coming to E-RAU. He was with the General Dynamics Corporation as a manufacturing engineer. Dr. William E. O'Connor, assistant professor of aeronautical engineering, will be teaching economics of air transportation. Dr. O'Connor earned a Ph.D. in international studies and is author of economic regulations of the world's airline industry and political analysis. He comes from Washington, D.C., where he was formerly employed by the Civil Aeronautics Board for 18 years. Mr. Alexander T. Wells is an assistant professor of management. He has a M.A. in economics and was with Hollins Burdick Hunter, Co. of Chicago, as assistant vice president and assistant manager in the aviation department.

placements

The Placement Office has the following employment opportunities: Agent needed for Computair Airlines in Gainesville.

Loadmaster - steward needed for West Palm Beach area.

Airframe and Powerplant needed with Helicopter experience in Tennessee.

Flight instructor needed in Charleston, WV. Airframe and Powerplant needed with U-21 and UH-1 experience in Athens, Greece.

Communications advisor needed in Daytona Beach.

Labor Attendant needed working out of Orlando.

Airframe & Powerplant needed at Aero Commander Albany, Georgia.

Airframe & Powerplant needed in Miami Area for light aircraft.

American Institute of Aeronautics and Astronautics is reviewing resumes for a director of student programs.

There are openings for engineering graduates in the following areas: Advanced propulsion, applied research.

Engine Development Mechanical and Analytical Design Systems Analysis

The Naval Officer Information Team will be on campus at the Student Center from Sept. 11 to Sept. 15.

JOURNALISM ELECTIVE PLUS STAFF REORGANIZATION

The recent addition of HU-206, a course in journalism, offers interested students two elective credits in Humanities and an opportunity to become a staff member of The Avion, The Phoenix, and The Mainframe. Embry-Riddle's student publications.

Students now registered in the course are learning page makeup, feature, news, and headline writing besides covering beats and writing stories for the first issues of The Avion.

After they will be assigned permanent staff positions on the publication of their choosing.

Also, as the Avion masthead indicates, the structure of the paper has been reorganized. The new setup is effective, effective credits in their choice, plus some students interested in writing, photography, art, journal technique, and in improving the quality of our student publications are urged to register for the Spring semester offering of the course. 'See Mrs. McLemore in office 103, Building A, if you have any questions regarding joining the newspaper. (As she stated, "Embry-Riddle University should and can have publications to which students who are willing to work - and to learn - will join us."

Changes more noticeable to the Avion's readers include the new five-column page format and more students involved in stories and activities.

The AVION is a publication for Embry-Riddle students partially financed by the Student Government. Articles may be submitted to the Avion from publications by the administration, the faculty, and the student body. The AVION deadline is Friday afternoon at 4 P.M. Please mark all AVION papers, and deposits in the box outside the office, or inside the trailer, at E-RRU box 1588.
