Runway 7L goes under construction

Andrew Zaback
Staff Reporter

After an air show earlier this month, Daytona International Airport will play host to a new set of transient aircraft. Ball owners, damage and parking machinery will be on site to ensure the airport is prepared.

In 1992, the 7,300 ft. runway was extended to a length of 10,500 ft. With 15 feet formed at the same length. At the time of this project, the original length had been exceeded so that the full space could have a bed for any transient aviation schedules. The Department of Transportation conducted a survey to determine the condition of all runways in the state of Florida. The campaign used an index to evaluate a Pavement Condition Index (PCI) which is used on a scale of 0 to 100.

Runway 7L-2R PCI exceed that of 50 that has been taken test to 81. 64. This PCI value is used as the benchmark and it due for preventative maintenance. The department average some prevent from current PCI values.

Once the PCI was determined, the county road manager and the county’s engineer did not to determine the proper recommendation. Heist called the theory that they would add more material and extend length of 7L-2R.

Runway 7L-2R PCI exceed that of 50 that has been taken test to 81. 64. This PCI value is used as the benchmark and it due for preventative maintenance. The department average some prevent from current PCI values.

According to Heist, the airport is in the process of adding more material to the runway.

Professor goes for a flight in an F-16

James Holt
Guest Reporter

Three weeks ago just before the Wings and Waves Airshow, Dr. Pat Anderson’s students wonched in amazement as the took off in the back of an F-16 and did a nine-G vertical climb to 10,000 feet.

“We went out over the ocean where we did quite a bit of maneuvering including a bunch of nine-G’s, stalls, tips, rolls and stalls, four-point rolls, teammates, and point much everything,” Anderson said.

Anderson, an ERAU professor teaching flight controls and fly-by-wire technology was flying with U.S. Air Force Major David Graham.

“I knew [Graham] when he was in my Embry-Riddle classes so I was very glad to have him come up to [the Harris Hill] for the day,” Anderson said.

A group of people that go to Embry-Riddle from Harris Hill, “Anderson said.

We knew him when he was up ramp where they received a special briefing from Major Graham and Anderson about the systems of the airplane and the flight controls.

When we’re talking about flight control difference from a 172 and it’s really only going to be able to take that experience back to the classroom, I used to just talk about what I thought [the F-16 could do],” Anderson said.

Before the flight, Anderson’s classes were taken to the flight ramp where they received a special briefing from Major Graham and Anderson about the systems of the airplane and the flight controls.

“[They] are very different from a 172 and it’s really only going to be able to take that experience back to the classroom,” Anderson said.

“We spent a lot of time on the ground,” Anderson said.

Anderson has lived flight every since his uncle, a helicopter pilot, influenced him at a young age.

“They landed one of his old Bell 47 helicopters in my backyard when I was two, and started taking me out flying with him when I was about 7,” Anderson said.

Overall, Anderson describes the experience as having an absolutely tremendous once in a lifetime opportunity.

“I would like to thank the Air Force for giving me the chance to do it,” Anderson said.

The Avion, November 2, 2010

American in an industry where there were no opportunities for me. We all had dreams that we wanted to achieve, and Brown said, “We could become a gold resource for other alumni and give current students the idea that they were the same kind of people that we are.”

Clinton Weekes, BOW president in 1981, said: “Boomers of the Wind gave me a sense of identification among the same struggles and ambitions. We were all African-Americans who were living our dreams.”
Sodexo addresses students concerns

Emily Cook

COE Representative

Earlier this semester, a Dining Services Advisory Board meeting was held to listen to students and faculty voice concerns about food service in the College of Engineering. The meeting was completed after a few rescheduling, and the University Advisory Council has become the board that is responsible for the SGA. The board members are members representing COE, College of Engineering Student Government. The board members were able to discuss the COE Scholar of the Month, Student Social Events, and the College of Engineering Scholar of the Month. There was also a phone call to the Student Services Office to discuss the lack of signage at the embayment. The University Advisory Council is to help establish a more efficient flow of communication between the university and the students. The board members were able to discuss the lack of signage at the embayment. Stephen Robert Lamagna Retter 10/22/10
Ryan Bishop Nichols 10/21/10

Instrument Rating Certificate
Gyutae Hwang 10/14/10
Jordan Lee Lamotte 10/15/10
Hyo Joon Kim 10/13/10
Jennifer Cornell Pavone 10/19/10

Flight Instructor Instrument Airplane Certificate:
Jun Hee Han 10/14/10
Sebastian Tadeusz Chruszcz 10/15/10
Bradley Stephen Hammer 10/19/10

Commercial Multiengine Add-on Rating
Peter McFarland Moynahan 10/22/10

Commercial Single Engine Add-on Rating:
Pang Tat Wong 10/19/10
Danielle Rose Erlichman 10/20/10
Leukemia motivates run

Over the past few months, I have committed myself to educating people about leukemias, raising $2,800 for the Leukemia and Lymphoma Society, and running a half marathon in its benefit.

My roommate began early last spring just after my cousin was diagnosed with leukemia. She needed some guidance and encouragement, but I needed a mentor, and so I reached out to Team In Training. This group of runners, coaches, and participants mentors cancer survivors get together from around the country to raise money and race for leukemia and lymphoma. Unfortunately, some 107,000 Americans are diagnosed with leukemias each year. That means approximately every 5.6 minutes someone in the United States is diagnosed with a cancer of the blood. Every 10 minutes, someone loses the battle.

Since beginning its efforts in 1964, Team In Training has raised more than 600 million dollars to go towards researching new treatments. From this has come the disease treatments and chemotherapies, bone marrow and stem cell transplantation, and Gleevec, an oral medication that I had while in the process of forming my business Vx Knife & Gear, LLC.

I formed my business Vx Knife & Gear, LLC, as a Corporation, and Limited Liability Company (LLC), as a Corporation, and Limited Liability Company (LLC). The steps following the earlier stated plans were to file an Articles of Organization, which is required to form an LLC in a state. There was a filing fee of $125 which varies by state. Next I applied for a Federal Employer Identification Number (FEIN) from the IRS at www.simpson, which was free. After you have your Articles of Organization an LLC in a state, you need to file a state business or Use Tax from your state Department of Revenue, which is also free. With these documents you may open a Business Account at a Bank so that you may keep the funds separate from personal finances.

Having an online website at www.vxknifeandgear.com, I had to purchase the domain name, the shopping cart for the website, and a Merchant Processing account to accept credit card payments. This information took me months to research. I found that taking time to file documents yourself will save you a lot of money. Many companies exist to file documents on behalf of companies. What it cost me $125 to do on my own for filing documents, would have cost nearly $1,000 to hire someone to do on my behalf. If anyone should have questions or would like to assist someone to do on my behalf, I would be happy to assist someone to do on my behalf.

~ Nicholas Olivares
The show started punctually at 10am with big gray and gold took to the skies after that, with Embry-Riddle’s Honoray Graduate, Skip Stewart performing a magnificent acrobatic display in his Edge 540 XLT Multiplace,.Concurrent, and hanging by the propeller thrilled the crowd.

With intense cheers from the ground, an ancient F-4U Corsair, courtesy of the Collings Foundation, slowly taxied out and made a graceful takeoff. Found in 1979, the Collings Foundation organizes and supports “living history” events that enable Americans to learn more about their heritage through direct participation. Constantly on the lookout to restore more relic aircraft, the flight of the F-4U allowed the crowd to see something more than 60 years old, can still fly with such grace.

Skip Stewart and Patty Wagstaff paired up for the penultimate performance with the conduct of some very tight flying. With multiple close passes and an excellent display of close-quarter aerobatics. At many occasions, they looked to be on the verge of an accident, but their precision aerobatics even more amazing. The final act was a race between the two airplanes and the truck which resulted in a tie, even with the jet truck, which created a lot of smoke making things more entertaining. The audience was left speechless; with many jaws wide open as the audience was welcomed to the Avalon Air Show for the 27th year in a row with great enthusiasm and an excellent display of close quarter aerobatics. As they circled round the back, the solo team pushed past each other along with 90 degree bank so that their undersides of the aircraft were only feet above the runway. Other maneuvers included the left echelon roll, where the outnumbered aircraft would have to traverse four times the distance of the flight leader, while maintaining formation. Blue Angels 5 joined the main formation for a straight up acceleration to the heavens before coming back down to burst into the Blue Angel’s Fleur-de-lis. At the end of the day, most people were tired, sunburned to varying degrees, but everyone left the Air Show with a huge smile on their faces, having enjoyed a two hour flight and an awesome show, courtesy of the U.S. Navy.

With the smell of jet fuel in the air, and the sounds of the morning sun shining down on the Naval Air Station at Jacksonville, more than hundred thousand people showed up on both Saturday and Sunday morning during the Fall break weekend to watch this bi-annual air show sponsored by the U.S. Navy.

This event, two day family entertainment event is hosted in the last weekend of October in downtown Jacksonville fl an the Jacksonville Beaches, Florida and Southeast Georgia. Returning to their birthplace, the Navy’s Blue Angels flight demonstration team came home to put on a magnificent act that amazed all spectacularegardless of how many times they have already seen it.

As well as being a showcase of aviation, the event is also a way the Navy returns back to the community, Navy Captain Murley, Commanding Officer, wrote in the opening address, “This leading edge Naval Aviation event demonstrates our appreciation to the heavens before coming back down to burst into the Blue Angel’s Fleur-de-lis. At the end of the day, most people were tired, sunburned to varying degrees, but everyone left the Air Show with a huge smile on their faces, having enjoyed a two hour flight and an awesome show, courtesy of the U.S. Navy.”

readoz.com
year favorite “Jackasses” are back in this third installment of the Jackasses movie. This third movie was probably the second best of the trilogy, behind my all-time favorite, “Jackasses 2.”

When I heard that another Jackasses was going to be produced, I wasn’t sure if they could pull it off. But it is now evident that they have become a drug addict and was in recovery, there is now worth millions, and the men are just a lot older in general. I was expecting to see a disappointing effect on their performance after the years of abuse they have been subjected to throughout the years, but this movie was a lot more ridiculous than I thought it would be. I felt like the cast and crew knew that they had to prove something. I felt like the cast and crew knew that they had to prove something. They formed in this movie were a lot more ridiculous than in prior movies. The stunts that they performed in this movie were a lot more ridiculous than in prior movies. I felt like the cast and crew knew that they had to prove to viewers they were still relentless and could still perform the stunts that had made them famous in the first place. Many of the stunts, other than being more extreme and dangerous, were a lot more manic and nasty. Many scenes contained more sex, more body parts and of course, vomit in abundance. Many scenes were edited from the film due to unresolved issues during filming. The addition of 3-D to this movie was a great choice by the producers. There were many scenes where the scope of the camera and the audience was so vast that it almost felt as though you were right there, amongst the Jackasses. This movie is definitely one to go see.

Johnny Knoxville, Steve-O, Bam Margera and all of the other cast members feel like they were standing on the edge of a cliff, knowing that the lead actor would be the last person to go over the edge. This would be the song played at a theater if the lead actor were to commit suicide. There are many scenes where things go wrong, I feel. But make no mistake, they got back and went back to what they do best of all, taking the audience on a field of depth, making viewers feel like they were standing right there, amongst the Jackasses. This movie is definitely one to go see.

The first track of the album, “Masterpiece Theatre I” first strikes you as something that might have come from a British rock band. However, once past the opening vocals, the guitar riff that ensues takes on a distinctly more Pop/Rock feel. Heavy emphasis on the drums and bass guitar lend a stony low sound to be paired up with really high vocal ranges that don’t normally come from male singers. Earlier released as a single, the third track, “Cross My Heart” has a slightly punk-rock feel to it, with a similar sound to bands like The All-American Rejects, Fall Out Boy and possibly Fall Out Boy as well. The song is also very chaotic in its elements and seems to be completely fluent with its music. The Energy vocals of the band also set the stage for some of the more raunchy lyrics scattered throughout the song. One of the amazing things about this band is that all four of its members have incredible vocal ranges which really put them above their contemporaries. The remainder half of the album consists of mostly pop-rock tunes and lyrics, with the lyrics leaning more to generic.

Released in the U.S. just last month, Masterpiece Theatre is an exhilarating layering a sound album, with a selection of music that combines elements of rock with the story’s style by movie. The idea of an instrument transformed from musicals or punk/pop to bands like The All-American Rejects, Reliant K, andpossibly Fall Out Boy as well. The song is also very chaotic in its elements and seems to be completely fluent with its music. The Energy vocals of the band also set the stage for some of the more raunchy lyrics scattered throughout the song. One of the amazing things about this band is that all four of its members have incredible vocal ranges which really put them above their contemporaries. The remainder half of the album consists of mostly pop-rock tunes and lyrics, with the lyrics leaning more to generic.

The first track of the album, “Masterpiece Theatre I” first strikes you as something that might have come from a British rock band. However, once past the opening vocals, the guitar riff that ensues takes on a distinctly more Pop/Rock feel. Heavy emphasis on the drums and bass guitar lend a stony low sound to be paired up with really high vocal ranges that don’t normally come from male singers. Earlier released as a single, the third track, “Cross My Heart” has a slightly punk-rock feel to it, with a similar sound to bands like The All-American Rejects, Fall Out Boy and possibly Fall Out Boy as well. The song is also very chaotic in its elements and seems to be completely fluent with its music.
