Video Tips, Recommendations, and Resources

Poster Session

Video: Intended Audience: Members of the ERAU Community.

Length: 2-3 minutes.

Goals: To introduce the presenters and their research to guests visiting the site. The video is an opportunity to share your passion and energy for your project.

Suggestion: Video capture by good quality cellphone camera, tablet, webcam or portable camera should work well. Think of this video as your 2-3 minute elevator pitch about your research.

Things to Consider for your Pitch:

- What are you researching and any implications?
- What made you interested in your research topic?
- Any stories or experiences to relate topic with audience?
- What are the next steps with your research?
- Don’t use academic jargon, use language for a general audience with a variety of backgrounds and expertise.

3-minute Presentation

Video: Intended Audience: Members of the ERAU Community.

Length: 3 minutes.

Goals: To provide an elevator pitch about your research within a 3 minutes video and one PowerPoint Slide. Your audience should know the major elements of your research and why it is important.

Suggestion: Video capture by good quality cellphone camera, tablet, webcam or portable camera should work well. Think of this video as your 3 minute elevator pitch about your research.

Things to Consider for your Pitch:

- What are you researching and any implications?
- What made you interested in your research topic?
- Any stories or experiences to relate topic with audience?
- What are the next steps with your research?
- Don’t use academic jargon, use language for a general audience with a variety of backgrounds and expertise.
- Why is this topic important and why should the audience care?
Things to Consider for your Slide

– Visuals and photos should be clear and easily understood.
– If using graphs and data, keep it clean and simple.
– How does this element (text, image, graph etc.) help you argument?
  o If it does not help your argument, you should not be using it.
– Do not use paragraphs of text. Use short and concise language in bullet point style.
– As a rule of thumb your slide should be about a 50% balance between visuals and text.
– Remember you only get One Slide!
