Embry-Riddle shows positive results

Wednesday, Oct. 20, marked Career Services’ annual Career Expo at Embry-Riddle Aeronautical University.

With over 100 exhibitors, almost every big name company swarmed with recruiters. The Career Expo, called a Hiring Event, gives students the opportunity to meet with employers, network, and select which companies the students had the opportunity to meet with employers, network, give resumes, and if selected, be called for an interview the following morning.

Unlike the last few years, the economy is seeing something other than a downturn and almost every exhibitor was advertising their job opportunities, which is a good sign. The Embry-Riddle advantage is that they are looking for the right people, not just bodies, which is a rarity in today’s job market.

Chief Academic Officer, Dr. Dyke said, “Embry-Riddle’s hallmark of excellence comes from our faculty and staff’s commitment to our students. Our resources and academic standards are the best in the industry, and we are committed to providing a first class education to our students.”

The Career Expo is part of an ongoing process of job hunting at Embry-Riddle. Dahan said, “Every time students will get a call, they will have the opportunity to interview with the hiring company.”

Like Dr. Dyke, Dahan said, “We are very proud of our students and the opportunities that are available to them.”

Embry-Riddle is the best kept secret in the industry and the students here know it. As Dahan said, “We are here to help students find their passion and help them be successful.”

Embry-Riddle considers name change

Embry-Riddle Aeronautical University

Despite the addition of a new format, the Career Expo was very successful. Companies came and filled the IC Center on Wednesday, Oct. 20, looking for future job candidates. Students attended the event looking for internships, co-ops, and job opportunities.

Embry-Riddle Aeronautical University

On Wednesday, Oct. 20, 2010, Credentials, Inc. and Embry-Riddle Aeronautical University presented a Career Expo, held inside the IC Center.

The Career Expo, which is the largest career expo in the state of Florida, brings companies and students together to network. The Career Expo was held at Embry-Riddle Aeronautical University in Daytona Beach, Florida.

The Career Expo is the perfect opportunity for students to meet with employers, network, and be called for an interview the following morning.

Today, Career Services has completed over 310,000 interviews with employers. In 2009, Career Services included over 1,000 companies. The Career Expo is a great opportunity for students to meet with employers, network, and be called for an interview the following morning.

Professor goes for a flight in an F-16

James Holt
Guest Reporter

Three weeks ago just before the Wings and Waves Airshow here in Daytona Beach, FL. the F-16 the week of Wings and Waves Airshow here in Daytona Beach, FL.

"We went out over the ocean where we did a lot of maneuvering including a bunch of high-G stuff, rolls and stalls, four-point rolls, Immelmanns, and point much everything else," Anderson said.

Anderson, an EAU pro-
teaching flight controls and fly-by-wire technology as flying with U.S. Air Force Major David Graham. "I know [Graham] when we were in Embry-Riddle and I had a special briefing with him at [the Harris Hilleid Student Center] for a group of people that go to Embry-Riddle from Harris Hill," Anderson said. Anderson had been anticipating the flight for six months, although the air force did not sign off the flight until the morning before.

"We really wanted too see what was going to happen until the day before so I was pretty excited," Anderson said.

Anderson was interested in the F-16 because it is the world’s first major production fly-by-wire airplane.

"It is a couple of little flight test maneuvers that I recorded on a video to show my stu-
dents in class to show how the fly-by-wire systems change the flying qualities of the aircraft and talked about the four-point rolls, Immelmanns, looping and rolls, and everything else," Anderson said.

Before the flight, Anderson’s classes were taken to the flight ramp where they received a special briefing from Major Graham and Anderson about the systems of the aircraft and the flight controls. The flight ramp was different from a 727 and it really was the only way they could get that experience back to the class-
room. I used to just talk about it, I thought on an F-16 could be quite a bit different, but now all of that has been confirmed and I feel very con-
fident about what I am saying," Anderson said.

Outside of teaching, Anderson is also an aerobatic pilot with over 20 years of experience.

"I own a Pitt Special which is a fully aerobatic little biplane, and I also fly an au-
teristic glider called an ASK-21," Anderson said.

Anderson noted that while the F-16 was much faster and rolled much more quickly than his airplanes, it had a substan-
tially slower pitch rate.

"The nose has more pitch and requires much more caution," Anderson said.

Anderson has lived aviation every since his uncle, a heli-
copter pilot, influenced him at a young age.

"He landed one of his old Bell 412 helicopters in my back yard when I was two, and start-
ed taking me out flying with him when I was a lot younger," Anderson said.

Overall, Anderson describes the experience as being an absolutely incredible moment in his lifetime.

"I would like to thank the Air Force for giving me the chance to do it," Anderson said.

Clinton Carter
College of Engineering
Senior

Hi, my name is Clinton Carter and I am currently serving as the College of Engineering Senator. This is the 12th year that I have had the opportunity to be a part of the Student Government Association. The mission of SGA is to represent the student body and to ensure that their needs are met. I currently serve on the SGA Executive Committee, the Committee on Student Affairs, the Housing and Residence Life Committee, and the College of Engineering Senator. I have been a part of SGA for 12 years and have served as the College of Engineering Senator for the past three years.

As the College of Engineering Senator, my role is to represent the interests of the College of Engineering students to the Student Government Association and the university administration. I work closely with the college administration to address the concerns and needs of the students. I also work with the other college senators to advocate for the interests of all students.

I have been a huge advocate for the addition of the College of Engineering Senator to the SGA Executive Committee. I believe that the students of the College of Engineering have unique needs and concerns that need to be represented. The College of Engineering Senator is the only SGA senator who is specifically elected by the students of the College of Engineering.

As the College of Engineering Senator, I have been able to work on several important initiatives. I have been a part of the committee that is responsible for the annual College of Engineering T-shirt design. The t-shirt design has become a popular way for students to show their support for the College of Engineering.

I have also been involved in the College of Engineering Senator’s mission to reduce the amount of emissions from the student village. I have worked with the SGA Executive Committee to implement a program that reduces the amount of emissions from the student village.

In conclusion, I believe that the College of Engineering Senator has a unique role in representing the interests of the College of Engineering students. I am proud to have served as the College of Engineering Senator and I look forward to continuing to work on behalf of the students of the College of Engineering.

It is now time to sign up again for the annual Thanksgiving break shuttle to Orlando. This shuttle will run from the Embry-Riddle campus to Orlando International Airport (MCO). The shuttle will run from November 23rd at 9:00 a.m. and will end on November 28th at 1 p.m. The shuttle will pick up passengers at the SGA office and will drop them off at the airport.

The shuttle is a great way to get to Orlando for the Thanksgiving break. The fare is 20 dollars one way or 40 dollars round trip. If you would like to get a ride on the shuttle, you can sign up for the SGA Office to sign up. The shuttle will run from November 23rd at 9:00 a.m. and will end on November 28th at 1 p.m. The shuttle will pick up passengers at the SGA office and will drop them off at the airport.

Sodexo addresses students concerns

Emily Cook
COE Representative

Earlier this semester, a Dining Services Advisory Board meeting was held in order to address student concerns. During the meeting, there were several topics that were brought up by the students. One of the main topics was the lack of signage at the dining services locations. The students felt that the signage was not clear and was not easy to find. The dining services have been working on this issue and have recently installed new signage at all of the dining services locations.

Another issue that was brought up was the lack of variety in the menu offerings. The students felt that the menu offerings were not diverse enough and that there were not enough options for people with dietary restrictions. The dining services have been working on this issue and have recently added several new menu options.

In addition to addressing these concerns, the Dining Services Advisory Board meeting also discussed the ability to use cash on the dining services. The students felt that the ability to use cash was not always available and that there were times when they were not able to use cash. The dining services have been working on this issue and have recently added a feature that allows students to use cash on the dining services.

Overall, the meeting was very productive and the students were able to bring up several important issues. The dining services are committed to addressing these concerns and will be working to improve the dining services experience for all students.
Fraternity Boat race succeeds

Brothers promote spirit

The biggest event that ODK sponsors is the ODK Charity House event in the spring semester, where all organizations are encouraged to raise money and awareness for ODK beneficiary charities. Each group constructs cardboard houses and spends an evening on the West Lawn. Any student who is active in any of the five areas of campus life and exhibits exemplary character, responsible leadership and service in campus or community life, exemplary scholarship, genuine fellowship and commitment to democratic ideals will be considered for membership.

Once you submit your application, you will be interviewed by current ODK members at Emby-Riddle. The interview allows you an opportunity to find out more about your goals, your personality and how you will serve within the organization. After your interview, if you are accepted to ODK, your name will be notified and you will become a full fledged member of Omicron Delta Kappa. We urge you to take the best back in the application process!

Leukemia motivates run

Over the past few months, I have committed myself to educating people about leukemias and lymphomas. I was diagnosed with leukemia in 2005 and my cousin was diagnosed with lymphoma a few years later. These diagnoses were devastating to me, but I needed to find a way that I could help. I spoke with my cousin and sent her my love and encouragement, but I needed more. I started running and registered myself to do something larger. I hesitantly registered myself to run a half marathon in its support of the Leukemia and Lymphoma Society, and raising $2,800 for the Leukemia and Lymphoma Society at LLS.org and follow my training progress at http://projectseasttostopeast.com. I will be joining other runners, coaches, past participants, mentors, and cancer survivors to get together from around the country in completing the 13.1 miles through the streets of St. Petersburg, Florida in honor and in memory of those affected by blood cancer. Every ten minutes, someone loses the battle.

Since beginning its efforts in 1965, Team In Training has raised more than 600 million dollars to go towards researching new treatments. From this has come many exciting treatments such as chemotherapy, bone marrow and stem cell transplantation, and Gleevec, an oral medication that has shown clinical promise.

The past 50 years, survival rates for leukemia patients were less than 4%. Today, they are less than 4%. Today, they are over 80%. A huge improvement, yes, but not enough. Not nearly. On Sunday, Nov. 21, I will be joining many others, runners, joggers, walkers and supporters from around the country in completing the 13.1 miles through the streets of St. Petersburg, Florida in honor and in memory of those affected by blood cancer. Learn more about Team In Training. Call 1-800-LEUK-599 for any question. Team In Training is a service of the Leukemia and Lymphoma Society. Learn more at LLS.org and follow my training progress at http://projectseasttostopeast.com. I will be training with mentors, and cancer survivors and I will find a way to help. I will be running a half marathon in its support of the Leukemia and Lymphoma Society, and raising $2,800 for the Leukemia and Lymphoma Society. Learn more about Team In Training. Call 1-800-LEUK-599 for any question. Team In Training is a service of the Leukemia and Lymphoma Society. Learn more at LLS.org. I will be training with mentors, and cancer survivors and I will supply the service or product, how you will supply it, in person or by mail, how you will pay for it, savings or loan, and how your will receive payment, cash or credit card.

Another important step is deciding how you will form your company, there are many ways and each has its advantages. There are many questions in starting a business of what you want to provide, how you will supply it, in person or ship it, how you will receive payment, cash or credit card. Naval Air Station Jacksonville Air Show 2010

With the smell of jet fuel in the air, and the warmth of the morning sun shining down, the Naval Air Station at Jacksonville, once home to hund- reds of people, showed up on both Saturday and Sunday morning during the Fall break weekend to see the bi-annual air show sponsored by the U.S. Navy.

This free, two day family entertainment event is hosted in the last weekend of October to show America’s military presence in Northeast Florida and Southeast Georgia. Returning to their birthplace, the Navy’s Blue Angels flight demon- stration team came home to put on a magnificent act that amazed all spectators regardless of how many times they had already seen it.

As well as being a showcase of power, the event is also a way the Navy returns back to the commu- nity. Navy Captain Mclay, Commanding Officer, wrote in his opening address, “This leading edge Naval Aviation event allows us to express our appre- ciation to the crowd and also a way the Navy returns back to the commu- nity, much to everyone’s excitement. Your tremendous support of our Navy men and women, our families throughout the year is sincerely appreciated.”

The show started punctually at 10am with the USSOCOM parachute team jumping in to land right in front of the announcer’s tent, in full view of the crowd, much to everyone’s excite- ment. While this was happening, the Blue Angels flew in their F-18’s, taking to the skies after that, with Embry- Riddle’s Honorary Graduate Matt Chapman per- forming a magnificent aerial display in his F-86. Multi-colored smoke, smoke, and hang- ing by the propeller thrilled the crowd.

The finale was a race between the two airplanes flying straight up in the sky! The audience was shocked b his impressive take-off. With intense stares from the ground, an ancient F-4U Corsair, owned by the Collings Foundation, slowly taxied out and made a graceful take-off. Founded in 1979, the Collings Foundation organizes and supports “living history” events as a way to educate people about the heritage through direct participation. Constantly on the look out to restore more relics aircraft, the flight of the F-4UWowed the crowd that some- thing more than 40 years old, still can fly with such grace. Skip Stewart and Patty Wagstaff paired up for the penultimate performance with the conduct of a few very tight flying, with multiple close passes. As they circled round the back, the solo team dashed past each other wing by wing to show the crowd that their undersides of the aircraft were only feet away from each other.

Other maneuvers included the left echelon roll, where the smallest aircraft would have to travel four times the distance of the flight leader, all while maintaining formation. Blue Angel 5 joined the main formation for a straight up acceler- ation to the heavens before coming back down to burst into the Blue Angel’s Fleur-de-lis.

At the end of the day, most people were tired, exhausted to varying degrees, but everyone left the Air Station with a huge smile on their face, happy to have seen a tremendous display and an- other show, courtesy of the U.S. Navy.

The 120th-ranked Embry-Riddle volleyball team improved to 23-2 overall and 8-0 in Sun Conference play with a 3-1, 25-18, 25-19, 25-18 victory over Northwood on Friday night. The Eagles improved to 25-2 with 25 kills and 10 digs, and Jordan Holcomb assisted 23 kills for the Eagles. The Seahawks fell to 16-13, 6-11 in the TSC play with the loss.

The Eagles and field got off to a quick start, taking a 4-0 lead first, and Gloris Kemp increased the lead to 5-0 with a kill. The Seahawks battled back to within the margin to 5-3 points at 8-4 before the match.

As she did throughout the set, the Eagles' setting duo of Michael Donald and Dennis Ekstrom combined for a 12-2 assist sweep of the season. The Eagles hit .438 in the first set and blocked three of Northwood's seven attempts.

In the second set, the Blue and Gold saw its early 9-0 lead evaporate when the Seahawks scored 16 straight points, resulting in the Eagles' fifth Eagle finisher coming in the form of soccer player senior Don Sciotto.

The 12th-ranked Embry-Riddle women’s soccer team came away from their second conference match, scoring twice and sophomore Ali Smalling scored twice and sophomore Lexi Johnson for a tally to take a commanding 1-0 lead. Jordan Holcomb recorded three kills and a pair of block assists with Emily Jacobus during the run. The Gannetts were held scoreless, and the Eagles could go on to take the set, 25-10.

Embry-Riddle women's soccer player senior Don Sciotto was the most dominant team on the court and saw the new conference’s record at 13-2 overall and 2nd place in the conference race at 6-2. The Gannets fell to 2-19 with 18 ties and five lead changes.

The Eagles also got one goal each from Cecile Henriksen, methodically out shooting the Fire 27-9 and making 18 saves by SEU’s Grimes. It was Obita’s 16th score of the season in the 64th minute of play, putting back a ball deep in the Warriors’ offensive zone.

Seahawks responded with a pair of kills to tie things up at 22-22. Embry-Riddle finished the third set with 11-11 ties and 5-5 for the Eagles, as Embry-Riddle led 26-21.

Senior Don Sciotto was the most dominant team on the court, tallying 12 kills and hit .556 for the match, recording 10 digs and two block assists on the Eagles’ final goal against the Gannets. The Blue and Gold saw an early 9-6 lead disappear 9-9, allowing the Eagles a 3-0 sweep, their 17th sweep of the season.

Eagles finish play at UCF Invite

The 12th-ranked Embry-Riddle volleyball team saw its 10-match unbeaten streak in conference play come to an end with a 3-0 (25-20, 25-23, 25-21) sweep of visiting Webber International Thursday night at the ICI Center.

The win moves the Eagles overall record to 25-2 on the season, while the loss drops the Warriors to 0-14 overall on the year. Embry-Riddle improved to 11-0 in Sun Conference play.

The Blue and Gold took slim lead early, and although they never pulled away from the Eagles, the wire-to-wire victory was a good confidence builder for the team to look to cap their second place finish in conference play.

The Eagles will use the next two weeks to prepare for the regional tournament, which is scheduled for Nov. 11-13. The Eagles will be the No. 5 seed in the East and face the No. 12 seed in the first round.

Johnny Knoxville, Steve-O, Wee Man and the rest of the cast from the Jackass movies are back again up to their typical or rather not so ridiculous antics. The stunts that they performed in this movie were a lot more ridiculous than in prior movies. I felt like the cast of Jackass was going to be more relevant and could still perform the stunts that had made them famous in the first place. Many of the stunts, other than being more extreme and dangerous, were a lot more manly and manly. Many scenes contained fresher, more body parts and of course, vomit in appropriate places. The movie means let down by this movie, as a matter of fact. I think that it is almost the best of the trilogy, only falling short of the second one because the second one made viewers laugh more, I feel.

The addition of 3-D to this movie was a great choice by the producers. There were not many scenes where the effects were perfected right, but rather when the audience was in a field of depth, making views feel like they were standing right there, amongst the Jackasses. This movie is definitely one to go see.

Marianas Trench, a Canadian Pop Rock band has been big in the Canadian market for quite a number of years, and with this sophomore album release, they are making their way into the U.S. market. Certified platinum in Canada, the band has won numerous awards, and just recently finished a show that was fully sold out in Toronto in March this year.

The first track of the album, “Masterpiece Theatre I” first strikes you as something that might have come from British music, almost like something that is repeated over and over, something that is not very common with four piece Pop Rock bands. However, once past the opening vocals, the guitar riff that1 commences takes on a distinctly more Pop Rock feel. Heavy emphasis on the drums and bass guitar lend a stormy sound to be paired up with really high vocal ranges that don’t normally come from male singers. Early released as a single, the third track “Cross My Heart” has a slightly punk rock feel to it, with a similar sound to bands like The All-American Rejects, Fall Out Boy and possibly Fall Out Fox Boy as well. The song is also very upbeat with its melody. The soaring vocals of the band also set into the song, with many lyrics that can be expected of this type of music but the tunes constantly showcase their creativity in musical arrangements. The album consists of mostly pop tunes and lyrics, with the lyrics leaning more to generic.

The remainder half of the album consists of mostly pop tunes and lyrics, and in using different effects, of even instruments altogether. The concluding song “Masterpiece Theatre III” is a clear proof of this sound as the album always changes with the intro or outro of an instrument. Overall, while I’m not a big fan of this album, I do give credit to their musical genius and I would recommend this album to people who like Queen, soundtracks from musicals or punk-pop rock fans who are looking to try something new but not too different from what they are used to.
The alumni of ALPHA ETA RHO International Aviation Fraternity are seeking interested students to reinstate the Epsilon Rho Chapter on the Daytona Beach campus. Interested students should contact Gary Anderson (212)571-0483 or gwa1948@aol.com.
