EERAU teams up with United Way to give back to community

Priyanka Kumar  Copy Editor

Embry-Riddle is taking part in a unique community event this semester with United Way. This is the first annual United Way study day hosted by the library. The thermomter located at the side entrance off Richard Petty, and the main entrance off "T" road is a representation of the library's main goal to raise $3,500 this year, according to Campus Life and Resource Development, United Way is a resource development venue for the community.

"As my boss says, "we connect dots." "Grunt said. This is not United Way's first visit to campus. According to Grant the main goal is to increase awareness and for people to write checks with the school in the pot and has been successful. "We've formed wonderful rela-

tionships with Dr. Johnson and Dr. Bailey so we thought it would be a good idea to do this again," Grunt said.

The Thermometer which is located on the main floor of the Interfaith Chapel, is raised about 4 feet above the floor. When an individual receives the child to help they are provided with the wish list. When an individual receives the child to help they are provided with the wish list. Currently the Volunteer Network has only a few select children left in their goal to help 35 children this holiday season.

"Each show has been significantly unique with different styl-

eries and phrases and of course laughter continuous. Keep their spirits up and the rooting on the group to make them better? Now's your chance to give back to the community," Grant said.

THE BROTHERS OF Pi Kappa Alpha take lessons on weather emergency proced- ures for Embry-Riddle, in order to have individuals on campus that are trained to help the university with any evacuation events due to weather conditions.

Embry-Riddle Alumni numbers reach 100,000

Avery Robinson

Campus Editor

Each semester comes to an end with the senior class gradua- tion. Through the three differ- ent campuses here at Embry-Riddle, the number of alumni reaches over the 100,000 milestone. This 100,000 alumni milestone will be reached with the graduation that will occur dur- ing May 2011. In celebration of this milestone, the university is reveal- ing a new logo that will mark this particular milestone.

Now in conjunction with the Alumni Association, the Embry-Riddle Alumni Association will set aside funds next year for a student scholarship.

According to Michelle Berg, Executive Director of Alumni Relations, the Atlanta and New York City alumni chapters each established endowments and recently combined their funds. Berg spoke of this, "prompted by the Alumni Association to help them raise additional funds for future scholarships."

Members of the Embry- Riddle alumni will be able to see this new logo not only associated with the new scholar- ship but that is being developed, but also with different publications such as graduation programs next year, the alumni direct- mail, and other alumni publications. Whether the individual who will become alumni 100,000 is understood, due to the chang- ing of graduating seniors at all three Embry-Riddle campuses.

Begging closed with, "The Alumni Association is an important milestone and that helping students would be the best way to celebrate this (100,000) milestone and to further grow Embry-Riddle's alumni community."

Staff Reporter

Some readers might remember the episode during season two of “The Big Bang Theory,” where Howard Wolowitz crashed the Mars Rover into a ditch and dis- troyed it. Though that was pure fiction, the Mars Science Laboratory, also known as Curiosity, is a NASA rover out to make a reality and discover how Mars ever was or is a environment that can support microbial life.

Scheduling to be launched in November 2011 with an esti- mated landing date sometime in August 2012, the MSL rover will be the first time in a decade to land on the red planet. With almost twice the mass of the previous rovers, carrying ten times more weight of scientific instruments as well.

Costing approximately US$2.5 billion, and with an endurance of at least 606 Earth days, the 750 kilograms (~1,700 pounds) rover will be delivered via an Atlas V 541 rocket to explore Mars with a greater mass than ever before in human history.

The first stage is a guided entry where the MSL will be guided over the sky crane landing system. After the MSL has ascertained that the sky crane is ready, the MSL will fire the retrorockets to slow the descent to approximately 9 meters per second. The MSL will have the landing system firing for one-to-two minutes, before releasing the sky crane, which will deploy the landing system's thrusters to slow the rover's velocity during the landing process. After a few seconds, the sky crane will release the MSL and begin the descent to the Martian surface. Once the MSL has successfully landed, the sky crane will release the rover onto the Martian surface, and the MSL will begin its descent to the surface. After the MSL has descended onto the Martian surface, the sky crane will release the rover onto the Martian surface, and the MSL will begin its descent to the surface. After the MSL has descended onto the Martian surface, the sky crane will release the rover onto the Martian surface. The MSL will then deploy its backshell, which will protect the rover during the landing process. The backshell will then detach from the MSL, and the rover will be left to make its own way on the Martian surface. The rover will then deploy its landing legs, which will provide the rover with stability during its landing process.

The rover will then deploy its landing legs, which will provide the rover with stability during its landing process. The rover will then begin its descent to the surface, and the MSL will then deploy its backshell, which will protect the rover during the landing process. The College of Engineering

This November there were six Student Government Association members of the month, one was chosen representing the College of Arts and Sciences, and one representing the College of Engineering, and two representing the College of Aviation.

All nominees were chosen by faculty members and recognized in their last week. The student winners show commitment to the university’s mission and the Student Government Association is proud to support and admire them for upholding the high standards that they have set.

The College of Arts and Sciences winter was Farah Hashmi. She was nominated by Stephen P. Luzio, COL USAF AFROTC. Farah is both honorable and responsible in her actions and also proves to be a well respected student with an active role in leading the Air Force ROTC: veterans club andCadet Wing goal of 1000 volunteer hours over the past six weeks ahead of schedule. This will not be done before the Cadet Wing budget and guidance of Farah Hashmi. She is also easily performing within the top 15% of her classes. She is objectively leading by example and extremely active. She is performing nearly all of her studies and her ROTC accumulated achievement records include a high GPA in the very difficult major of aerospace engineering.

She has also received her Bronze Award for Physical Fitness Assessment and an overall excellent PT9071. Farah demonstrates a high level of leadership and always accepts leadership opportunities, turns them into personal challenges, and excels everywhere. Her positive attitude and work ethic is the driving force behind the successful cadets. She is able to influence subordinates and superiors, well ahead of her peers. She also was recognized last month as the Cadet of the month but he Cadet Wing for her outstanding dedication and leadership. She was also nominated for the ROTC cadet of the month only to top her performances. She is the proud of her and the Student Government Association is proud to have Farah as a member of Embry-Riddle’s student body.

The first College of Aviation Scholar of the Month winner is Margaret David. She was nominated by Bill McGillicuddy from Applied Aviation Sciences and Air Traffic Management. Maggie is an honor student who maintains a perfect 4.0 cumulative grade point aver-
gage. She has worked on several projects involving aircraft. She is frequently found to be exactly focused and well organized. The second College of Aviation Scholar of the Month winner is Hilary Myers. She was nominated by Stephen P. Luzio, COL USAF AFROTC. Hilary is majoring in Homeland Security and her area of concentration in Terrorism Management.

She is taking 16 credits while maintaining a high GPA in the very demanding major of homeland security. She has been selected and chosen for the AFROTC 3.5.0 and has proven himself to be a very hardworking individual. According to Dr. Tiberius, he was the lead in the EE-135 class. Gunsharam was always prepared for exams and quizzes and completed exceptional work in a timely manner and is a very mature individual. He has never submitted or was chosen as a tutor teaching Assistant for several classes. Gursharan is a dedicated hard working student and gets good reviews from instructors. Gursharan openly explains difficult topics to many students to help his fellow class-

mates understand topics. That your professor places it on

Library’s Reserve a Copy

The library reserve a copy program is one of the Memorial Library and the University Library’s Student Services. The primary objective of this project is to provide a reserve service for students who are requested by their professors. This is a highly requested, but unavailable service to students. Since its inception in the fall of 2009, library staff members have kept a running total of requests for each unavail-
able book. This has allowed the Library to identify the most needed books in the library. The library has also provided multiple textbooks from the course reader. Many of these books have been requested by students who were contacted by their professors, which professors were not able to provide. Due to lack of funding or availability, the library has provided these books.

Book out in 10 days

“Fundamentals of Computer Graphics” 3rd Edition by James D. Foley, Andries van Dam, Steven K. Feiner, and John F. Hughes. This book was required for a specific class and demand limited low copies available from the library technicians. The SGA offered a program to help students get the book. There were 20 copies in the library and one of the books for your class is not on the reserve copy shelf, request

Congratulations from the Flight Department to the following students for receiving their:

Private Pilot Certificate
Hugh Conner Lessing, Jr. 11/10/10

Instrument Rating Certificate
Nicholas Mark Frenkel 11/23/10
Eric Matthew Wyola 11/23/10

Commercial Pilot Certificate
Daniel Philipp Dietz 11/23/10

Commercial Multiengine Add-on Rating
Michael Eoin Brennan Jr. 11/26/10
Stephen Michael Cobly 11/24/10

Flight Instructor Instrument Certificate
James Alexander Zimmerman 11/30/10

This Week’s Topic

Greggory: What Happens if You Don’t Get Enough Sleep?

• A sleep debt accumulates. The more you owe, the more it costs you. The worse you owe, the more your sleep debt is escalating, respectively, at the worst possible times, such as on the road, in the books, or while chilling with someone special.
• Concentration, memory and information processing are diminished. But what was that again?
• Reaction times are reduced. Wonder why nobody wants to ride with you? Think Braille or Rock ’n’ Roll Cranial?
• When you are sleep-deprived, reach (and behavior may be negatively affected. No he likes an apple (except oligo, perhaps).)
• In the rare event that you find yourself sneezing, shifting, or simply not feeling your best.

How to Get Enough (Sleep. That Is...) Make it a priority. Remind yourself to give your body what it needs and avoid what sleep

BLESSING FOR THE GRADUATES

By Rev. Melynne Rust, ERAU Chaplain

May you be blessed with courage for your journey,
That fear may never keep you from exploring new paths.

May you be blessed with hope,
That you may never give up on yourself or others.

May you be blessed with goodness,
That in you strangers may find a generous friend.

May you be blessed with curiosity,
That you may always desire to seek out the mystery of faith.

May you be blessed with gratitude,
That you may see all of life as a gift.

May you be blessed with remembrance of one another and your time together here;
For there is forever a thread woven through your spirit
connecting you with others from this place.

May you be blessed in knowing that you are loved,
And that we who love you are full of joy
As we celebrate your life in our midst
And your dreams to come.
In Memory of Ben Glattstein

January 29th 1982 - November 25th 2010

Ben tragically lost his life ferrying a single engine airplane from California to Hawaii on Thanksgiving day. Ben was loved in the ERAU community as a friend, co-worker and mentor. You will be truly missed Ben. RIP Aussie!

What we say today is only an inadequate expression of what we carry in our hearts. Words pale in the shadow of grief; they seem insufficient when describing someone that was so loved and adored. Ben's values were strong; they are timeless; and they will endure. Today we all mourned with Nathanael, Hana, Dal, Ruffy, and all Ben's extended family, knowing that their loss is personal and profound, and valuing their willingness to share this farewell with us all. Ciao mate, Grant.

What can I say Ben, you were a good friend to me. You remain an inspiration to so many. You will be with each of us in our thoughts and actions as long as we live, your personality, zest for life and adventure, warm and kind spirit has changed the world in a sense nobody can begin to grasp. You may have been taken from us, but you live in our thoughts and souls forever present.

Go with God Ben Glattstein. We are so fortunate to have had you in our lives. Justin Root.

G’day Ben, My dear friend and fellow Aussie Rorrie roommate. In life you conurred our hearts and life its self. I’m sure you’re already doing the same where ever you are now. I will endeavor to live life to the fullest as you did. Thanks for the best times at Uni and training together, I’ll never forget your selflessness, help and friendship. May your spirit last forever. My thoughts are with you and your family always. Cheers mate. Adam Orchard (ERAU Class of 2004)

Ben, You were a great friend and an adventure life such as yours is uncommon in this world and you will be sorely missed. Love, Wil and Irene

Ben was my first flight instructor at ERAU. He was extremely motivated and passionate about aviation and that made me want to fly more and become a better pilot. He did just that. He put in excited about aviation and all that is has to offer. Ben was an inspiration to me and to all of us. Ben was always on an adventure running around living life to the fullest. I was always jealous of him and I still am. Ben was also my friend. He was always looking after his friends and putting them first. Ben will never be forgotten and he will always be in my heart. God is taking care of him up in the sky where he always wanted to be. God Bless Ben! I love you and miss you! Your memories will live forever - Lindsay Sorg.

I take Ben’s Aussie Attitude on life everyday with me from now on. No challenge is too small and this world has endless ‘endevours’ to encounter. I only wish that I could have learned more from him and heard more of his wild stories that only seem like Tall Tales to some. Not for Ben. He’s an example for me everyday of a true aviator. Derek Dobbs.

R.I.P Ben. You will never be missed and continue to look over our new adventures! Matt Buchenstiel.

“For once you have tasted flight you will walk in the earth with your eyes turned skywards, for there you have been and there you will long to return” - Aviatrix lost a great one today R.I.P Ben Glattstein you will be missed but wherever you are, you will take good care of us. Luis Corrnena.

Ben was one of the most amazing people that I have ever known. He lived his life to the fullest and his adventurous lifestyle paves a way for others to live by. He was liked by everyone and anyone who knew him and I believe the world was a better place with him in it. Ben will be missed by many. Greg Browm.

Ben, thanks for helping me find my religion. Ryan.

Mr. Dover (aka, Butterball), you’ve always brought a smile to my face. Your stories were wonderful and the way you told them made me feel like I was there with you. I’ll never forget our recruiting trip to Miami, you made me laugh the entire time. You will be truly missed. Until we meet again. Cheers Mate Chuck.

I had the pleasure of making Ben’s acquaintance over the summer after a late flight in the Pitts. It was too late to get gas at Braw Smyrna, but Ben wanted to fly, so he offered to fly to another field and pick up my refueling tab to be repaid at my leisure. Very kind after a first introduction. Recently I got to spend a week with him at the National Aerobatic Championships in Texas. Ben always wore a smile and was very supportive of me at my first contest; he and the rest of the team seemed genuinely interested in helping me achieve. I was privileged to be party to stories from the past, getting to know Ben and the team, and to be present for the writing of a new story. I was grateful to be on the team, and the idea that I would continue to develop friendships with Ben and the others made me happy. R.I.P Ben. He departed on his final flight, and I am left in debrief. Though I never thought about it before, I think new friendships are exciting, and to half that process just after that’s begun is extremely unfortunate. And the how and why...it’s bewildering. I really wanted to know Ben better and was looking forward to seeing him around the hangar and at school, and maybe joining in on a few adventures. I barely knew him and I feel as if a part of my future has been torn away... I can’t begin to imagine how his family and close friends must feel, but I hope they know many others share their pain and will help carry the burden of continuing. I am so sad. He was only 2 years older than me but had so much more experience in the air, and had a job I would love to have flying airplanes I would love to fly, going places I’d love to go. I knew that I was going to learn so much from him. I never worried at all that this could happen. I don’t know what to say except I’m mad you’re gone Ben, and you were a friend. I think people like a tadpole and we’re all little tadpoles; when you pull one out, the rest of the tadpoles tend to lighten and bunch up around it. While the metaphor is nice, the tadpole never looks the same again. We’re a bunch of little threads, Ben, bunch up around the toe you left behind. Roofy Coats.

Ben, your smile and good spirit was contagious. Your life’s story is envied by many, including myself. You have set the bar high, brother. We will spend a lifetime looking up to you; I’m sure you will be looking out for us. Blue skies, mate. I’ll be lucky to have met you. Jordan.

Though many of us have an amazing vision for our life, most of us don’t live it. We have places to go, people to meet, incredible experiences to be had. If only we could find the time, but why don’t most of us ever live that vision? Because the technologies of life got in the way, Ben never let life get in the way of any of his fantastic visions. He lived every minute of it to the absolute fullest, he grabbed life by the horns and said, “I’m gonna have the best ride possible”, and he did. Ben was a teacher, a leader, an inspiration. He was a brother, son, and uncle, a best friend. He was a breath of fresh air. Ben was a free spirit, who didn’t believe in the confines or orders of this world, he didn’t believe in restrictions or limitations, or impossibility. He had an endless thirst for knowledge, and always sought to better himself. His youthful energy and jubilation for life are a model for us all. Ben, you raised us to new heights, you set the bar, you challenged us to face every day with kindness, humor, excitement, humility, and an appreciation for life. If anyone could look back at their time spent on earth with a deep sigh, say, “I gave it my all”, it’s you, my friend. You’ve been granted permission to leave this earth, and fly an adventure we could only dream of. Blue skies and tailwinds, my dear, dead Ben, you are deeply missed. Adrienne Krunch (Johnson).

The 2010-11 conference slate for the Eagles’ volleyball team began earlier than in past years when Embry-Riddle’s volleyball opened play in The Sun Conference against Southeastern on Saturday. ERAU downed the Fire 25-16, 25-19, 23-25, 25-22, 25-23. Senior David Butler took over as the Eagles’ defensive block leader with five blocks on the night. Butler accomplished that feat in only his second season earning the Blue and Gold with 65 career blocks.

The Eagles shot the ball well in the early stages of the second set, finding their way to a 19-16 lead. After ERAU’s strong start, they never relinquished the lead, going on to win eight of the next 10 points, taking a commanding 24-22 lead. Hall followed with a kill from the front line in the first set, taking the lead. The Eagles finished off the Raiders with their 24th 3-0 sweep of the season.

The third set started much the same way as the first set, with ERAU jumping out to a 5-1 lead. The Eagles forced the Raiders to just two points at 24-2. But back-to-back service aces from Babcock and Hall put the Eagles in position to take the match. Two points later, Hall followed with a kill putting the Eagles up 2-1 in the match, 25-22.

The Eagles, led by double-digit kills from Butler, and Touchard and Josh Keller, who had 10 points each, continued on the Eagles’ 3-0 run in the second set, 25-22.

Leaves the Eagles’ home stand at 16-5 on the year and 6-2 in league play.

The Eagles top the Cougars

The 12th-ranked Embry-Riddle women’s volleyball team opened play at 2-0 in the Sun Conference with a 25-17, 25-22, 25-16 win over Briar Cliff (Iowa). The Eagles’ .750 win percentage moved their fall home stand at 16-5, tying their highest win percentage in program history.

The Eagles swing Southern Oregon

The Eagles sweeped Southern Oregon, 25-12, 25-17, 25-9 on Saturday, Dec. 4, to move to 18-5 on the year and 6-2 in league play.

The Eagles into the playoffs

The Eagles enter the playoffs as the No. 2 seed after winning the Sun Conference regular season title, then swept the Panthers of the University of South Dakota in the quarterfinals.

The musical Norwegian minimalist

Critically acclaimed as one of the best of the last decade in Norway, Kings of Convenience returns with his new record. Erlend Øye, known for his restrained voice, has not disappointed in this release. "The Whitest Boy Alive" is a blend of indie pop, electronic effects, and solo vocals from Øye. While the name of the artist might seem strange at first, once you know that this band is the side project of Norwegian musician Erlend Øye, everything makes a little more sense.
