OPEN HOUSE WILL BE HELD ON SEPTEMBER 27 AND 28 AT THE EMBRY-RIDDLE CAMPUS, OLD AND NEW. ALL CLASSROOMS AND LABS, THE NEW DORMITORY, AND VARIOUS OTHER SECTIONS OF THE CAMPUS WILL BE OPEN TO THE PUBLIC. THE OPEN HOUSE IS HELD IN CONJUNCTION WITH GOVERNOR KIRK'S "PRIVATE HIGHER EDUCATION MONTH" THIS SEPTEMBER.

Road To Remain Status Quo

BY RICHARD T. WHITE

Disgusted with the access road to the new campus? So is the administration but that doesn't change the situation at all. "It's a budget problem", said Mr. Ed Gervase during an interview last week. It seems as though the SGA, Veterans Association and other student complaints have not gotten the road paved yet. This reporter went to Mr. Gervase - administrative assistant for facilities - to find out why.

"First, to clarify the facts; the road belongs to Embry-Riddle, but the property it is on belongs to the city until October 1st, when Volusia County becomes the new airport owner."

Mr. Gervase states that the school's budget just doesn't have adequate resources to hard-pave the road. How much is adequate resources? Officially between $2,000 and $3,000, (not to include the inflationary cost of procrastinating). One might wonder why the county can't help; mainly because the school isn't sure of the county's position concerning finance or ownership of the land.

Nevertheless, the school will continue to smooth, grade and fill in potholes with sand - a pretty poor excuse at that. When asked what would happen when the cost of sand equaled the cost of hard-top, Mr. Gervase replied that the school hopes to black-top by then - in other words, spend up to $6,000 later rather than $3,000 now. But how soon is later? I managed to pin Mr. Gervase to "within one year," About 364 days too long for a new car to suffer.

In the meantime, following the left-hand traffic pattern and leaving the faculty parking spaces open, will help expedite the rush-hour traffic.

Finally, it might be worth all student's effort to voice their disgust with the road. We all cooperated well with the vending machine moratorium - similar action could pave the road sooner.

SGA Briefs

For those of you in A&P who have felt slighted because there was no honor roll system for the A&P department: Plans are now underway to establish one.

Yearbook staff positions are being filled rapidly. Anyone who wishes to work on this may contact Ray Loehner.

The S.G.A. will be selling local theatre tickets at a reduced price in the very near future. This is one of the ways the S.G.A. can save you money. Take advantage of it!

Fireworks in Dorm II are not allowed! Anyone involved in this may find himself "involved" in something a little more serious.

Keep your eyes and ears open for information on the S.G.A. raffle which should be coming up soon.

Next Tuesday elections will be held. Please make an effort to familiarize yourself with the candidates. Most of all, please VOTE!!!
the president's corner

The candidates for SGA will be putting up posters as of tomorrow, 23rd asking for your support in the upcoming election. There has been a great deal of time spent by each of these candidates to make up these posters; show them the courtesy of leaving the posters where they are originally placed and in the same condition.

As everyone knows, the SGA monitors traffic on campus. Since the beginning of this trimester, there have been numerous offenses stemming from ignorance of traffic regulations. If you have any doubts about where is and is not legal parking on campus, stop by the SGA office and find out. Traffic rules are set up to help the students, however, they cannot be effective if they are not made known or understood.

Jan Collins
SGA President

In the forthcoming week, you will face an issue of great importance, Election of representatives and officers for the SGA. Why the importance? Whatever decision is made by the Student Council effects the student body directly.

Working with the SGA as a representative for the past three years, I have come in contact with many members of the council. One that is outstanding is Dave McCall, candidate for President. Dave was Chairman of the Student Activities Committee, and by the evidence of the social functions, he did an outstanding job.

He is objective, clear-thinking, ambitious, and very interested in the advancement of the Student body. The determination to make things successful is a number one factor in Dave's background. I firmly believe that Dave will make an outstanding President because of these attributes.

Your vote is about to be cast, stop for a minute and think: Who will represent for the next year? Who can be depended upon, to do the finest job possible? Vote Dave McCall for President.

Don Nichols

FEEBLE FABLE

By AnyHouse

There once labored a migratory tribe in the land of the new academia complexia. The tribe's rulers and tax collectors, however, lived permanently in their own grounds of the tribe. Thrice to fort' time daily the migrating tribe was forced by circumstance to travel the same poor section of ground. The lot of the tribe was poor, indeed, as they cast their vehicles upon the holes and ruts. Even after numerous pleas to the rulers for improvements on the grounds, nothing did the rulers do. As was oft the case in the state of the tribe, the rulers took lightly the many appeals.

MORAL:
Ye that sees no dirt, sweeps no dirt.

WONDER TEACHER

Have you ever taken a subject in which the students know more than the teacher? Ah, yes. In think we all have! But what does the administration do about this? Do they observe the instructor in class where he earns his bread and butter? Does the administration have questionnaires sent out to evaluate a new teacher? It does not take long to find out if an instructor is qualified in his subject. Let's have the qualifications of the instructor set forth to the student. If we can't have the proper instructors who are qualified teaching in their given field, either get qualified instructors or discontinue the subject. We don't ask for much as students at Riddle, but we do ask for qualified instructors. A man who just soloed does not teach instrument flight - and the academic students do not deserve a third rate instructor. We want Quality, not Quantity, in the subject offered. Let's get rid of these wonder teachers or let's get rid of subjects that these wonders can't teach.

NAME WITHHELD

RAY KESSLER RAMBLER
presents the all new "HOT"

stop in and test drive one today
241 ridgewood holly hill 255-2441
Dear Embry Riddle Student:

Since I might not have the opportunity of meeting you personally during election week, let me take this opportunity to introduce myself. My name is Dave McCall and I am running for President of the Student Government Association.

I am a Junior majoring in Aeronautical Science. I am currently a representative of the SGA and am Student Activities chairman. I am also photo Editor for the AVION and a member of the Veteran's Association. My involvement in these areas has given me valuable experience which I would put to good use as President of the SGA.

If elected, I would work hard to serve you and to improve your life at Embry-Riddle. I would initiate new programs in the areas of financial assistance, student housing, social activities, non-profit flying clubs and job placement. My goal would be to urge the various groups on campus (the fraternities, the Veterans the Student Government, the pilots and managers and A&P students) to become involved and work in a united way to improve Embry-Riddle.

I am asking for your support at the polls next Tuesday. Put an X by my name, Dave McCall, and I will promise to give you good leadership.

Dave McCall

Happiness is...having the administration drive over the campus obstacle course ten times a day.

I have been an active member of the Student Government Association for two and a half years. My reason for seeking the President's office is so I can be in a better position to eliminate or improve some of the conditions which exist on campus which complicate the everyday functions of the Student Body. The most important part of campus life is the student, because without students there would be no university at all.

I've served as co-chairman of the Social Functions Committee, Editor of the school paper, the Informer, now the Avion, I served on the Student Conduct and Grievance Committee and the dress code committee. In serving on these committees, I gained valuable experience which I would like an opportunity to use. So I'm seeking your support; vote for me on September 30 for an active Student Government.

Richard Berezansky

BY GENE LECLAIR

Elections are next Tuesday, and to my way of thinking, whoever is elected Student Government President is of the utmost importance. Jerry Berndt, in my opinion, is the only fully qualified candidate.

Why do I support him? In my short career at Riddle, I have been in many organizations on campus in one way or another. I have come in contact in one form or another with all the present candidates. As far as I am concerned, Jerry Berndt has proven himself many times over in representing the students at this school.

He has been Treasurer and founding officer of the Embry-Riddle Veterans Association, as well as being elected Vice-President of the same organization by acclamation after I resigned. In addition, he was made Treasurer of the Student Government and was charged with the complete overhaul and revision of a very deplorable treasury. He has accomplished that job magnificently.

He has been the sponsor of many resolutions on record and was the co-chairman of the Constitutional Revision Committee which has written a new and far-sighted Constitution for the SGA. He knows it inside and out! If the new Constitution passes referendum no one else will be more qualified to function within the limits of that fine document. This point alone is most important.

We need a strong, dynamic, articulate President! A person who has ideas, one who can coordinate all activities and lead, one who is knowledgeable in all areas of the Student Government politics. We need a man who has the students' interest at heart and is thinking in the right direction almost all of the time. The time has come to elect a man who can do all these things, and bring pride, prestige, and dignity to the office.

I support Jerry Berndt because I know he can do the job. I urge you to vote for him Wednesday, September 30th, and elect a man who can move this organization to vistas never before seen at Embry-Riddle. Jerry Berndt is without a doubt in my mind, the best candidate for Student Government President. Please VOTE!

Happiness is...giving Dean Spears a loaded cigar.

Happiness is...Finding a clean plane on Riddle's Flight line.
Sports

Diving Eagles

By Ralph C. Wicklund

The committee of our Scuba Club, the Diving Eagles, have begun outlining activities for the fall trimester. During the past two weeks the club has held two introductory meetings, primarily to acquaint new members, but also to bring old members up to date on the summer's activities.

Under the leadership of A. J. Bland, who was elected president when Ralph Nicklund went north for the summer, the club members participated in an average of two dives per week, some of which were to the Bahamas and the Florida Keys, heard several lectures pertaining to the broad field of diving, watched movies and slides, and in general, had a good time.

It is now time to begin a new school year, a new trimester, and new projects. This year we hope to continue with the diving trips, the lectures, and the movies and slides, but on a larger scale. This larger scale also applies to membership. We have already had a fantastic response and we hope more students and faculty who are interested will drop by and see us.

The first activity of the Diving Eagles was the election of new officers. The election will be held on Monday, September 22, and the results are as follows:

President-Ralph C. Wicklund, Jr.
Vice-President-Larry Deemer
Treasurer-Greg Nelli
Secretary-Geoff Griffiths

All other posts and committees are filled by appointment or volunteers.

Our dive schedule started off this year with a weekend trip to the Bahamas on September 13, which was sponsored by the Daytona Beach Skin Divers. Slides of this trip were taken by A. J. Bland and will be shown at future meetings.

The next dive on the schedule was a night dive which was held at Blue Springs on Saturday, September 20. For those who are interested in cave-diving, but perhaps not at night, we offer several trips each trimester to various springs located within easy driving distance.

The major club dive of the trimester, a weekend of diving in the Bahamas, is being planned for October 24-25. If the previous dives are any indication at all we can expect this to be one of the most rewarding of the year.

The lectures given, and the movies and slides shown during the trimester will be on such activities as wreck-diving, cave-diving, spear-fishing, underwater photography, and many other topics which might be of interest to club members and guests.

So, if anyone, student or faculty, is interested in Scuba diving or just wants to see what's going on in the club, please come by to one, or more, of the meetings which are held every Monday at 8:00 p.m. in the third floor study of Dorm 1.

EAGLES SHOT DOWN

By Marty Stilling

Last Saturday fourteen brave Riddle "Eagles" climbed aboard our rusty old DC-3 and ventured down to the home ground of the Miami-Dade "Falcons".

The Falcons, who will host this year's J.C. National Soccer Championships, struck with power and lightning, scoring four times before ten minutes had elapsed. The Eagles fought back and managed to keep them from denting our nests until the third quarter, when the Falcons struck again for five more tallies. With the score 9-0, Zaccheaus Fagbeni drew first blood. The Falcons quietly avenged themselves, making it 10-1. With only ten minutes left to play, Coach Mansfield made some unusual changes which resulted in two scores by Bruno Schmidt and Billy Mozer.

This Saturday the Eagles will take on the strong University of Florida team here on our own home ground, Game time is 2:30 p.m. Come out and support your team.

Happiness is... Knowing Dean Mansfield doesn't like classes at ERAI anymore than the students.

KARATE AT ERAI

By John Conklin

Many of you who attended the Pep Rally last week may have noticed a young man in a white suit. Contrary to popular opinion, he is not the school psychiatrist! He is a Karate instructor and the purpose of his presence was to conduct a survey of how many students would be interested in forming an Embry-riddle Karate Club. Considering the turnout at the Rally there was a substantial number of students interested in the idea.

Now, why Karate? Well, to begin with, it is a perfect physical conditioner; secondly, it helps to enhance one's self-confidence and, lastly, it affords you with a good knowledge of self defense that could be of critical importance in some future crisis. Karate is well established in the intercollegiate competition field and many colleges here in Florida have active teams. It seems to be a mutual feeling among the students that we could use a little more in the way of sports at ERAI.

The schedule of plans call for the training sessions to start on the 30th of September and thereafter every Tuesday and Thursday evening from 7:00 p.m. to 8:30 p.m. No special equipment is needed. Before we go on, let's discuss that almighty subject: MONEY - well, it will work this way: The more members we have in the club, the less it will cost per man. However, it will still be very much cheaper than an "outside" club. At present, we predict a monthly charge of 8.00. We will revise that estimate in the very near future, hopefully to a lesser amount.

What next? Mr. Don Collyer, who is sanctioned by the U.S. Karate Association and the All Japan Karate Federation, is going to stage a demonstration this Saturday morning at 10:30 a.m., at Nova Road Dormitory for the benefit of all ERAI students who are interested. Mr. Collyer will be glad to answer any queries you may have at that time.

So we are hoping to see many of you Riddle Rompers at the demonstration and, by the way, the club is open to you girls too. Happiness is...having a SGA candidate throwing a beer party.

ALPHA ETA RHO

By George Brewer

Now that the trimester has finally settled into a more or less stable groove, plans for fraternity activities are being activated.

Our new Pledge Class is now in full swing and all seem to be doing well so far. Of course, this is only the first week of the Pledge Period and our Pledges have seven more weeks of fun and surprises to look forward to. Pledgemaster, Richard Berzansky has made quite a few changes in the Pledge syllabus and everyone is anxious to see how the new system will work out.

Our social calendar, features a beach party this weekend and a trip to Cape Kennedy sometime in October. Speakers are also being solicited to speak at some of our business meetings on various phases of aviation. This activity was initiated last Spring and has proved very successful and interesting.

This past Saturday night, the Brothers held a party for which Ed Johnson and Jack Grandman supplied the entertainment, including several vivacious female vocalists who kept everyone in a jovial mood with their witty cliches and harmonious singing. Several Brothers who were fortunate enough not to attend spent the evening flying around Daytona sightseeing and logging some inexpensive hours aloft.

In other business, Robert C. Anderson was unanimously voted in as our new Faculty Co-Advisor. Bob holds all of his flight and ground instructors ratings and is teaching ground school at Ridgeline. Bob helped the Fraternity a great deal over the summer as acting Advisor and we're all glad to have him now as a "perma-

SIGMA PHI DELTA

By Jim Sheibinger

Many of the Brothers are thankful that the hectic weekend is over. Friday night we held our Rush Party, which was a success. We hope everyone enjoyed themselves and, by the looks of things, it seemed they did. Saturday night a Smoker was held for interested students to learn more about the Fraternity. Next Sunday night, we are holding pledge initiation. Any second term or better Engineering students who couldn't attend either the party or the Smoker and are interested in pledging, can contact the Frat House to find out more details. The number is 252-3937.

Another big weekend is in store for Sigma Phi Delta. Next Saturday there is Initiation of new Brothers. They are:

- Joe Rubel
- Paul Rehder
- Denis Waltz
- Steve Ellis
- Ray Alfonso
- Mike Tompkins

This raises our membership to twenty Brothers.

After the initiation, there will be a banquet held at Club 92 with guest speaker Mr. Panariti, who is employed by G.E. and is an expert on the Apollo Program. A formal party will be held at the Frat House honoring the new Brothers.

With a new football season opening soon, we went all out for our team. Things really looked good at the first few practices. We've got our eyes on the trophy this year, so good luck, team.

See you around school and have a good week from the Professionals.

PI SIGMA PHI

By Ray Loehner

Last Saturday Pi Sigma Phi had the first of its rush parties. From a general consensus, everyone had a great time. The only major problem was that the beer ran out at 1:30 a.m.

It appears that we have gotten five pledges for our first pledge period this semester. The pledge period will run for three weeks.

Approximately a week after midterms Pi Sigma Phi will reopen pledging for students interested in joining the Fraternity. If there are any questions concerning the second pledge period, contact any of the Brothers or Pledges around Campus. Join the fastest growing Fraternity on Campus.

NEW LABS OPEN SOON

By Barry Eller

Students are getting it easy for the first couple of weeks, at least if they are taking either Chemistry or Physics lab. Don't worry; it won't last for long. Within two weeks you will be in there slugging away at experiments you know can't work, no matter what the instructor says.

In the meantime, your professors have their work cut out for them. While you are enjoying your break, they are sorting and organizing the new equipment that recently arrived. Some equipment is so new that even the instructor will have to experiment with it to find out how the students should handle it. By the way, students, handle it carefully; there is close to $80,000 worth of new equipment in the new labs.

In case you want to see how work is progressing, take a walk to Building B in the New Complex, Rooms 312 and 304 are Chemistry labs I and II respectively, rooms 302 and 309 are the Physics labs. Presently, only room 302 is going to be used. Room 309 will be used for expansion of the Physics program. All you naive students, who thought you had taken all the Physics you could, may soon be in for a surprise. Professor Trout implied that a new advanced Physics course is being planned and if more instructors and students can be found, it will be started.

Oh, yes! You people in Metallurgy weren't forgotten. You're in Room 310.

As was stated at the beginning, you students have a couple of weeks break from lab. Enjoy yourself while you can. It is on good authority that you will be doubling up on experiments in order to catch up. Notice how I saved the good news for last.

Help prevent school fires—put ashtrays in the faculty rooms.

THE NEW PHYSICS LAB, READY FOR ACTION

THE NEW PHYSICS LAB has already started to pay dividends. Shown here is Mr. Perch, a Riddle Physics teacher who has invented the first workable invisibility machine.

E.R.A! HOSTS I.C.U.F.

By Richard Wolff

Embry-Riddle Aeronautical Institute was the host of a meeting of the Independent Colleges and Universities of Florida, Inc. (I.C.U.F.) last Friday, September 14. I.C.U.F. is composed of a council of presidents of 14 private sector colleges and universities in the state of Florida. It meets nine times a year, with each meeting taking place at a different member institution.

I.C.U.F. was formed in 1964. Embry-Riddle joined this organization when E.R.A.I. became a fully accredited institution of higher learning last fall.

The purpose of the Independent Colleges and Universities of Florida, Inc. are multifold and are extremely beneficial to E.R.A.I. and the other members, as stated by Robert Cessna, E.R.A.I. Director of Development, and George Russell, consultant for I.C.U.F., the organization gives member private non-profit colleges and universities the advantages of promotion and protection of interests, determination of the ever widening opportunities in Florida and the assistance of favorable government legislation. I.C.U.F., also strives for good public relations and the understanding of the business community.

The I.C.U.F. meeting at Embry-Riddle was the first one since last summer. All of the 14 member institutions were represented by their presidents or designated representatives. An important guest at this I.C.U.F. meeting was State University System Chancellor Robert Mautz. Another important factor in this session of I.C.U.F. was the fact that September, 1969 is Private Higher Education Month in Florida, as was recently proclaimed by Florida's Claude R. Kirk, Jr.

Florida private sector institutions of higher learning constitute 43% of the undergraduates in full time attendance in this state. The 14 members of the Independent Colleges & Universities of Florida, Inc. are: Barry College, Miami; Brevard - Cookman College, Daytona Beach; Biscayne College, Opa Locka; Embry-Riddle Aeronautical Institute, Daytona Beach; Florida Institute of Technology, Melbourne; Florida Memorial College, Miami; Florida Presbyterian College, St. Petersburg; Florida Southern College, Lakeland; Jacksonville University, Jacksonville; Rollins College, Winter Park; Saint Leo College, Saint Leo; Stetson University, Deland; University of Miami, Coral Gables; and the University of Tampa, Tampa.

**Octoberfest**

The Prince of Peace Church will hold its first annual Octoberfest on October 3rd, 4th and 5th on the church grounds. This election is now going on to elect a Burgermeister and Frau who will reign over the Octoberfest.

The Octoberfest will open on Friday, October 3rd, at 4:30 PM, with the crowning of the Burgermeister and Frau. Throughout the three day festival, sixteen booths will be erected on the church grounds. This election is now going on to elect a Burgermeister and Frau.

The Octoberfest will broadcast live from the church grounds. Don Skyler will be master of ceremonies for Saturday's festivities. Saturday is designed for the young and young at heart.

Sunday, October 5th is family day. Several live modern country music bands will be there and WELE will have its radio mobile unit broadcasting live.

Friday, October 3rd festivities will be from 4:30 PM to 11:00 PM. Saturday, October 4th from 4:30 to 11:00 PM and Sunday from 2:00 PM until 9:00 PM.
